White Nation White Nation:

White Nation Ghassan Hage, 2012-11-12 Anthropologist and social critic Ghassan Hage explores one of the most complex and troubling of modern phenomena the desire for a white nation Next American Nation Michael Lind, 2010-06-15 Are we now or have we ever been a nation As this century comes to a close debates over immigration policy racial preferences and multiculturalism challenge the consensus that formerly grounded our national culture The question of our national identity is as urgent as it has ever been in our history Is our society disintegrating into a collection of separate ethnic enclaves or is there a way that we can forge a coherent unified identity as we enter the 21st century In this marvelously written wide ranging and thought provoking book Michael Lind provides a comprehensive revisionist view of the American past and offers a concrete proposal for nation building reforms to strengthen the American future He shows that the forces of nationalism and the ideal of a trans racial melting pot need not be in conflict with each other and he provides a practical agenda for a liberal nationalist revolution that would combine a new color blind liberalism in civil rights with practical measures for reducing class based barriers to racial integration A stimulating critique of every kind of orthodox opinion as well as a vision of a new Trans American majority The Next American Nation may forever change the way we think and talk about American identity New York Newsday **Mongrel Nation** Clarence Earl Walker, 2009 Lost in the argument over the existence of a sexual relationship between Thomas Jefferson and Sally Hemings are equally urgent questions about a history that is more complex both sexually and socially than most of us realise The author seeks to uncover this complexity as well as the reasons it is so often obscured **The Healing of Nations** Mark R. Amstutz, 2005 How does one forgive an international political transgression as deep as genocide or apartheid Forgiveness is often conceived of as an element of personal morality and even at that it is difficult This book argues that it is also an essential part of political ethics especially when dealing with collective wrongdoing by political regimes In the past a retributive justice demanding prosecution and punishment of all past offenses has kept the international community away from moving on to the next step in regime change Here Mark R Amstutz takes a restorative justice approach calling for nations to account for crimes through truth commissions public apology and repentance reparations and ultimately forgiveness and the lifting of deserved penalties The distinctive feature of forgiveness is the balance it strikes between backward looking accountability and forward looking reconciliation The Healing of Nations combines a theory of the role of forgiveness in public life with four key case studies that test this ethic Argentina Chile Northern Ireland and South Africa Amstutz uses the hard cases to illustrate the promise and limits of forgiving without forgetting A Nation within a Nation Komozi Woodard, 2005-10-12 Poet and playwright Amiri Baraka is best known as one of the African American writers who helped ignite the Black Arts Movement This book examines Baraka's cultural approach to Black Power politics and explores his role in the phenomenal spread of black nationalism in the urban centers of late twentieth century America including his part in the election of black public officials

his leadership in the Modern Black Convention Movement and his work in housing and community development Komozi Woodard traces Baraka's transformation from poet to political activist as the rise of the Black Arts Movement pulled him from political obscurity in the Beat circles of Greenwich Village swept him into the center of the Black Power Movement and ultimately propelled him into the ranks of black national political leadership Moving outward from Baraka's personal story Woodard illuminates the dynamics and remarkable rise of black cultural nationalism with an eye toward the movement's broader context including the impact of black migrations on urban ethos the importance of increasing population concentrations of African Americans in the cities and the effect of the 1965 Voting Rights Act on the nature of black political mobilization

The Racial Contract Charles W. Mills, 2022-04-15 The Racial Contract puts classic Western social contract theory deadpan to extraordinary radical use With a sweeping look at the European expansionism and racism of the last five hundred years Charles W Mills demonstrates how this peculiar and unacknowledged contract has shaped a system of global European domination how it brings into existence whites and non whites full persons and sub persons how it influences white moral theory and moral psychology and how this system is imposed on non whites through ideological conditioning and violence The Racial Contract argues that the society we live in is a continuing white supremacist state As this 25th anniversary edition featuring a foreword by Tommy Shelbie and a new preface by the author makes clear the still urgent The Racial Contract continues to inspire provoke and influence thinking about the intersection of the racist underpinnings of political philosophy

United States. National Resources Committee,1940 **Building an American Empire** Paul Frymer,2017-05-02 How American westward expansion was governmentally engineered to promote the formation of a white settler nation Westward expansion of the United States is most conventionally remembered for rugged individualism geographic isolationism and a fair amount of luck Yet the establishment of the forty eight contiguous states was hardly a foregone conclusion and the federal government played a critical role in its success This book examines the politics of American expansion showing how the government s regulation of population movements on the frontier both settlement and removal advanced national aspirations for empire and promoted the formation of a white settler nation Building an American Empire details how a government that struggled to exercise plenary power used federal land policy to assert authority over the direction of expansion by engineering the pace and patterns of settlement and to control the movement of populations At times the government mobilized populations for compact settlement in strategically important areas of the frontier at other times policies were designed to actively restrain settler populations in order to prevent violence international conflict and breakaway states Paul Frymer examines how these settlement patterns helped construct a dominant racial vision for America by incentivizing and directing the movement of white European settlers onto indigenous and diversely populated lands These efforts were hardly seamless and Frymer pays close attention to the failures as well from the lack of further expansion into Latin America to the defeat of the black colonization movement Building an American Empire reveals the lasting and profound significance government settlement policies had for the nation both for establishing America as dominantly white and for restricting broader aspirations for empire in lands that could not be so racially engineered **Gender, Madness, and Colonial Paranoia in Australian Literature** Laura Deane,2017-05-31 This book offers an original and compelling analysis of women s madness gender and the Australian family Taking up Anne McClintock s call for critical works that psychoanalyze colonialism this radical re assessment of novels by Christina Stead and Kate Grenville provides a sustained account of women s madness and masculine colonial psychosis from a feminist postcolonial perspective This book rethinks women s madness in the context of Australian colonialism Taking novels of madness by Christina Stead and Kate Grenville as its point of critical departure it applies a post Reconciliation lens to the study of Australia s gender and racial codes to place Australian sexism and misogyny in their proper colonial context Employing madness as a frame to rethink postcolonial theorizing in Australia Gender Madness and Colonial Paranoia in Australian Literature psychoanalyses colonialism to argue that Australia suffers from a cultural pathology based in the strategic forgetting of colonial violence This pathology takes the form of colonial paranoia about race and gender producing distorted gender codes and ways of being Australian This book maps the contours of Australian colonial paranoia weaving feminist literary theory psychoanalysis and postcolonial theory with poststructuralist approaches to reassess the traditional canon of critical madness scholarship and the place of women s writing within it This provocative work marks a radical departure from much recent feminist cultural and postcolonial

criticism and will be essential reading for students of Australian literature cultural studies and gender studies wanting a new insight into how the Australian psyche is shaped by settler colonialism

Desire for Development Barbara Heron,2007-12-04 In *Desire for Development* Whiteness Gender and the Helping Imperative Barbara Heron draws on poststructuralist notions of subjectivity critical race and space theory feminism colonial and postcolonial studies and travel writing to trace colonial continuities in the post development recollections of white Canadian women who have worked in Africa Following the narrative arc of the development worker story from the decision to go overseas through the experiences abroad the return home and final reflections the book interweaves theory with the words of the participants to bring theory to life and to generate new understandings of whiteness and development work Heron reveals how the desire for development is about the making of self in terms that are highly raced classed and gendered and she exposes the moral core of this self and its seemingly paradoxical necessity to the Other The construction of white female subjectivity is thereby revealed as contingent on notions of goodness and Othering played out against and constituted by the backdrop of the NorthSouth binary in which Canada's national narrative situates us as the good guys of the world

Crisis in the Nordic Nations and Beyond Kristín Loftsdóttir,Lars Jensen,2016-04-22 With discourses of crisis and disaster featuring strongly in contemporary discourses on contemporary society this book brings together critical perspectives from across the humanities and social sciences to explore the idea of crisis as inherently related to power dynamics and the formation of different subjectivities and identities within the Nordic countries and globally This volume emphasizes the importance of investigating the interrelationship of three crises social economic and environmental as these address the interlinked surfaces of the same reality and it examines the negative connotations of the notion of crisis whilst also raising the question of when and why something becomes identified as crisis and for whom With chapters on media representations of crisis and the global context of crisis discourses the crisis of national identities and their mobilization in response and environmental crisis as well as the interrelationship between the social and the environmental and the different positioning of individuals in relation to power this volume offers an understanding of crisis as a multivocal symbol of the present As such it will appeal to scholars of sociology anthropology history cultural studies literature and political science

Proceedings of the fourth National Conservation Congress at Indianapolis, October 1-4, 1912 United States. National Conservation Congress,2023-07-10 The *Proceedings of the Fourth National Conservation Congress at Indianapolis October 1 4 1912* serves as a vital historical document that encapsulates an era of heightened awareness about natural resource management in early 20th century America With meticulous attention to detail this compilation presents speeches discussions and resolutions from key figures

in conservation illuminating the urgent dialogue regarding sustainable practices and the stewardship of America's vast natural resources. The literary style is formal and reportorial, reflective of its genesis in a time when conservationism began to emerge as a critical theme in American public policy, setting the stage for future environmental legislation. The National Conservation Congress, representing a diverse coalition of scientists, policymakers, and activists, found itself at the forefront of a national movement aimed at safeguarding America's natural landscapes from unchecked exploitation. This period of social reform was marked by influential figures including President Theodore Roosevelt, whose administration emphasized conservation as a moral imperative guiding the Congress's discourse on the need for unified action. I highly recommend this book to scholars, students, and anyone interested in the foundations of the modern conservation movement. It not only chronicles pivotal moments in environmental advocacy but also offers insights into the challenges and triumphs that continue to resonate in contemporary discussions about ecology and sustainability.

Nationalism and Global Solidarities James Goodman, Paul James, 2006-11-29. Even in the face of neoliberal globalization, nationalism remains a significant political force. The leading contributors to this new volume explore the extent to which nationalism can be a foundation for alternative solidarities. Against the axiom that with globalization all that is solid melts into air, this anthology debates the extent to which different forms of solidarity remain viable, from the solidarities of local political groups to the solidarities of nationalism, internationalism, and alternative globalisms. Organized into three sections, the book addresses the relationship between the contemporary formations of nationalism, globalism, and solidarity movements. Part 1 offers a framework for understanding globalization and discusses the effect of globality on nationalism. Part 2 addresses the logics of nationalisms in globalizing contexts, respectively liberal nationalism, left nationalism, post-colonial nationalism, and revivals of nationalism. Part 3 addresses issues of solidarity and integration in a world of nationalism and globalism, asking how differing forms of connectivity may be emerging, disrupting prevailing oppositions and relations, focusing on social movements and solidarity. Offering the first detailed study of the relationship between globalization and nationalism, *Nationalism and Global Solidarities* will be of strong interest to students and scholars of politics, sociology, and international political economy.
