Step Towards a Top Life **Part 2** Tsung-Yi Chen, 2025-09-24 The rise of Taiwan s semiconductor industry is rooted in the super learning parenting approach In the journey of accompanying children through their learning we often encounter various questions How can we ignite their learning motivation How can we help them remember better and learn faster Recently I ve been deeply reflecting on these questions and have begun to re examine our understanding of learning In reality learning is not just about memorizing knowledge it s an adventure of intellect and creativity Children s learning speeds vary and this isn t a flaw but rather a reflection of each individual s growth rhythm When we are willing to respect

these differences and utilize various learning strategies children's potential can gradually be unearthed. In the past we might have only focused on grades and outcomes but modern brain science tells us that the essence of learning lies in the development and activation of brain structures. Activities seemingly unrelated to academics such as exercise, meditation, and even sleep can significantly boost learning efficiency. Appropriate levels of stress and relaxation can help children overcome difficulties while diverse techniques like spaced practice, concentrated practice, visual memory, auditory learning, and even body code memory methods can simultaneously enhance memory and comprehension. Furthermore, building learning motivation, cultivating speed reading abilities, mastering efficient reading techniques, and improving presentation and note-taking skills are all indispensable keys for children to move towards independent learning. Every child can discover their unique intellectual strengths as long as we are willing to accompany, guide, and experiment. This journey of exploration has given me a brand new appreciation for learning. I hope every parent and child will be brave enough to try different learning methods and find the path that suits them best. After all, learning is a lifelong endeavor; the starting point isn't what matters, continuous progress is key.

Here is a hands-on activities book that provides school leaders an easy-to-use format for the delivery of professional development sessions for K-12 personnel. It details three major topics: social realities, e.g. societal trauma, diversity, e.g. Disabilities, and community conundrums, e.g. economic uncertainties.
