Direction is something that guides us to find our way We are differently pursuing our ways by following different directions Earth rotates in its own direction Moon is also busy and moves around its direction We saw an eagle chasing a snake to have lunch We observe many insects hovering around the light at night Some are directed towards North South East and West Some are heading towards the sky and some are tearing the waves of the ocean to find the desired direction Actually life itself is a journey that follows a particular direction towards the future In fact we can observe directions everywhere those directions only differ in different destinations Directions are a journey that leads us to find our destination Some people find their way and some are lost and become directionless It depends upon us which direction we follow Sometimes we are also confused in choosing the exact direction Because when directions become more than one for a single destination then it happens Let s seek true direction that can help us in finding our way **Who We Are and How We Got Here** David Reich,2018-03-23
