Description :

A thoughtful look at our history of innovation, the problems with the patent system, and the prospects for America's future. America loves innovation and the can-do spirit that made this country what it is—a world leader in self-government, industry and technology, and pop culture. Everything about America has at one point or another been an experiment and a leap of faith. And one such experiment upon which all others depend for success is the US Patent System. Why Has America Stopped Inventing? takes a close look at why this experiment appears to be failing, and why America has all but stopped inventing. Our belief that we are the most innovative people on earth is mistaken. Statistics show that today we invent less than half of what our counterparts did a hundred and fifty years ago. Where are the groundbreaking inventions comparable to those from the Industrial Revolution? Why have we been using the same mode of transportation for over a century? Why are we giving trillions to hostile foreign nations for imported oil when we have the talent to solve the nation's energy crisis? We don't have these desperately needed technologies because regular Americans have given up on inventing. This book explains why, comparing the experiences of America's most successful nineteenth-century inventors with those of today and sharing fascinating historical anecdotes: Jefferson refusing to waste any more weekends examining patent applications Whitney being robbed of his fortune while the South's wealth exploded the patent models that kept British soldiers from burning Washington's last-standing federal building the formation of Lincoln's cabinet and Selden crippling the entire US auto industry. It also tells the story of the Wright brothers' airplane monopoly, the Colt revolver's role in the Mexican American War, the Sewing Machine wars, the last six months of Daniel Webster's life, and the fraudulently created Bell Empire.

Wake Up, America! Louis Bell, 1906 **Earthquake and the Invention of America** Anna Brickhouse, 2024-09-17 Earthquake and the Invention of America The Making of Elsewhere Catastrophe explores the role of earthquakes in shaping the deep timeframes and multi-hemispheric geographies of American literary history Spanning the ancient world to the futuristic continents of speculative fiction the earthquake stories assembled here together reveal the emergence of a broadly Western cultural syndrome that became an acute national fantasy elsewhere catastrophe an unspoken but widely prevalent sense that catastrophe is somehow un-American Catastrophe must be elsewhere because it affirms the rightness of here where conquest according to the syndrome's logic did not happen and is not occurring The psychic investment in elsewhere catastrophe coalesced slowly across centuries varieties of it can be found in various European traditions of the modern Yet in

its most striking modes and resonances elsewhere catastrophe proves fundamental to the invention of US America which is why earthquake as the exemplary elsewhere catastrophe is the disaster that must always happen far away or be forgotten The book s eight chapters and epilogue range from Plato to the Puritans from El Inca Garcilaso de la Vega and Voltaire to Herman Melville and N K Jemisin examining along the way the seismic imaginings of Edgar Allan Poe James Fenimore Cooper Frederick Douglass Emily Dickinson and Jose Mart among other writers At the core of the book s inquiries are the earthquakes historical and imagined that act as both a recurrent eruptive force and a provocation for disparate modes of critical engagement with the long and catastrophic history of the Americas
