Yearbook On Space Policy 2008 2009 Yearbook On Space Policy 2008 2009:

Yearbook on Space Policy 2008/2009 Kai-Uwe Schrogl, Blandina Baranes, Christophe Venet, Wolfgang Rathgeber, 2011-02-02 The Yearbook on Space Policy aims to be the reference publication analysing space policy developments Each year it presents issues and trends in space policy and the space sector as a whole Its scope is global and its perspective is European The Yearbook also links space policy with other policy areas It highlights specific events and issues and provides useful insights data and information on space activities The Yearbook on Space Policy is edited by the European Space Policy Institute ESPI based in Vienna Austria It combines in house research and contributions of members of the European Space Policy Research and Academic Network ESPRAN coordinated by ESPI The Yearbook is designed for government decision makers and agencies industry professionals as well as the service sectors researchers and scientists and the interested public *European Space Policy* Thomas Hoerber, Paul Stephenson, 2015-09-25 Space policy is at the cutting edge of current EU policy developments and is a fascinating object of study involving multiple and diverse actors It is also an original and contemporary lens for studying European policy making This book explores advances in European space policy and their significance for European integration Using a framing methodology it addresses central questions in European studies in order to form an interdisciplinary bridge between current research in space policy and contemporary European political studies It assesses the interests of EU institutions in space and how these institutions perceive space policy Furthermore it demonstrates that space is a cross cutting policy domain affecting a diverse range of EU policy fields such as security transport and migration and underpinning the 21st century European and global economy In doing so this volume firmly locates space policy in the field of European Studies This innovative volume will be of key interest to students and scholars of a range of policy areas including common foreign and security policy technology policy transport policy internal market policies environmental policy development aid and disaster risk management as well as the EU institutions **Space Strategy in the 21st Century** Eligar Sadeh, 2013-02-11 This book offers an overview of space strategy in the 21st century The purpose of space strategy is to coordinate integrate and prioritize space activities across security commercial and civil sectors Without strategy space activities continue to provide value but it becomes difficult to identify and execute long term programs and projects and to optimize the use of space for security economic civil and environmental ends Strategy is essential for all these ends since dependence on and use of space is accelerating globally and space is integrated in the fabric of activities across all sectors and uses This volume identifies a number of areas of concern pertinent to the development of national space strategy including intellectual foundations political challenges international cooperation and space governance space assurance and political organizational and management aspects specific to security space strategy The contributing authors expand their focus beyond that of the United States and explore and analyse the international developments and implications of national space strategies of Russia China Europe Japan India Israel and Brazil This book

will be of much interest to students of space power and politics strategic studies foreign policy and International Relations in general

Regulating a Revolution Neta Palkovitz, 2019-11-22 In recent years small satellites have taken the space industry by storm Their short development times low cost significant miniaturisation standardisation and commercial availability have truly revolutionised the space industry They make space accessible to non professionals and on an individual level This book is the first to explore the status of small satellites vis vis international space law examining which provisions are applicable and what kind of legal issues the traditional definitions pose when considering novel small satellites activities The author sheds clear light on current regulatory challenges raised by the commercial and research activities of small satellites as well as by governmental and military applications She covers the legal implications in such aspects of the small satellites revolution as the following liability for damage caused or suffered by small satellites State responsibility for non governmental space activities employing small satellites registration of space objects launch practices online availability of components and launch slots the connection between small satellites and space debris the role of space insurance and legal challenges posed by large constellations of small satellites In the course of the description and analysis the author provides case studies showing how these challenges can be dealt with offers deeply informed insights on emerging trends and future developments and indicates which jurisdictions may be most favourable to small satellite activities The small satellites market is booming and both States and industry are in need of guidance relating to the regulatory situation Accordingly this book will help stakeholders in the industry universities business entities and individuals as well as non commercial entities engaged in small satellites operations understand what kind of regulatory challenges exist and what should be done in order to solve these challenges in the future

The Fair and Responsible Use of Space Wolfgang Rathgeber, Kai-Uwe Schrogl, Ray A. Williamson, 2011-02-03 As space applications become central to modern interaction more and more entities are becoming involved in space activities Consequently strategies to establish the coordinated ethically justifiable and sustainable conduct of space activities have to be found Such an endeavour requires addressing current questions regarding the use of space dealing with fair rules in orbit and discussing the way towards achieving truly global engagement on space security issues The book outlines the current situation and identifies key challenges from the policy perspective Taking this one step further it also formulates principles and recommendations for global action Nineteen eminent personalities from the space sector have united for this project which is based on a conference organised at the European Space Policy Institute ESPI in November 2008 in Vienna

Space Insurance: International Legal Aspects Katarzyna Malinowska, 2017-03-15 Insurance related to outer space activities has been around since the 1960s but has become vastly more significant with the increased commercial use of satellites This book focuses on the legal aspects of space insurance in the contractual context analysing space risk as well as the insurance terms used on the market It offers the first in depth coverage both practical and theoretical of space insurance from an international law perspective Attending throughout to the important and problematic

distinction between the space segment upstream and ground segment downstream in space law this book deals comprehensively with such issues and topics as the following the main hazards relating to space activities the impact of new space technologies on the level of risk and insurance the differing types of risks attributable to various entities in the context of insurable interest aspects of the space risk allocation regimes and risk assessment the impact of the five space treaties the Outer Space Treaty the Liability Convention the Rescue Agreement the Registration Convention and the Moon Agreement on the subject and scope of insurance coverage the advent of suborbital flight commercial human space flight and space tourism in the context of emerging insurance risks the problem of space debris contractual aspects of space activities affecting the space insurance risks basic notions such as outer space space object in the context of space activities and related insurance coverage basic insurance principles and their operation in the space insurance and the adjustment of losses and the settlement of disputes in space insurance The author emphasises the need to understand the various insurance risks facing particular types of commercial space activities including pre launch launch transportation spaceflight satellite communications satellite navigation satellite remote sensing and space station operation Satellites are increasingly a vital part of many daily activities of contemporary society and the Earth's orbit is becoming ever more crowded heightening the risks of collision damage and claims This thoroughly researched book will therefore be extremely useful to lawyers policymakers and academics tasked with defining the scope of insurance coverage that accurately mirrors technological contractual and legal reality Its practical aspect will be of extraordinary value to insurance lawyers underwriters and brokers
