Children's Sensory and Behavioral Problems Linda Garofallou, Louisa Silva, 2023-10-11 *An At Home Guide to Children's Sensory and Behavioral Problems* gives a new perspective on sensory and behavior problems one that sees those behaviors

as stemming from a child's immature sensory nervous system and regulation difficulties. This book offers an effective at-home intervention: the Qigong Sensory Treatment, that enlists a parent's attuned touch to address often overlooked sensory issues that underlie problem behaviors and works to organize those sensory experiences to foster connection and the capacity for self-regulation. It introduces the reader to a new and clinically useful model to understand sensory development: the Early Childhood Self-regulatory Milestones, which are critical to the emotional and behavioral health and regulation for all children. With clear step-by-step instructions, diagrams, and links to online instructional videos, it teaches parents how to successfully implement the daily QST hands-on routine. Unique to the treatment model is how it guides and focuses parents to easily recognize, interpret, and respond to their child's shifting non-verbal body and behavioral responses and cues. An extensive workbook section navigates parents through a year-long process of learning and implementing QST at home. Weekly letters include those written by the authors' parents who share their own personal experiences with the routine and by QST Master Trainers who offer their years of experience and helpful tips. The 52 letters are timed to anticipate and answer typical questions or stumbling blocks that parents commonly encounter at key points, guiding them to success with their child's sensory and behavior difficulties while making for happier and less stressful times with their child. This guide will be indispensable to parents and clinicians looking to understand and more effectively work with their child's developmental difficulties.

Social Entrepreneurship and Innovation Ken Banks, 2016-03-03 Social innovation and social entrepreneurship look for creative and affordable solutions to specific societal problems. Fuelled by the spread of the internet and the ubiquity of mobile phones, there are more people working to solve pressing social and environmental problems in the world today than ever before. *Social Entrepreneurship and Innovation* presents the journeys of pioneering and often accidental social innovators who, faced with a problem, used their courage, tenacity, and creative thinking to find a solution. Using their own words to reflect upon their experiences, these cases do not gloss over the setbacks and the dead ends social entrepreneurs can face. Instead, readers will gain a realistic insight into the challenges and an engaging look at the problem-solving mindset needed to overcome them. From a life-saving project to bring solar-powered lighting to midwives in Nigeria to a news dissemination service that's grown from small beginnings to have a global impact, each case study draws out the lessons learnt by the innovators, providing guidance and advice for those looking to follow in their footsteps. *Social Entrepreneurship and Innovation* is an invaluable resource for social entrepreneurs and innovators looking for new ideas and insight into what really works and what doesn't.

Perceptual Content William G. Lycan, 2024 *Perceptual Content* is the first book to discuss and compare the representational characters of all the traditional five senses. It has three main topics or concerns: the diversity of the senses, the way the contents of sensory representations are layered, and aspect perception (perceiving as

Young Children's Emotional Experiences Jane Murray, Ioanna Palaologou, 2020-06-29 Based on a rich seam of research evidence, this book leverages value in engaging with scientific enquiry to further understanding of young children's emotional

experiences Early childhood development has featured increasingly prominently on international policymakers agenda in recent years Yet whilst policy foregrounds economic imperatives including academic attainment school readiness and time bound outcomes similar attention has not been afforded to the potential value of nourishing affective engagements that may secure emotional capital for infants and young children This collection from the field of early childhood is therefore timely Its chapters are based on empirical evidence derived from contemporary scientific studies and address challenges and opportunities inherent in young children s emotional experiences in diverse twenty first century early childhood education and care contexts The authors provoke debate discussion and critique and they ask significant questions of the policymakers practitioners and carers who may influence young children s lives and their emotional experiences The findings that are presented in the chapters indicate overall that a test based approach may detract from young children s emotional development as well as the positive affective experiences in early childhood which have potential to provide an important foundation for a fulfilling life This book was originally published as a special issue of Early Child Development and Care
