Vichy France and the Resistance Roderick Kedward, Roger Austin, 2021-11-21 This book first published in 1985 examines various aspects of the intellectual achievements of writers and artists in the Vichy period. A strong emphasis on the ambiguity of much of their work emerges from the research. It goes a long way in answering the question of what it was like living under the fascist Vichy regime and what the collaborators and resistance thought about their purpose and patriotism.

The Light-Green Society Michael Bess, 2003-11-15 The accelerating interpenetration of nature and culture is the hallmark of the new light green social order that has emerged in postwar France argues Michael Bess in this penetrating new history. On one hand a preoccupation with natural qualities and equilibrium has increasingly infused France's economic and cultural life. On the other human activities have laid an ever more potent and pervasive touch on the

environment whether through the intrusion of agriculture industry and urban growth or through the much subtler and more well intentioned efforts of ecological management The Light Green Society limns sharply these trends over the last fifty years The rise of environmentalism in the 1960s stemmed from a fervent desire to save wild nature nature conceived as a qualitatively distinct domain wholly separate from human designs and endeavors And yet Bess shows after forty years of environmentalist agitation much of it remarkably successful in achieving its aims the old conception of nature as a separate sphere has become largely untenable In the light green society where ecology and technological modernity continually flow together a new hybrid vision of intermingled nature culture has increasingly taken its place **Les Houillères de la**
