Michael Hall,Dieter Müller,2018-04-17 Second homes have become an increasingly important component of both tourism and housing studies They can directly and indirectly contribute a significant number of domestic and international visitors to destinations and may be part of longer term retirement lifestyle and amenity migration that can have significant economic and social effects on communities and destination development This volume offers an overview of different disciplinary and methodological approaches to second homes while simultaneously providing a broad geographical reach Divided into four parts exploring governance development community and mobile second homes the book provides a contemporary account of the major issues in an area of growing international interest This timely handbook covers a wide range of dimensions from planning to the role of second homes in development and the management of their impact The international and cross disciplinary nature of the contributions will be of interest to numerous academic fields in the social sciences as well as urban and regional planners *Real Estate and Destination Development in Tourism* Peter Keller,Thomas Bieger,2008 Real estate is one of the driving factors of destination development In some destinations value added from the construction and sales of second homes even surpasses value added created in the traditional tourism sector This book edited by Peter Keller and Thomas Bieger contributes to the deeper understanding of the dynamics of real estate development in destinations the role structure and development of destination real estate markets evolving real estate business models in destinations the socio economic impacts of real estate on destinations optimizing destination capacity through real estate management strategies and public private governance approaches for managing holiday property market development The book provides a unique database for the important topic of real estate and destination development in tourism with contributions from 43 researchers and 18 case studies Affluence, Mobility and Second Home Ownership Chris Paris,2010-10-04 Despite the current recession the frequency of second home ownership is still surprisingly high throughout the western world While the UK and Ireland previously had lower occurrences of multiple dwellings compared to the rest of Europe they are quickly catching up with a current surge in the ownership of second homes The recent MP expenses scandal in the UK has also drawn attention to the prevalence of second homes or more within the middle classes and the fact that the concept is becoming increasingly popular Chris Paris uses this text to address the reasons behind why

second homes are becoming more popular both within the usual domicile of the individuals and in international locations. The socioeconomic factors and historical contexts of homes in cultures across the world are fundamental to explaining the choices in transnational home ownership and Paris case studies and comparisons between additional homes in Europe, Australia, America and Asia expand upon the motivation for people to own a second home. Affluence, Mobility and Second Home Ownership draws together debates on gentrification, globalisation, consumerism, environmental factors and investment to provide a balanced look at the pros and cons of second home ownership and what implications it has for the future. An ideal text for students studying geography, urbanism and planning, this book is also of interest to individuals interested in the changing ways in which we make choices on our places of residence.

Second Homes and Climate Change Bailey Ashton Adie, C. Michael Hall, 2023-07-17 This book is the first to address the important interrelationship between second homes and climate change, which has become an increasingly relevant issue for many regions around the world. Second homes are often a key source of tourist visitation as well as economic benefit for their host communities. The chapters provide an array of international case studies and climate change impacts, including the changing biocultural landscapes in Italy, hazard risks in the mountains of Poland and the shifting media discussion on second homes and climate change in Finland. Topics covered focus on issues around planning and governance in second home locations, adaptation and mitigation measures implemented by second home owners and the influence of second home owners' place attachment in relation to second home impacts. It introduces the overall topic of second homes and climate change while also laying the groundwork for future work in this burgeoning area of research. This book will be of significant interest to upper level undergraduates, graduate students and academics in the fields of geography, tourism, planning, housing studies, regional development, environmental management and disaster management. It would also be of use for professionals who engage with second home communities, particularly planners, government officials and environmental officers.

Urban Tourism in the Developing World Gustav Visser, 2017-07-28 Over the past decade the field of urban tourism has consolidated with the appearance of several books that concentrate upon the Western European and North American experience. Recently the scope and range of urban research has widened considerably, including the welcome appearance of

studies that examine the tourism phenomenon in cities outside the Euro American heartland Despite this growing international body of debate and scholarship on tourism and cities particularly in the developed North literature that relates to the developing world as a whole and to Africa in particular remains sparse The task of Urban Tourism in the Developing World The South African Experience is to augment the current international scholarship concerning urban tourism in the developing world More especially the contributors draw attention to a range of case studies from South Africa that provide some starting points to address the uneven scholarly coverage of urban tourism the African context has received to date In addition the research material presented here seeks to contribute toward raising the South African and indeed the African profile within growing international scholarship concerning issues of urban tourism and development This collection aims to expand an emerging South African and African tourism research voice concerning the tourism and development nexus as well as to stem critiques that this body of research appears to have developed in a theoretical vacuum divorced from broader international tourism research discourses This collection of essays not only further develops an independent South African tourism perspective but also presents research that is closely tied to international urban tourism research debates In addition this analysis of urban tourism in the South African context enriches the rather Western oriented theories of urban tourism discourse through its emphasis on how urban tourism is evolving in urban Africa
