Toxic Town IBM Pollution And Industrial Risks:

Toxic Town Peter C. Little, 2014-03-14 Shows the risks of high tech pollution through a study of an IBM plant's effects on a New York town. In 1924 IBM built its first plant in Endicott, New York. Now Endicott is a contested toxic waste site. With its landscape thoroughly contaminated by carcinogens, Endicott is the subject of one of the nation's largest corporate state mitigation efforts. Yet despite the efforts of IBM and the U.S. government, Endicott residents remain skeptical that the mitigation systems employed were designed with their best interests at heart. In *Toxic Town*, Peter C. Little tracks and critically diagnoses the experiences of Endicott residents as they learn to live with high tech pollution, community transformation, scientific expertise, corporate state power, and risk mitigation technologies. By weaving together the insights of anthropology, political ecology, disaster studies, and science and technology studies, the book explores questions of theoretical and practical import for understanding the politics of risk and the ironies of technological disaster response in a time when IBM's stated mission is to build a Smarter Planet. Little critically reflects on IBM's new corporate tagline, arguing for a political ecology of corporate social and environmental responsibility and accountability that places the social and environmental politics of risk mitigation front and center. Ultimately, Little argues that we will need much more than hollow corporate taglines, claims of corporate responsibility, and attempts to mitigate high tech disasters to truly build a smarter planet.

Electronic Waste Josh Lepawsky, 2025-02-06 The United Nations has reported that the world is on track to produce over 180 billion pounds of electronic waste (e-waste) by 2030. This tidal wave of discarded electronic products, including cellular phones, laptops, and desktop computers, televisions, solar panels, major household appliances, and telecommunications

equipment poses a host of serious environmental and public health problems and challenges Electronic Waste A Reference Handbook provides readers with an illuminating survey of the myriad issues and controversies surrounding the collection treatment disposal and recycling of electric and electronic products including trends and challenges related to public health social justice and environmental protection and stewardship It also discusses ways in which increasingly electronics dependent societies and economies are factoring environmental social and public health considerations into their e waste mitigation recycling and disposal strategies The book is further supplemented with perspectives from experts in the field of electronic waste profiles of important organizations and agencies and a chronology of major events and developments

Burning Matters Peter C. Little, 2022 Global trade in electronic waste e waste has led to various waste management challenges and many regions of the Global South have suffered the toxic consequences In Burning Matters Peter C Little explores the complex cultural economic and environmental health politics of e waste work in Ghana He brings to light the lived experiences of Ghana s e waste workers as they navigate the health social and economic challenges of highly toxic e waste labor In particular Little engages the experiences of e waste workers who burn bundles of electrical cables to extract copper a practice that contaminates bodies and the urban environment and which has attracted international organizations seeking to mitigate risk and find quick tech solutions to this highly toxic e waste work A nuanced perspective on e waste burning and environmental politics in Africa at a time when global e waste generation and trade is at an all time high Burning Matters contends that e waste interventions devoid of ethnographic perspective and knowledge risk downplaying the vibrant complexities of e waste itself and the matters of social life and labor that matter most to Ghana s e waste workers

Futures after Progress Chloe Ahmann, 2024-05-14 A powerful ethnographic study of South Baltimore a place haunted by toxic pasts in its pursuit of better futures Factory fires chemical explosions and aerial pollutants have inexorably shaped South Baltimore into one of the most polluted places in the country In Futures after Progress anthropologist Chloe Ahmann explores the rise and fall of industrial lifeways on this edge of the city and the uncertainties that linger in their wake Writing from the community of Curtis Bay where two hundred years of technocratic

hubris have carried lethal costs Ahmann also follows local efforts to realize a good future after industry and the rifts competing visions opened between neighbors Examining tensions between White and Black residents environmental activists and industrial enthusiasts local elders and younger generations Ahmann shows how this community has become a battleground for competing political futures whose stakes reverberate beyond its six square miles in a present after progress has lost steam And yet as one young resident explains that s not how the story ends Rigorous and moving Futures after Progress probes the deep roots of our ecological predicament offering insight into what lies ahead for a country beset by dreams deferred and a planet on the precipice of change **IBM** James W. Cortada, 2019-03-05 A history of one of the most influential American companies of the last century For decades IBM shaped the way the world did business IBM products were in every large organization and IBM corporate culture established a management style that was imitated by companies around the globe It was Big Blue an icon And yet over the years IBM has gone through both failure and success surviving flatlining revenue and forced reinvention The company almost went out of business in the early 1990s then came back strong with new business strategies and an emphasis on artificial intelligence In this authoritative monumental history James Cortada tells the story of one of the most influential American companies of the last century Cortada a historian who worked at IBM for many years describes IBM s technology breakthroughs including the development of the punch card used for automatic tabulation in the 1890 census the calculation and printing of the first Social Security checks in the 1930s the introduction of the PC to a mass audience in the 1980s and the company s shift in focus from hardware to software He discusses IBM s business culture and its orientation toward employees and customers its global expansion regulatory and legal issues including antitrust litigation and the track records of its CEOs The secret to IBM s unequalled longevity in the information technology market Cortada shows is its capacity to adapt to changing circumstances and technologies

Resigned Activism, revised edition Anna Lora-Wainwright, 2021-05-25 An examination of the daily grind of living with pollution in rural China and of the varying forms of activism that develop in response Residents of rapidly industrializing rural areas in China live with pollution every day Villagers drink obviously tainted water and breathe visibly dirty air afflicted by a variety of ailments from arthritis to nosebleeds that they ascribe to the effects of industrial pollution In *Resigned Activism* Anna Lora Wainwright explores the daily grind of living with pollution in rural China and the varying forms of activism that develop in response This revised edition offers expanded acknowledgment of the contributions of Lora Wainwright s collaborators in China Lora Wainwright finds that claims of health or environmental damage are politically sensitive and that efforts to seek redress are frustrated by limited access to scientific evidence growing socioeconomic inequalities and complex local realities Villagers feeling powerless often come to accept pollution as part of the environment their activism is tempered by their resignation Drawing on fieldwork done with teams of collaborators Lora Wainwright offers three case studies of resigned activism in rural China examining the experiences of villagers who live with the effects of

phosphorous mining and fertilizer production lead and zinc mining and electronic waste processing The book also includes extended summaries of the in depth research carried out by Ajiang Chen and his team in some of China s cancer villages village sized clusters of high cancer incidence These cases make clear the staggering human costs of development and the deeply uneven distribution of costs and benefits that underlie China s economic power *Critical Zones of Technopower and Global Political Ecology* Peter C. Little,2023-09-05 This book explores technology and the global tech industry in relation to social health economic and environmental relations and politics Peter C Little argues that the power and influence of electronics and Big Tech from the proliferation of digital platforms to the expansion of global electronic waste streams is a political ecological problem that impacts communities and lives in both the Global North and South From intense resource extraction industrial pollution and surging health and economic inequalities to data driven surveillance platform economy proliferation and intrusion and Silicon Valley corporate power Little argues that the political ecology of tech matters now more than ever Based on a mixture of engagements with tech criticism ethnographic case studies and critical analysis and development of guiding concepts ranging from technocapital to technoprecarious political ecology the book exposes and interrogates the underlying toxicity precarity and planetary politics of global tech *Critical Zones of Technopower and Global Political Ecology* also tracks justice struggles that confront technopower including just tech forms of social action that further reinforce the importance of a global political ecology of technocapitalism in the digital age *Reckoning with Harm* Amelia M. Fiske,2023-10-17 An ethnography of the Ecuadorian Amazon that demonstrates the need for a relational place based contingent understanding of harm and toxicity *Reckoning with Harm* is a striking ethnographic analysis of the harm resulting from oil extraction Covering fifty years of settler colonization and industrial transformation of the Ecuadorian Amazon Amelia Fiske interrogates the relations of harm She moves between forest courtrooms and oily waste pits farms and toxic tours to explore both the ways in which harm from oil is entangled with daily life and the tensions surrounding efforts to verify and redress it in practice Attempts to address harm from the oil industry in Ecuador have been consistently confounded by narrow technocratic understandings of evidence toxicity and responsibility Building on collaborators work to contest state and oil company insistence that harm is controlled and principally chemical in nature Fiske shows that it is necessary to refigure harm as relational in order to reckon with unremediated contamination of the past while pushing for broad forms of accountability in the present She theorizes that harm is both a relationship and an animating feature of relationships in this place a contingent understanding that is needed to contemplate what comes next when living in a toxic world *Toxic Heritage* Elizabeth Kryder-Reid,Sarah May,2023-07-21 *Toxic Heritage* addresses the heritage value of contamination and toxic sites and provides the first in depth examination of toxic heritage as a global issue Bringing together case studies visual essays and substantive chapters written by leading scholars from around the world the volume provides a critical framing of the globally expanding field of toxic heritage Authors from a variety of disciplinary perspectives and methodologies examine

toxic heritage as both a material phenomenon and a concept Organized into five thematic sections the book explores the meaning and significance of toxic heritage politics narratives affected communities and activist approaches and interventions It identifies critical issues and highlights areas of emerging research on the intersections of environmental harm with formal and informal memory practices while also highlighting the resilience advocacy and creativity of communities scholars and heritage professionals in responding to the current environmental crises Toxic Heritage is useful and relevant to scholars and students working across a range of disciplines including heritage studies environmental science archaeology anthropology and geography Just Code Associate Director Charles Babbage Institute and Faculty Jeffrey R Yost, Jeffrey R. Yost, Gerardo Con Díaz, 2025-11-25 This book examines how IT giants use software algorithms and systems to reinforce global social inequalities It offers scholars and students a broad analysis of the power structures embedded in digital technologies and serves as an accessible resource for introducing the diverse methods and perspectives needed to understand these issues

Staging the Promises Deana Jovanović, 2025-01-15 Staging the Promises reveals how inhabitants of Bor a Serbian copper processing and mining town that lived through prosperous Yugoslav times and a post socialist decline were the audience theatrically performed promises of aspirational futures Deana Jovanovi chronicles the efforts of the copper processing company and the town s authorities to theatrically perform promises of better economic urban environmental infrastructural and post industrial futures Her book asks What impact did the staging of promises have on the residents What temporal material and political effects did these performances generate How did they shape the citizens futures and their present Jovanovi offers many ethnographic examples of ambivalence in people s orientation to their futures while residents balanced hope with despair disillusionment and dismay Staging the Promises highlights how the performances shaped the

present and how in a Gramscian twist they sustained hope alongside power dynamics that residents often criticized Staging the Promises assesses the performative ways through which contemporary capitalist futures are remade For Jovanovi Bor represents a site that reflects a current global trend staging the promises of enhanced futures today play a significant role in contemporary populist politics Through them she argues distant futures become gradually withdrawn from people s horizons

The Routledge International Handbook of Violence Studies Walter S. DeKeseredy, Callie Marie Rennison, Amanda K. Hall-Sanchez, 2018-10-30 Violence is a serious public health problem The number of violent deaths tells only part of the story and many more survive violence and are left with permanent physical and emotional scars Violence also erodes communities by reducing productivity decreasing property values and disrupting social services In recent years scholars have broadened their definitions of violence beyond the realm of interpersonal harms such as murder armed robbery and male to female physical and sexual assaults in intimate relationships to include behaviors often ignored by the criminal justice system such as human rights violations racism psychological abuse state terrorism environmental violations and war Guided by this broader definition of violence this handbook offers state of the art research in the field and brings together international experts to discuss empirical theoretical and policy issues

[The Routledge Handbook of Anthropology and the City](#) Setha Low, 2018-10-03 The Routledge Handbook of Anthropology and the City provides a comprehensive study of current and future urban issues on a global and local scale. Premised on an engaged approach to urban anthropology, the volume adopts a thematic approach that covers a wide range of modern urban issues with a particular focus on those of high public interest. Topics covered include security, displacement, social justice, privatisation, sustainability and preservation. Offering valuable insight into how anthropologists investigate, make sense of and then address a variety of urban issues, each chapter covers key theoretical and methodological concerns alongside rich ethnographic case study material. The volume is an essential reference for students and researchers in urban anthropology as well as of interest for those in related disciplines such as urban studies, sociology and geography.

The River Is in Us Elizabeth Hoover, 2017-11-01 Winner of the Labriola Center American Indian National Book Award 2017. Mohawk midwife Katsi Cook lives in Akwesasne, an indigenous community in upstate New York that is downwind and downstream from three Superfund sites. For years she witnessed elevated rates of miscarriages, birth defects and cancer in her town, ultimately drawing connections between environmental contamination and these maladies. When she brought her findings to environmental health researchers, Cook sparked the United States' first large-scale community-based participatory research project. In *The River Is in Us*, author Elizabeth Hoover takes us deep into this remarkable community that has partnered with scientists and developed grassroots programs to fight the contamination of its lands and reclaim its health and culture. Through in-depth research into archives, newspapers and public meetings as well as numerous interviews with community members and scientists, Hoover shows the exact efforts taken by Akwesasne's massive research project and the grassroots efforts to preserve the Native culture and lands. She also documents how contaminants have altered tribal life, including changes to the Mohawk fishing culture and the rise of diabetes in Akwesasne. Featuring community members such as farmers, health care providers, area leaders and environmental specialists while rigorously evaluating the efficacy of tribal efforts to preserve its culture and protect its health, *The River Is in Us* offers important lessons for improving environmental health research and health care, plus detailed insights into the struggles and methods of indigenous groups. This moving, uplifting book is an essential read for anyone interested in Native Americans, social justice and the pollutants contaminating our food, water and bodies.
