This test is only necessary if:

- Tie rod end lock is loose by more than 2 degrees when the wheels turn the steering center point.
- One side has contact between tire and a front axle component or body at full lock.
- Turning circles left/right differ.

The distance between front axle components and tires (arrow) must be the same at full lock (full turn left/right). See Fig. 10. If the distances are unequal, this can be corrected by turning left/right tie rod.

working on a vehicle Take particular care with safety related systems like the brakes and steering and seek professional
advice if in any doubt Never work under a vehicle unless it is properly supported a single jack is not enough Take care with
power tools also regard as potentially harmful fuel lubricants solvents and sealers which should always be and kept in
labelled sealed containers With care and common sense the practical owner can make an excellent job of maintenance and
overhaul The benefits include money saved and the satisfaction of work well done You will be adding to your knowledge too
knowing more about the vehicle you own will help you to make logical decisions about what needs to be done even if it does
