Shayler, Colin Burgess, 2017-06-19 Resulting from the authors deep research into these two pre Shuttle astronaut groups many intriguing and untold stories behind the selection process are revealed in the book The often extraordinary backgrounds and personal ambitions of these skilled pilots chosen to continue NASA's exploration and knowledge of the space frontier are also examined In April 1966 NASA selected 19 pilot astronauts whose training was specifically targeted to the Apollo lunar landing missions and the Earth orbiting Skylab space station Three years later following the sudden cancellation of the USAF's highly classified Manned Orbiting Laboratory MOL project seven military astronauts were also co-opted into NASA's space program This book represents the final chapter in the story of American astronaut selections prior to the era of the Space Shuttle Through personal interviews and original NASA documentation readers will also gain a true insight into a remarkable age of space travel as it unfolded in the late 1960s and the men who flew those historic missions

An Encyclopedia of American Women at War Lisa . Tendrich Frank, 2013-01-17 A sweeping review of the role of women within the American military from the colonial period to the present day In America the achievements defeats and glory of war are traditionally ascribed to men Women however have been an integral part of our country's military history from the very beginning This unprecedented encyclopedia explores the accomplishments and actions of the fairer sex in the various conflicts in which the United States has fought An Encyclopedia of American Women at War From the Home Front to the Battlefields contains entries on all of the major themes organizations wars and biographies related to the history of women and the American military The book traces the evolution of their roles as leaders spies soldiers and

nurses and illustrates women's participation in actions on the ground as well as in making the key decisions of developing conflicts. From the colonial conflicts with European powers to the current War on Terror, coverage is comprehensive with material organized in an easy-to-use A-Z ready reference format. *Who's who in Naval History* Alastair Wilson, Joseph F. Callo, 2004. This A-Z guide covers the life and careers of over 600 key figures in naval history from the sixteenth century to the present day. Featuring influential figures from the UK, US and around the world from the great admirals such as Nelson to minesweepers, designers and administrators, it is an invaluable guide to those who have shaped naval history. *The Sun, Planets, and Dwarf Planets*, *NASA's First Space Shuttle Astronaut Selection* David J. Shayler, Colin Burgess, 2020-07-10. Unofficially they called themselves the TFNG or the Thirty Five New Guys. Officially they were NASA's Group 8 astronauts selected in January 1978 to train for orbital missions aboard the Space Shuttle. Prior to this time, only pilots or scientists trained as pilots had been assigned to fly on America's spacecraft, but with the advent of the innovative winged spacecraft, the door was finally opened to non-pilots, including women and minorities. In all, 15 of those selected were categorised as Pilot Astronauts, while the other 20 would train under the new designation of Mission Specialist. Altogether, the Group 8 astronauts would be launched on a total of 103 space missions, some flying only once while others flew into orbit as many as five times. Sadly, four of their number would perish in the Challenger tragedy in January 1986. In their latest collaborative effort, the authors bring to life the amazing story behind the selection of the first group of Space Shuttle astronauts, examining their varied backgrounds and many accomplishments in a fresh and accessible way through deep research and revealing interviews. Throughout its remarkable 30-year history as the workhorse of NASA's human spaceflight exploration, twice halted through tragedy, the Shuttle fleet performed with magnificence. So too did these 35 men and women swept up in the dynamic thrust and ongoing development of America's Space Shuttle program. This book on the Group 8 Astronauts, the TFNGs, is an excellent summation of the individuals first selected for the new Space Shuttle Program. It provides insight into what it took to first get the Space Shuttle flying. For any space enthusiast, it is a must-read. Robert L. Crippen, PLT on STS-1. As a reader, I had many moments where long-lost memories of the triumph and tragedy of the space shuttle program were brilliantly reawakened at the turn of a page. Loved it. This is a must-have book for every space enthusiast's library. TFNG Mission Specialist Astronaut Richard Mike Mullane, author of *Riding Rockets: The Outrageous Tales of a Space Shuttle Astronaut*. Many of the anecdotes in the book brought back memories of challenges, opportunities, and a team of men and women who were committed not just to the space program but to one another. I've gone back to it several times as a reference source. TFNG Steve Hawley, 5-time Space Shuttle Mission Specialist Astronaut. The TFNG book is incredible and amazingly thorough. The detail in the book is awesome. It is my go-to book for any of the details I've forgotten. TFNG Dr. Rhea Seddon, 3-time Space Shuttle Mission Specialist Astronaut. I can't believe how detailed and complete it is. FANTASTIC work. TFNG Robert L. Hoot Gibson, 5-time Space Shuttle Pilot Commander and former Chief of the NASA Astronaut Office. **Explorers and**
