agency Greece offers a most interesting case study as much in analytical as in empirical terms Never before did a euro area member require three macroeconomic adjustment programmes under stringent policy conditionality and external supervision This experience shattered past certainties and reshaped the political landscape A decade later Greece was starting to recover and received international recognition for its reform efforts However the COVID 19 pandemic provided an external shock that risks derailing such achievements The volume includes chapters by academics and researchers from different professional backgrounds history economics public law political science public administration and political economy Their diverse experience and viewpoints contribute to multidimensional analyses in subject areas such as Greece s constitutional structure public sector reforms labour market developments China s expanding investment footprint and product market reforms

Embattled Europe Konrad H. Jarausch, 2021-09-28 Peaceful Revolution Post Communist Transformation European Integration Sovereign Debt Debacle Migration Wave Brexit Self Destruction Economic Competitiveness Restructured Welfare State Protected Environment Defense Disagreements Populist Backlash Global Role Remaking European Political Economies Dennis Zagermann, 2023-12-18 From 2009 to 2015 the euro area of the European Union EU experienced an existential socio economic crisis To secure its institutional integrity the EU designed several new institutions to support member states in need but also to facilitate socio economic adjustments The European Stability Mechanism ESM lies at the centre of this strategy it provides financial assistance to member states in severe crisis on an intergovernmental basis while demanding compliance with adjustment programs from program countries Based on a comparative political economic analysis Remaking European Political Economies shows that the EU s financial assistance programs focused strongly on reforms that led to a partial convergence of program countries based on market based economic governance and reduced governmental influence in the economy The book draws on extensive empirically based case studies of two prominent euro area countries in crisis Greece and Ireland Dennis Zagermann illustrates that socio economic models in the euro area can experience institutional change if exposed to severe crises in combination with financial assistance programs that include policy conditionality In doing so his book sheds light on the central question of whether there is a possible convergence of European models of capitalism a question that has been at the centre of comparative political economic debates for over thirty years

Pissarides, Dimitri Vayanos, Nikolaos Vettas, 2017-10-13 Prominent economists present detailed analyses of the conditions that made Greece vulnerable to economic crisis and offer policy recommendations for comprehensive and radical change More than eight years after the global financial crisis began the economy of Greece shows little sign of recovery and its position in the eurozone seems tenuous Between 2008 and 2014 incomes in Greece shrank by more than 25 percent homes lost more than a third of their value and the unemployment rate reached 27 percent Most articles on Greece in the media focus on the effects of austerity repayment of its debt and its future in the eurozone In *Beyond Austerity* Reforming the Greek Economy leading Greek economists from institutions both within and outside Greece take a broader and deeper view of the Greek crisis examining the pathologies that made Greece vulnerable to the crisis and the implications for the entire eurozone Each chapter takes on a specific policy area examining it in terms of Greece's economic reality and offering possible directions for policy The topics range from macroeconomic issues to markets and their regulation to finance to the public sector Individual chapters address the costs and benefits of participation in the eurozone Greece's international competitiveness taxation pensions the labor market privatization product markets finance education healthcare corruption the justice system and public administration The contributors argue that Greek institutions require a deep overhaul rather than quick fixes to enable long term growth and prosperity

Crisis in Greece Peter Siani-Davies, Mary Siani-Davies, 2017 Few countries experienced the period of turbulence surrounding the global financial crisis as intensely as Greece The country topped the global news agenda as images of mass protests in Athens jostled for space with reports of torturous negotiations between political leaders struggling to agree support packages Dramatic headlines proclaimed not only Greek bankruptcy and a possible exit from the euro but the collapse of the single currency itself This book offers a comprehensive and authoritative account of the lengthy crisis that beset Greece and the wider Eurozone Written for the general reader it explores the passage of events from different perspectives as it probes the story behind the headlines to reveal the full complexity of the crisis Were its causes to be found in the prevailing international financial environment or in the economic and political system which evolved in Greece since the early 1970s Did the choices made by both domestic and international actors such as the IMF and the EU exacerbate the crisis Most importantly what has been the impact of the crisis on the daily lives of the country's inhabitants

Economics and Politics Revisited Timothy Hellwig, Matthew Singer, 2023-07-18 What drives government popularity For decades scholars journalists and political pundits alike have converged on a single answer the economy A rising economy lifts the popularity of the government and if the economy's fortunes turn south so too does that of the government This conventional wisdom informs politicians decisions as well as the scholarly commentary on parties and elections Yet the conditions that underlie this model have changed in many countries as globalization has shifted control away from national policymakers as non economic cultural issues have risen in importance and as our politics have become more polarized At the same time since the Great Recession in 2008 persistent economic volatility has kept the economy on the agenda What then fuels government popularity in our current

volatile environment Are political fortunes tied to economic stability as in the past Or has the economy popularity link the popularity function been severed by a host of new and less predictable factors in post industrial societies To answer these questions Economics and Politics Revisited uses data from the Executive Approval Project EAP a cross nationally comparable data on leader popularity to model the fundamental dynamics of government support in advanced industrial democracies Eleven country specific chapters each written by experts in the politics of the country examine the role of economic performance in generating leader support in each country In all cases chapter authors show that the economy matters for popularity However the economy popularity link is stronger in some countries than others Further chapters leverage EAP series to highlight change over time Pooled analyses extend these findings highlighting how the public s responses to the economy are reduced when political campaigns shift to non economic issues and when parties are polarization on non economic issues Collectively the volume highlights how evolving issue agendas are changing the nature of political accountability in advanced industrialized democracies While the economy remains important the book calls on students of political accountability to give greater attention to the role of non economic issues Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterized by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Nicole Bolleyer Chair of Comparative Political Science Geschwister Scholl Institut LMU Munich and Jonathan Slapin Professor of Political Institutions and European Politics Department of Political Science University of Zurich
