China Into Its Second Rise James Chieh Hsiung, 2012 This book seeks to demystify the re-ascendancy of China as a civilization state China's politics and society are examined in the light of its living civilization which is the only one of the ancient civilizations that has survived to this day The book also contrasts China's development with that of the West and Japan By combining the impact of internal political and socio-economic developments in China and its external relations from the silk routes the tribute system to the modern day it unravels the existing myths puzzles and paradoxes surrounding China and questions the adequacy of most of the Western political theories such as realism in international relations in an attempt to explicate China's re-emergence as a world power It attempts to tackle squarely the question Is China a threat to world order The book traces the rationale for contemporary developments in China to the roots in the country's tradition as well as foreign influences and seeks to unravel the puzzle

about the unique China Model that defies conventional thinking in political economy with its sustained and incredibly rapid economic growth over the past three decades This study on China's second rise provides a broad background that includes a meaningful scrutiny of the country's behavior during its first rise 1973-1820 and beyond In comparing China's ongoing second rise with its first ascent the book not only refocuses on and reinterprets the example set during its first rise but also takes into account the crucial lessons it learned during its century in eclipse in the interregnum for the effects they have on the country's current orientation and behavior The book follows an interdisciplinary approach combining the cultural intellectual historical normative ideological and social scientific perspectives to lend a more solid grasp of the present day China It ends with an educated speculation based on the foregoing analyses on the contours of a Pax Sinica that is likely to result from the impact of China's second rise as a world power

IMF Staff papers

International Monetary Fund. Research Dept., 1997-01-01 This paper argues that an important group of labor market policies are complementary in the sense that the effect of each policy is greater when implemented in conjunction with the other policies than in isolation This may explain why the diverse piecemeal labor market reforms in many European countries in recent years have had so little success in reducing unemployment What is required instead is deeper labor market reforms across a broader range of complementary policies and institutions To be politically feasible these reforms must be combined with measures to address distributional issues

World Economic Outlook

Japanese Phoenix: The Long Road to Economic Revival

Richard Katz, 2020-07-24 Japan will recover and its economic achievements will once again earn the world's admiration with sustained annual growth of three percent perhaps more well within reach This is the confident forecast that begins Japanese Phoenix The Long Road to Economic Revival by the author of Japan The System That Soured which several years ago accurately predicted Japan's current travails at a time when others were prematurely pronouncing full recovery Katz warns however that there is bad news to go with the good So deep seated are Japan's dysfunctions that even if it did everything right today it would take at least five years for truly vibrant growth to take hold But Japan will not do everything right Opposition to reform is deep

seated and a myriad of vested interests and millions of jobs are at stake Still he notes there is little doubt that reform will succeed Japanese Phoenix tells the story of the struggle between the forces of reform and the forces of resistance It dissects Prime Minister Koizumi s role in the process and explains why Japan is in so much trouble and what needs to be done It explore the debates among economists and gives a careful progress report on all the moves made so far in the name of reform from greater direct foreign investment to the financial Big Bang to ending one party rule by the Liberal Democratic Party Katz concludes that this is just the second round of a 15 round fight Japan is a great nation currently trapped in obsolete institutions As it has before Japan will find a way to surmount its problems and regain its forward progress
