Doctors Make Mistakes will help you better understand both disease and the realities of medical practice ultimately enhancing your appreciation for not only the capabilities of doctors but also their limitations J. Deane Waldman, MD Mba Deane Waldman, 2010-02 If you work anywhere in healthcare Uproot Healthcare was written to you and about you It answers two constant nagging questions Why does the system I work for make it hard to care for people What can I do to fix my most critically ill patient healthcare If you are not directly involved in healthcare Uproot Healthcare was written for you The author can give you one guarantee some day you will need healthcare When that day comes you will want a system that provides error free high quality care that you can easily access that we can all afford and that offers better outcomes tomorrow than it does today Uproot Healthcare shows you how to get involved so you can get what you need and want Uproot Healthcare does not offer Waldman's answer another fix that fails or some solution imposed on us from above It provides the foundation for a discussion on healthcare to create a national consensus and for us to make healthcare work for everyone not easily nor quickly but surely

When Doctors Kill Joshua A. Perper, Stephen J. Cina, 2010-06-14 It would come as no surprise that many readers may be shocked and intrigued by the title of our book Some especially our medical colleagues may wonder why it is even worthwhile to raise the issue of killing by doctors Killing is clearly anathetical to the Art and Science of Medicine which is geared toward easing pain and suffering and to saving lives rather than smothering them Doctors should be a source of comfort rather than a cause for alarm Nevertheless although they often don't want to admit it doctors are people too Physicians have the same genetic library of both endearing qualities and character defects as the rest of us but their vocation places them in a position to intimately interject themselves into the lives of other people In most cases fortunately the positive traits are dominant and doctors do more good than harm While physicists and mathematicians paved the road to the stars and deciphered the mysteries of the atom they simultaneously unleashed destructive powers that may one day bring about the annihilation of our planet Concurrently doctors and allied scientists have delved into the deep secrets of the body and mind mastering the anatomy and physiology of the human body even mapping the very molecules that make us who we are But make no mistake a person is not simply an elegant biological machine to be marveled at then dissected

Professionalizing Leadership Barbara Kellerman, 2018-02-02 Over the last 40 years the leadership industry has grown exponentially Yet leadership education training and development

still fall far short Moreover leaders are demeaned degraded and derided as they never were before Why The problem is leadership has stayed stuck It has remained an occupation instead of becoming a profession Unlike medicine and law leadership has no core curriculum considered essential It has no widely agreed on metric or criteria for qualification And it has no professional association to oversee the conduct of its members or assure minimum standards Professionalizing Leadership looks to a past in which learning to lead was the most important of eruditions It looks to a present in which learning to lead is as effortless as ubiquitous And it looks to a future in which learning to be a leader might look different altogether it might resemble the far more rigorous process of learning to be a doctor or a lawyer As it stands now the military is the only major American institution that gets it right It assumes leadership is a profession that requires those who practice it to be taught in accordance with high professional standards Barbara Kellerman draws on the military experience specifically to develop a template for learning how to lead generally Leadership in the first quarter of the present century is different from what it was even in the last quarter of the past century which is why leadership taught casually and carelessly should no longer suffice Professionalizing Leadership addresses precisely the problem of how to prepare leaders in accordance with professional norms It provides the template necessary for transforming leadership from dubious occupation to respectable profession AHRQ Research Activities ,2007 **Exposing the Twenty Medical Myths** Arthur Garson Jr.,Ryan Holeywell,2019-10-22 Despite intense political focus and debate for the past 10 years Americans remain deeply worried about the availability and affordability of health care for themselves and their families In clear and accessible prose journalist Ryan Holeywell and medical doctor and health policy expert Arthur Garson provide Americans with the tools we need to have an honest unbiased view of the state of health care policy in America By fact checking 20 enduring health care myths they move the debate beyond Obamacare v repeal and replace and give citizens the tools they need to evaluate the major policy issues confronting our health care system Had Enough? James Carville,2003 In *Had Enough* the legendary political adviser comes out of his corner swinging taking on the Bush White House and the Republican leaders in Congress on every front from the economy to education to foreign affairs But he doesn't just attack he lays out constructive had enough solutions for healing the damage done by the Republicans and helping disheartened Democrats get back on their feet In addition he offers Ten Rules for Progressives to Live By and a new War Room mantra for a new era BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Research Handbook on the Economics of Torts* Jennifer Arlen,2013-11-29 Focusing on issues of vital importance to those seeking to understand and reform the tort system this volume takes a multi disciplinary approach including theoretical economic analysis empirical analysis socio economic analysis and behavioral anal *Risk Management, Liability Insurance, and Asset Protection Strategies for Doctors and Advisors* David Edward Marcinko,Hope Rachel Hetico,2015-12-22 It is not uncommon for practicing physicians to have more than a dozen separate insurance policies to protect their medical practice and personal assets Yet most doctors
