Wittgenstein, Mind and Meaning Meredith Williams, 2002-01-31 This book addresses both Wittgenstein's later works as well as contemporary issues in philosophy of mind. It provides fresh insight into the later Wittgenstein and raises vital questions about the foundations of cognitivism. *Wittgenstein, Mind and Meaning* Meredith Williams, 1998

**Minds, Brains, and Law** Michael S. Pardo, Dennis Patterson, 2015 In *Minds Brains and Law* Michael S. Pardo and Dennis Patterson analyze questions that lie at the core of implementing neuroscientific research and technology within the legal system. They examine the arguments favoring increased use of neuroscience in law, the scientific evidence available for the reliability of neuroscientific evidence in legal proceedings, and the integration of neuroscientific research into substantive legal doctrines. This paperback edition contains a new Preface covering developments in this subject since the hardcover edition published in 2013.

**A Wittgensteinian Way with Paradoxes** Rupert Read, 2012-10-25 *A Wittgensteinian Way with Paradoxes* examines how some of the classic philosophical paradoxes that have so puzzled philosophers over the centuries can be dissolved. Read argues that paradoxes such as the Sorites, Russell's Paradox, and the paradoxes of time travel do not in fact need to be solved. Rather, using a resolute Wittgensteinian therapeutic method, the book explores how virtually all apparent philosophical paradoxes can be diagnosed and dissolved through examining their conditions of arising to loosen their grip and therapeutically liberate those philosophers suffering from them, including oneself. The book contrasts such paradoxes with real lived paradoxes, paradoxes that are genuinely experienced outside of the philosopher's study in everyday life. Thus, Read explores instances of lived paradox such as paradoxes of self-hatred and of denial of other humans' humanity and the harm they can cause psychically, morally, or politically. These lived paradoxes, he argues, sometimes cannot be dissolved using a Wittgensteinian treatment. Moreover, in some cases they do not need to be for some such as the paradoxical practices of Zen Buddhism and indeed of Wittgenstein himself can in fact be beneficial. The book shows how once philosophers' paradoxes have been exorcized, real lived paradoxes can be given their due.

*Artistic Practices* Tasos Zembylas, 2014-04-03 *Art matters*. It affects us in our daily lives and is full of meanings that are valuable to all of us. As a catalyst for social interactions, art may either cause public conflict and create dissensions or facilitate mutual understanding and strengthen collective bonds. All of this is grounded in practices that develop and change along social interaction, cultural dynamics, as well as technological and economic lines. So how is art formed and produced? What are the relevant constraints and challenges that artists experience in the creative process? And what constitutes artistic agency? This collection of contributions from international interdisciplinary experts explores particular case studies to deeply analyse artistic practices. Comprising eleven chapters relating to different art forms, each chapter offers an original perspective conveying a comprehensive understanding of artistic practices as arrays of specific activities in contemporary art worlds. This book will be important for both researchers and practitioners in the field. It will help artists to deepen their analytical abilities, enabling them to further their

own creative practice It will allow students and researchers to gain insights into processes of artistic creation and thus into the reproduction of art as well as innovation in the arts

*Speaking from Elsewhere* José Medina, 2007-06-01 In *Speaking from Elsewhere* author Jose Medina argues for the critical and transformative power of speech from marginalized locations by articulating a contextualist view of meaning identity and agency This contextualism draws from different philosophical traditions Wittgenstein pragmatism and feminist theory and crosses disciplinary boundaries philosophy cultural studies women s studies and sociology to underscore both the diversity of voices and viewpoints and the openness of discursive contexts and practices Expressing a robust notion of discursive responsibility Medina contends that as speakers and members of linguistic communities we cannot elude the obligation to open up discursive spaces for new voices and to facilitate new dialogues that break silences and empower marginalized voices

*Neurolaw and Responsibility for Action* Bebhinn Donnelly-Lazarov, 2018-05-03 Law regulates human behaviour a phenomenon about which neuroscience has much to say Neuroscience can tell us whether a defendant suffers from a brain abnormality or injury and it can correlate these neural deficits with criminal offending Using fMRI and other technologies it might indicate whether a witness is telling lies or the truth It can further propose neuro interventions to change the brains of offenders and so to reduce their propensity to offend And it can make suggestions about whether a defendant knows or merely suspects a prohibited state of affairs so drawing distinctions among the mental states that are central to legal responsibility Each of these matters has philosophical import is a neurological deficit inculpatory or exculpatory what is the proper role for law if the mind is no more than the brain is lying really a brain state and can neuroscience really read the brain In this edited collection leading contributors to the field provide new insights on these matters bringing to light the great challenges that arise when disciplinary boundaries merge

Judgment and Action Vivasvan Soni, Thomas Pfau, 2017-12-15 Written by theologians literary scholars political theorists classicists and philosophers the essays in *Judgment and Action* address the growing sense that certain key concepts in humanistic scholarship have become suspect if not downright unintelligible amid the current plethora of critical methods These essays aim to reassert the normative force of judgment and action two concepts at the very core of literary analysis systematic theology philosophy ethics aesthetics and other disciplines Interpretation is essential to every humanistic discipline and every interpretation is an act of judgment Yet the work of interpretation and judgment has been called into question by contemporary methods in the humanities which incline either toward contextual determination of meaning or toward the suspension of judgment altogether Action is closely related to judgment and interpretation and like them it has been rendered questionable An action is not simply the performance of a deed but requires the deed s intelligibility which can be secured only through interpretation and judgment Organized into four broad themes interiority contemplation ethics politics community and aesthetics image the aim of this broad ranging and insightful collection is to illuminate the histories of judgment and action identify critical sites from which rethinking them may begin clarify how they came to be challenged

and relocate them within a broader intellectual historical trajectory that renders them intelligible      The Practice of Language M. Gustafsson, L. Hertzberg, 2013-04-17 How is linguistic theory related to linguistic practice What do theoretical notions and models tell us about real life language use Are there any limits to what such notions and models can reasonably be taken to accomplish These questions are fundamental to any serious investigation into the phenomena of human communication The essays in this book show that philosophers and linguists of quite different brands have tended to give undue priority to their own favourite theoretical framework and have presupposed that the descriptive scheme invoked by that framework constitutes a pattern to which any linguistic practice somehow has to conform What unites the contributors to this volume is a critical attitude towards such essentialist aspirations By investigating several concrete examples of this tendency examples collected from such seemingly disparate areas as structuralism contemporary analytic philosophy and feminist epistemology the authors collectively manage to cast doubt on the very attempt to fit the whole of linguistic practice into a general theoretical mould      *Psychology and the Other* David Goodman, Mark Freeman, 2015-07-02 Through constructive critical exchange *Psychology and the Other* engages perspectives on the Other from various subdisciplines within psychology and related disciplines The volume uses the language of the Other as a vehicle for rethinking aspects of psychological processes especially within the therapeutic context As a group the contributors demonstrate that the language of the Other may be more fitting than the egocentric language frequently employed in psychology They also embrace the challenge to create new theories and practices that are more ethically attuned to the dynamic realities of psychological functioning
