Women At Work 1860 1939 Regions And Regionalism In History:

Family Life in Britain, 1650-1910 Carol Beardmore, Cara Dobbing, Steven King, 2019-04-03 This book explores the ways that families were formed and re formed and held together and fractured in Britain from the sixteenth to twentieth century The chapters build upon the argument developed in the 1990s and 2000s that the nuclear family form the bedrock of understandings of the structure and function of family and kinship units provides a wholly inadequate lens through which to view the British family Instead the volume s contributors point to families and households with porous boundaries an endless capacity to reconstitute themselves and an essential fluidity to both the form of families and the family and kinship relationships that stood in the background This book offers a re reading and reconsideration of the existing pillars of family history in Britain It examines areas such as Scottish kinship patterns work patterns of kin in Post Office families stepfamily relations the role of family in managing lunatic patients and the fluidity associated with a range of professional families in the nineteenth century Chapter 8 of this book is available open access under a CC BY 4 0 license at link.springer.com

The Lancashire Working Classes c.1880-1930 Trevor Griffiths, 2001-10-04 This book examines the experiences and values which shaped working class life in Britain in the half century from 1880 It takes as its focus a region Lancashire which was central to the social and political changes of the period The discussion centres on two towns Bolton and Wigan which while they were geographically close differed significantly in their industrial fortunes and their electoral development The formation of class identity is traced through developments in the world of work from the impact of technological and managerial innovations to the elaboration of collective bargaining procedures Beyond work particular attention is paid to the dynamics of neighbourhood and family life the latter emerging as an important source of continuity in working class life The broader impact of such influences are traced through a close examination of the electoral politics of the period Dr Griffiths conclusions fundamentally challenge the notion that the fifty years around the turn of the century witnessed the emergence of a working class more culturally and politically united than at any other time either before or since Rather an alternative narrative of class development is offered in which broad continuities in working class life in particular the survival of religious ethnic and occupational points of division are emphasised Despite the presence of strong and stable labour institutions from trade unions to Co operative and Friendly Societies the picture emerges of a working class more individualist than collectivist in outlook more flexible in response to economic change and less constrained by the broader solidarities of work and neighbourhood than has previously been supposed

Issues of Regional Identity Edward Royle, 1998 As regionalism assumes new importance in Britain and throughout the EU this work brings together historians and geographers to offer regional perspectives on Britain that avoid both the traditional parochialism of local history and the generalizations of a national approach

Health and Society in Twentieth Century Britain Helen Jones, 2014-01-14 Few things tell us more of a nation s general well being than the development of the life expectancy of its citizens the rising

standards of health that they come to demand and how evenly that improvement is shared throughout society Helen Jones examines the record of twentieth century Britain in these respects She has much heartening progress to record yet stark inequalities remain Her book is thus both a review of and contribution to the current debates over gender class and ethnic inequalities in standards of health in Britain today The Cambridge Urban History of Britain Peter Clark,David Michael Palliser,Martin J.
