Tourism Globalization And Development Responsible Tourism Planning:

Tourism, Globalization and Development Donald G. Reid, 2003-07-20 Tourism is booming world wide it makes up a massive part of the global economy Donald G Reid s book focuses on tourism in developing and less developed countries He examines its social and environmental impact and offers a timely critical analysis of the part it plays in globalisation Many of the world s poorest countries rely on the tourist trade for the major part of their income However all too often the local communities involved do not reap the benefits of this trade Developers often exclude local communities from the initial planning and decision making process viewing them either as a benign resource to be exploited or as an impediment This is a rigorous critique of corporate led tourism development which lays out alternatives for planning and control to the local communities It argues that only in this way can the vastly differing requirements of each community be addressed and social and environmental issues can be dealt with properly The book includes a discussion of macro planning theory and offers three case studies of locally controlled projects that show clearly how communities developing a tourist trade can benefit

Managing Coastal Tourism Resorts Sheela Agarwal, Gareth Shaw, 2007-10-19 The vast majority of existing academic research of coastal tourism resort management has been undertaken in northern and southern Europe at the expense of a wider global consideration This book aims to address this deficit and develop a global perspective on the management issues facing coastal resorts By drawing on examples it incorporates a detailed analysis of a range of economic socio cultural political and environmental issues which are being experienced to differing extents by coastal tourism resorts which are at different life cycle stages of development The major management themes highlighted include the processes of restructuring attempts to develop sustainable agendas and environmental issues of developing resorts in sensitive areas Written by key experts this book provides a critical assessment of the key management issues facing coastal tourism resorts globally In doing so it represents more than a mere amalgamation of existing literature as it aims to advance conceptual understanding of resort evolution and change

Tourism and Development in the Developing World David J. Telfer, Richard Sharpley, 2007-11-30 Tourism is widely considered as an effective contributor to socio economic development particularly in less developed countries However despite the almost universal adoption of tourism as a developmental option the extent to which economic and social development inevitably follows the introduction and promotion of a tourism sector remains the subject of intense debate This book provides an introduction to the tourism development process Focusing specifically on the less developed world and drawing on contemporary case studies it questions many assumptions about the role of tourism in development and in particular highlights the dilemmas faced by destinations seeking to achieve development through tourism Combining an overview of essential concepts theories and knowledge related to tourism and development with an analysis of contemporary issues and debates *Tourism and Development in the Developing World* is a valuable resource for those investigating tourism issues in developing countries It is also useful for students studying related subjects including

development studies geography international relations politics sociology and area studies **Tourism, Globalization And Development** Donald G. Reid, 2003-07-20 Table of contents Tourism Governance Bill Bramwell, Bernard Lane, 2013-12-16

The role of governance has only recently begun to be researched and discussed in order to better understand tourism policy making and planning and tourism development Governance encompasses the many ways in which societies and industries are governed given permission or assistance or steered by government and numerous other actors including the private sector NGOs and communities This book explains and evaluates critical perspectives on the governance of tourism examining these in the context of tourism and sustainable development Governance processes fundamentally affect whether and how progress is made toward securing the economic socio cultural and environmental goals of sustainable development The critical perspectives on tourism governance examined here challenge and re conceptualise established ideas in tourism policy and planning as well as engage with theoretical frameworks from other social science fields The contributors assess theoretical frameworks that help explain the governance of tourism and sustainability They also explore tourism governance at national regional and local scales and the relations between them They assess issues of power and politics in policy making and planning and they consider changing governance relationships over time and the associated potential for social learning The collection brings insights from leading researchers and examines important new theoretical frameworks for tourism research This book was originally published as a special issue of Journal of Sustainable Tourism **Activating Critical Thinking to Advance the Sustainable Development Goals in Tourism Systems** Karla A. Boluk, Christina T. Cavaliere, Freya Higgins-Desbiolles, 2021-05-12

Activating Critical Thinking to Advance the Sustainable Development Goals in Tourism Systems focuses on the role of critical thinking and inquiry in the implementation of the 2030 Sustainable Development Goals SDGs in tourism systems The impetus for the development of this book emerged from the declaration by the United Nations UN General Assembly of 2017 as the International Year of Sustainable Tourism for Development This declaration purposely positions tourism as a tool to advance the universal 2030 Agenda for Sustainable Development and the 17 SDGs thus mutually serving as an opportunity and responsibility to appraise from a critical lens what the SDGs signify and how they can be understood from multiple perspectives The chapters in the book foster the next phase of sustainable tourism scholarship that actively considers the interconnections of the UN's SDGs to tourism theory and praxis and activates critical thinking to analyze and advance sustainability in tourism systems It articulates the need for the academy to be more intrinsically involved in ongoing iterations of multilateral accords and decrees to ensure they embody more critical and inclusive transitions toward sustainability as opposed to market driven neoliberal directives The contributions in this book encourage various worldviews challenging shaping and more critically reflecting the realities of global communities as related to and impacted by sustainable tourism development The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism **Tourism and the Millennium Development Goals** Jarkko

Saarinen, Christian M. Rogerson, Haretsebe Manwa, 2013-10-31 In 2000 United Nations adopted the Millennium Development Goals UN MDGs committing the member nations to a new global partnership to reduce extreme poverty and setting out a series of specific targets with a deadline of 2015 Related to the UN MDGs tourism is increasingly seen as a promising tool for poverty reduction ensuring environmental sustainability and developing a global partnership for development for example Thus the industry has become an important policy tool for community and regional development in many developing countries and the expectations for tourism and its social and economic outcomes have evolved to a high level However there are still many challenges to overcome in the relationship between tourism industry development and poverty reduction This book aims to discuss the promises challenges and outcomes of tourism in development with a specific aim of drawing together research related to tourism and UN MDGs The papers discuss what lessons can be learnt and conclusions drawn from the utilisation of tourism for development and poverty reduction What emerges from this collection is a set of interesting results and notions which both support and challenge the connections between tourism and development and the new role of tourism in global development This book is an extended version of a special issue published in Current Issues in Tourism Tourism, Planning, and Community Development Rhonda Phillips, Sherma Roberts, 2013-09-13 The intersection of community development tourism and planning is a fascinating one Tourism has long been used as a development strategy in both developed and developing countries from the national to local levels These approaches have typically focused on economic dimensions with decisions about tourism investments policies and venues driven by these economic considerations More recently the conversation has shifted to include other aspects social and environmental to better reflect sustainable development concepts Perhaps most importantly is the richer focus on the inclusion of stakeholders An inclusionary participatory approach is an essential ingredient of community development and this brings both fields even closer together It reflects an approach aimed at building on strengths in communities and fostering social capacity and capital In this book the dimensions of the role tourism plays in community development are explored A panoply of perspectives are presented tackling such questions as can tourism heal How can tourism development serve as a catalyst to overcome social injustices and cultural divides This book was originally published as a special issue of Community Development **Global Changes and Sustainable Development in Asian Emerging Market Economies: Volume 2** An Thinh Nguyen, Luc Hens, 2024-12-02 This two volume set presents the conference papers from the 2023 iteration of the International Conference on Economics Development and Sustainability EDESUS 2023 organized by the VNU University of Economics and Business Vietnam National University Hanoi The collection addresses global changes and sustainable development in Vietnam and other emerging market economies in Asia and covers wider topics such as economics and business e.g economic theory national and international income distribution macroeconomic policies sectors of economy productivity developments financial market business governance bank financing development and sustainability e.g developing process development
