Essays Toward a Steady-state Economy Herman E. Daly, 1971 Toward a Steady-state Economy Herman E. Daly, 1973-01-01 **Economics, Ecology, Ethics** Herman E. Daly, 1980 **Realizing an Alternative Political Economy of Sustainability** Arturo Hermann, 2025-07-25

Engagement with and between a plurality of progressive non neoclassical traditions is an important step in fostering a more capacious understanding of sustainability both as a concept and as a political objective To that end this book provides a critical overview of the development of alternative perspectives on the economics of sustainability highlighting the presence of various strands of heterodox economics and radical ecology and arguing that greater engagement between these schools of thought is required to help formulate viable alternatives to the prevailing neoliberal ideology The chapters in Part I of this volume Ecofeminism Social Ecological Economics Bioeconomics Steady State present a series of concrete policy proposals for building socially just sustainable socio economic processes Each chapter utilizes the acumen of a given heterodox tradition to formulate policy reforms to secure this objective In Part II Heterodox Macroeconomics and Sustainability the contributors make the case for more radical forms of socio economic transformation particularly emphasizing community local and regional level initiatives for change The final part Circular Economy Civil Economy and Other Heterodox Contributions reflects on the potential strategic political economic contribution of heterodox economics to building more sustainable and just socio economic practices in a broader sense These chapters demonstrate that heterodox economics and radical ecology can productively contribute to realizing sustainability in areas such as economic pedagogy through working in conjunction with other social justice movements and by challenging extant neoliberal ideologies of sustainability They also deliberate on some of the institutional and epistemological challenges that confront heterodox practitioners seeking to make such an impact This volume is essential reading for anyone concerned with a viable alternative conception of the economy and sustainability including readers from all schools of heterodox economics and radical ecology and people and organizations involved in various ways in building an alternative political economy of sustainability

Daly's contributions to the still emergent field of ecological economics are constant references for our peers throughout the developing world as well as in the North His courageous tilting at the windmills of mainstream economic nonsense inspire us to continue questioning in whose interests do we continue on a perpetual search for unlimited material satisfaction Daly's conception is not only of a world restricted by biophysical limits but also one in which poverty and deprivation are commonplace and where Sisyphean efforts to maintain accelerated economic growth only exacerbate inequitable distribution His vision of sustainable economic welfare shed light on other aspects of our existence which make it worth living Thanks to Farley Rees El Serafy Goodland and other fellow travelers we are bestowed with an excellent collection synthesizing Daly's contributions to our work which will inspire our youth and their children long after we too depart

Peter H May President Brazilian Society for Ecological Economics ECOECO Contributed by several eminent thinkers the chapters in this book herald the paradigm shift that is needed to save the scientific framework of economics In spite of the conceptual inconsistencies GDP continues to be accepted by the nation states as the singular parameter to comprehensively describe the health of their economy What gets easily hidden behind Market Failures is actually the success of cost shifting on the heads of the ignorant and marginalized people as price for economic growth The chapters eloquently establish the need for moving beyond the religious faith on a paradigm that is facing fundamental conceptual challenges but has not addressed them with due seriousness What is a greater contribution of this collection is the identification of the gaps in knowledge of economics that need to be filled up to arrive at some basic articulations of the new paradigm that can throw some light on what is ecologically and socially Sustainable Development

Jayanta Bandyopadhyay Past President The Indian Society for Ecological Economics The title *Beyond Uneconomic Growth* captures both the core of Herman Daly's key message and the linguistic mastery that makes his texts so enjoyable to read The book forms a great tribute to the work of Herman Daly by gathering a distinguished set of contributors covering a wide variety of the topics that Daly has dealt with and pointing in new directions

Inge R pke Aalborg University Denmark This engaging book brings together leading ecological economists to collectively present a definitive case for looking beyond economic growth as the sole panacea for the world's ecological predicament Grounded in physics ecology and the science of human behavior contributors show how economic growth itself has become uneconomic and adds to a ravaging of both social and ecological cohesion Guided by a clear moral vision that prioritizes sustainability and justice over profit the authors provide a blueprint for an economy that replaces quantitative growth with qualitative improvement to enhance human welfare while restoring degraded ecosystems They present solutions for many of today's challenges ranging from global climate change and biodiversity loss to natural resource depletion This

interdisciplinary work not only relates ecological economics theory to the most urgent predicaments of the contemporary world but also pays tribute to the work of Herman Daly a leading pioneer of modern ecological economics Researchers and faculty studying and teaching ecological economics and environmental studies will find value in this unprecedented book It will also be of interest to practitioners working to solve a variety of global environmental issues **Economics, ecology, ethics** Herman E.
