**Razing Kids** Jeffrey C. Sanders,2020-12-10 Children are the future Or so we like to tell ourselves In the wake of the Second World War Americans took this notion to heart Confronted by both unprecedented risks and unprecedented opportunities they elevated and perhaps exaggerated the significance of

children for the survival of the human race Razing Kids analyzes the relationship between the postwar demographic explosion and the birth of postwar ecology In the American West especially workers policymakers and reformers interwove hopes for youth environment and the future They linked their anxieties over children to their fears of environmental risk as they debated the architecture of wartime playgrounds planned housing developments and the impact of radioactive particles released from distant hinterlands They obsessed over how riot riddled cities War on Poverty era rural work camps and pesticide laden agricultural valleys would affect children Nervous about the world they were making their hopes and fears reshaped postwar debates about what constituted the social and environmental good     Encyclopedia of World Problems and Human Potential ,1986     **Sacrifice Zones** Steve Lerner,2012-09-14 The stories of residents of low income communities across the country who took action when pollution from heavy industry contaminated their towns Across the United States thousands of people most of them in low income or minority communities live next to heavily polluting industrial sites Many of them reach a point at which they say Enough is enough After living for years with poisoned air and water contaminated soil and pollution related health problems they start to take action organizing speaking up documenting the effects of pollution on their neighborhoods In Sacrifice Zones Steve Lerner tells the stories of twelve communities from Brooklyn to Pensacola that rose up to fight the industries and military bases causing disproportionately high levels of chemical pollution He calls these low income neighborhoods sacrifice zones And he argues that residents of these sacrifice zones tainted with chemical pollutants need additional regulatory protections Sacrifice Zones goes beyond the disheartening statistics and gives us the voices of the residents themselves offering compelling portraits of accidental activists who have become grassroots leaders in the struggle for environmental justice and details the successful tactics they have used on the fenceline with heavy industry
