Topic Box Maths:

Mathematical Subjects Fiona Walls, 2009-08-10 Teaching and learning mathematics is a political act in which children teachers parents and policy makers are made visible as subjects As they learn about mathematics children are also learning about themselves who they are who they might become We can choose to listen or not to what children have to say about learning mathematics Such choices constitute us in relations of power Mathematical know how is widely regarded as essential not only to the life chances of individuals but also to the health of communities and the economic well being of nations With the globalisation of education in an increasingly market oriented world mathematics has received intensified attention in the first decade of the twenty first century with a shifting emphasis on utilitarian aspects of mathematics This is reflected in the reconceptualisation of mathematical competence as mathematical literacy loosely conceived as those ways of thinking reasoning and working mathematically that allow us to engage effectively in everyday situations in many occupations and the cut and thrust of world economies as active empowered and participatory citizens It is no surprise then that mathematics has become one of the most politically charged subjects in primary school curricula worldwide We are experiencing an unprecedented proliferation of regional and national strategies to establish benchmarks raise standards enhance achievement close gaps and leave no child behind in mathematics education Industries have sprung up around the design administration and monitoring of standardised assessment to measure and compare children s mathematical achievement against identified benchmarks and each other

Maths for Chemistry Paul Monk, Lindsey J. Munro, 2021 Mathematical skills and concepts lie at the heart of chemistry yet they are the aspect of the subject that many students fear the most Maths for Chemistry recognizes the challenges faced by many students in equipping themselves with the maths skills necessary to gain a full understanding of chemistry Working from foundational principles the book builds the student s confidence by leading them through the subject in a steady progressive way from basic algebra to quantum mathematics Opening with the core mathematics of algebra logarithms and trigonometry the book goes on to cover calculus matrices vectors complex numbers and laboratory mathematics to cover everything that a chemistry student needs With its modular structure the book presents material in short manageable sections to keep the content as accessible and readily digestible as possible Maths for Chemistry is the perfect introduction to the essential mathematical concepts which all chemistry students should master
