Tourism And Sustainable Community Development Routledge Advances In Tourism:

Tourism and Sustainable Community Development Derek Hall,Greg Richards,2002-09-11 This collection of international case studies addresses the crucial issue of sustainable tourism development by asking what local communities can contribute to sustainable tourism and what sustainability can offer communities in return *Tourism and Sustainable Community Development* Greg Richards,Derek R. Hall,2003 As the tourist industry becomes increasingly important to communities around the world the need to develop tourism sustainably has also become a primary concern This collection of international case studies addresses this crucial issue by asking what local communities can contribute to sustainable tourism and what sustainability can offer local communities Individually these investigations present a wealth of original research and source material Collectively the book illuminates the term community the meaning of which it is argued is vital to understanding how sustainable tourism development can be implemented in practice **Tourism and Development** Richard Sharpley,David J. Telfer,2002-04-30 The development of tourism is frequently justified on the basis of its potential contribution to the broader socio economic development of destination areas Indeed tourism is generally considered an effective vehicle of development yet the meaning and objectives of development and the extent to which it can be achieved through tourism is rarely questioned Moreover the relationship between tourism and development remains an under represented area of study and research This book addresses this gap in the literature by challenging many of the widelyheld assumptions about tourism s developmental contribution In the first part a theoretical link is established between the discrete yet interconnected disciplines of tourism studies and development studies More specifically the meaning of development and successive development paradigms are considered within the context of tourism This provides a conceptual foundation for the second part of the book which addresses a number of fundamental issues related to tourism s potential contribution to development These include issues of economic development regional development socio cultural development and environmental development Finally the third part focuses upon barriers to tourism induced development arguing that a new political economy of tourism the consumption of tourism and the dominance of the sustainable development paradigm represent significant counterpoints to overly simplistic models of tourism s potential contribution to development

Mediterranean Protected Areas in the Era of Overtourism Ante Mandić,Lidija Petrić,2021-04-19 This book comprises studies that reflect on various influences of excessive tourism development in protected areas and solutions designed and initiated to mitigate such challenges A large proportion of tourism in Mediterranean destinations constitutes nature based tourism in particular tourism in parks and protected areas As a destination experiences higher intensity and density of tourism the potential conflict between maintaining a healthy natural environment and economic development also increases This has urged planners and decision makers to devise and adopt innovative approaches that seek to strike a balance between tourism development and nature conservation This book demonstrates the importance of collaboration across and

beyond disciplines and of all groups of stakeholders for maximization of societal impacts and tourism related benefits

Fennell, 2021-09-21 This handbook presents a timely broad ranging and provocative overview of the essential nature of ecotourism The chapters will both advance the existing central themes of ecotourism and provide challenging and divergent observations that will thrust ecotourism into new areas of research policy and practice The volume is arranged around four key themes sustainability ethics and identity change conflict and consumption and environment and learning with a total of 28 chapters The first section focuses on sustainability as a core ecotourism criterion with a primary focus on some of the macro sustainability issues that have an impact on ecotourism Foremost among these topics is the linkage to the UN s Sustainable Development Goals which have relevance to ecotourism as one of the greenest or most responsible forms of tourism The chapters in the second section provide a range of different topics that pull ecotourism research into new directions including a chapter on enriching indigenous ecotourism through culturally sensitive universalism The third section includes chapters on topics ranging from persons with disabilities as a neglected body of research in ecotourism to ecotourism as a form of luxury consumption The final section emphasises the link between ecotourism and learning about the natural world including a deeply theoretical chapter on rewilding Europe With contributions from authors around the world this handbook gives a global platform to local voices in both developed and emerging country contexts The multidisciplinary and international Routledge Handbook of Ecotourism will be of great interest to researchers students and practitioners working in tourism and sustainability
