Towards Speculative Realism Graham Harman, 2010 These writings chart Harman's rise from Chicago sportswriter to co-founder of one of Europe's most promising philosophical movements Speculative Realism Speculative Realism Peter Gratton, 2014-09-25 The first book-length survey of speculative realism a rapidly emerging field in contemporary Continental philosophy **Speculative Realism** Graham Harman, 2018-09-19 On April 27 2007 the first Speculative Realism SR workshop was held at Goldsmiths University of London featuring four young philosophers whose ideas were loosely allied Over the ensuing decade the ideas of SR spread from philosophy to the arts architecture and numerous disciplines in the humanities and social sciences SR has been arguably the most influential new current in continental philosophy since the works of Gilles Deleuze and Félix Guattari found their second wind in the 1990s But what is SR This book is the first general overview by one of its original members focusing on the aesthetic ethical ontological and political themes of greatest importance to the movement Graham Harman provides a balanced but critical assessment of his original SR colleagues Ray Brassier Iain Hamilton Grant and Quentin Meillassoux along with a clear summary of his own Object Oriented Ontology OOO A number of central philosophical questions tie the four chapters together What exactly is correlationism the chief enemy of SR What are the stakes of philosophical realism and is such realism better served by mathematics and the natural sciences or by a broader model of cognitive activity that includes aesthetics This book covers both the historical and conceptual development of the movement providing a first-rate introduction for students aided by helpful end-of-chapter study questions chosen by Harman himself SR Harman shows is a vital and fast-developing field in contemporary philosophy **Speculative Realism** Peter Gratton, 2014-09-25 Speculative realism is one of the most talked-about movements in recent Continental philosophy It has been discussed widely amongst the younger generation of Continental philosophers seeking new philosophical approaches and promises to form the cornerstone of future debates in the field This book introduces the contexts out of which speculative realism has emerged and provides an overview of the major contributors and latest developments It guides the reader through the important questions asked by realism what can I know what is reality examining philosophy's perennial questions in new ways The book begins with the speculative realist's critique of correlationism the view that we can never reach what is real beneath our language systems our means for perception or our finite manner of being in the world It goes on to critically review the work of the movement's most important thinkers including Quentin Meillassoux Ray Brassier and Graham Harman but also other important writers such as Jane Bennett and Catherine Malabou whose writings delineate alternative approaches to the real It interrogates the crucial questions these thinkers have raised and concludes with a look toward the future of speculative realism especially as it relates to the reality

of time **The Speculative Turn** Levi Bryant, Levi R. Bryant, Nick Srnicek, Graham Harman, 2011 Continental philosophy has entered a new period of ferment The long deconstructionist era was followed with a period dominated by Deleuze which has in turn evolved into a new situation still difficult to define However one common thread running through the new brand of continental positions is a renewed attention to materialist and realist options in philosophy Among the current giants of this generation this new focus takes numerous different and opposed forms It might be hard to find many shared positions in the writings of Badiou DeLanda Laruelle Latour Stengers and Zizek but what is missing from their positions is an obsession with the critique of written texts All of them elaborate a positive ontology despite the incompatibility of their results Meanwhile the new generation of continental thinkers is pushing these trends still further as seen in currents ranging from transcendental materialism to the London based speculative realism movement to new revivals of Derrida As indicated by the title **The Speculative Turn** the new currents of continental philosophy depart from the text centered hermeneutic models of the past and engage in daring speculations about the nature of reality itself This anthology assembles authors of several generations and numerous nationalities who will be at the center of debate in continental philosophy for decades to come

The Universe of Things Steven Shaviro, 2014-10-01 From the rediscovery of Alfred North Whitehead's work to the rise of new materialist thought including object oriented ontology there has been a rapid turn toward speculation in philosophy as a way of moving beyond solely human perceptions of nature and existence Now Steven Shaviro maps this quickly emerging speculative realism which is already dramatically influencing how we interpret reality and our place in a universe in which humans are not the measure of all things **The Universe of Things** explores the common insistence of speculative realism on a noncorrelationist thought that things or objects exist apart from how our own human minds relate to and comprehend them Shaviro focuses on how Whitehead both anticipates and offers challenges to prevailing speculative realist thought moving between Whitehead's own panpsychism Harman's object oriented ontology and the reductionist eliminativism of Quentin Meillassoux and Ray Brassier The stakes of this recent speculative realist thought of the effort to develop new ways of grasping the world are enormous as it becomes clear that our inherited assumptions are no longer adequate to describe much less understand the reality we experience around us As Shaviro acknowledges speculative realist thought has its dangers but it also like the best speculative fiction holds the potential to liberate us from confining views of what is outside ourselves and he believes to reclaim aesthetics and beauty as a principle of life itself Bringing together a wide array of contemporary thought and evenhandedly assessing its current debates **The Universe of Things** is an invaluable guide to the evolution of speculative realism and the provocation of Alfred North Whitehead's pathbreaking work **Speculations IV** Michael Austin, Paul Ennis, Fabio Gironi, Thomas Gokey, Robert Jackson, 2013 With this special volume of **Speculations** the editors wanted to challenge the contested term speculative realism offering scholars who have some involvement with it a space to voice their opinions of the network of ideas commonly associated with the name Whilst undoubtedly born under

speculative realist auspices Speculations has never tried to be the gospel of a dogmatic speculative realist church but rather instead to cultivate the best theoretical lines sprouting from the resurgence in the last few years of those speculative and realist concerns attempting to break free from some of the most stringent constraints of critique Sociologist Randall Collins observed that unlike other fields of intellectual inquiry philosophy has the peculiarity of periodically shifting its own grounds but always in the direction of claiming or at least seeking the standpoint of greatest generality and importance If this is the case to deny that a shift of grounds has indeed become manifest in these early decades of the twenty first century would be at best a sign of a severe lack of philosophical sensitivity On the other hand whether or not this shift has been towards greater importance and in respect to what is not only a legitimate but a necessary question to ask

Ethical Responses to Nature's Call James Magrini, 2019-06-05 Arguing for a renewed view of objects and nature Ethical Responses to Nature's Call considers how it is possible to understand our ethical duties in the form of ethical intuitionism to nature and the planet by listening to and releasing ourselves over to the call or address of nature Blending several strands of philosophical thought such as Graham Harman's Object Oriented Ontology W D Ross's prima facie Alphonso Lingis's phenomenological ethics traceable to The Imperative and Michael Bonnett's ecophilosophy this book offers a unique rejoinder to the problems and issues that continue to haunt humans relationship to nature The origins of such problems and issues largely remain obscured from view due to the oppressive influence of the Cultural Framework which gives form and structure to the ways we understand discourse on and comport ourselves in relation to the natural world Through understanding this Cultural Framework we also come to know the responses we continue to offer in answer to nature's call and address and are then in a position to analyze and assess those responses in terms of their potential ethical weight Such a phenomenon is made possible through the descriptive and interpretive method of eco phenomenology This renewed vision of the human and nature provides direction for our interaction with and behavior toward nature in such a way that the ethical insight offers a diagnosis and provides a potentially compelling prescriptive for environmental ills

Bells and Whistles Graham Harman, 2013-11-29 In this diverse collection of sixteen essays lectures and interviews dating from 2010 to 2013 Graham Harman lucidly explains the principles of Speculative Realism including his own object oriented philosophy From Brazil to Russia and in Poland France Croatia and India Harman addresses local philosophical concerns with the energy of a roving evangelist He reflects on established giants such as Greenberg Latour and McLuhan while refining his differences with such younger authors as Brassier Bryant Garcia and Meillassoux He speaks to philosophers in Paris hecklers in New York media theorists in Berlin and architects in Curitiba as object oriented philosophy consolidates its position as the most widespread form of Speculative Realism There has never been a more upbeat introduction to one of the most challenging philosophical schools of our time

Romanticism and Speculative Realism Chris Washington, Anne C. McCarthy, 2019-01-24 Romanticism and Speculative Realism features a range of scholars working at the intersection of literary poetics and philosophy It

considers how the writing of the Romantic era reconceptualizes the human imagination the natural world and the language that correlates them in radical ways that can advance current speculative debates concerning new ontologies and new materialisms In their wide ranging examinations of canonical and non canonical romantic writers the scholars gathered here rethink the connections between the human and non human world to envision speculative modes of social being and ecological politics Spanning historical and national frameworks from historical romanticism to contemporary post romantic ecology and from British and German romanticism to global modernity these essays examine life in all its varied forms in and beyond the Anthropocene

The World of Failing Machines Grant Hamilton, 2016-09-30 The World of Failing Machines offers the first full length discussion of the relationship between speculative realism and literary criticism In identifying some of the most significant coordinates of speculative realist thought this book asks what the implications might be for the study of literature It is argued that the first casualty might well be the form of the traditional essay

Animal Writing Danielle Sands, 2019-08-21 Combining recent insights from animal studies critical plant studies and the new materialisms Danielle Sands reads fiction and philosophy alongside each other to propose a method of thinking of and with animals that draws on a bestiary of affects She challenges the claim that empathy should be primary mode of engagement with nonhuman life Instead she looks at the stories that we tell and are told by insects beings at the edges of animal life The indifference even disgust that these creatures evoke in us forms the basis for a new ethics not limited by empathy Along the way she encounters fiction writers Yann Martel Karen Joy Fowler Han Kang and Jim Crace beside the philosophy of Graham Harman Donna Haraway Jacques Derrida and Roger Caillois

End of Phenomenology Tom Sparrow, 2014-06-04 Shows how speculative realism is replacing phenomenology as the beacon of realism in contemporary Continental philosophy

Posthumanism in the Novels of Kurt Vonnegut Andrew Hicks, 2020-05-18 Posthumanism in the Novels of Kurt Vonnegut Matter That Complains So re examines the prevailing critical consensus that Kurt Vonnegut was a humanist writer While more difficult elements of his work have often been the subject of scholarly attention the tendency amongst critics writing on Vonnegut is to disavow them or to subsume them within a liberal humanist framework When Vonnegut s work is read from a posthumanist perspective however the productive paradoxes of his work are more fully realised Drawing on New Materialist Eco Critical and Systems Theory methodologies this book highlights posthumanist themes in six of Vonnegut s most famous novels and emphasises the ways in which Vonnegut troubles human non human natural artificial and material discursive hierarchical binaries

After Speculative Realism Charlie Johns, Hilan Bensusan, 2025-01-23 Building upon the contributions to the movement of Speculative Realism by Ray Brassier Iain Hamilton Grant Graham Harman and Quentin Meillassoux After Speculative Realism broadens and intensifies a number of key arguments in the field engaging with both major philosophers of the past such as Hegel and Kant and contemporary thinkers like Badiou and i ek The four original Speculative Realists were united by a seemingly stubborn fidelity towards the real as that which differed from sense experience reason the empirical sciences

representation language and normativity This volume further explores the ideas and arguments they had given regarding the potency of the real but also investigates how the correlate between thinking and being may have been misinformed or limited by a specific reading of phenomenology a motivation to separate appearance from reality and a desire to revitalise the Kantian notion of noumena After Speculative Realism charts the gap between the denouement of Speculative Realism and the birth of its contemporary successors such as the new realism of Maurizio Ferraris the kinetic ontology of Thomas Nail the transgressive realism of Lee Braver the real abstraction popularised by Alfred Sohn Rethel various spectral realisms Laruellian realisms and much more

Speculations II Michael Austin, Paul J. Ennis, Fabio Gironi, Thomas Gokey, 2020 From the Editorial Introduction If the first volume of Speculations was enough of an explicit wager a willing blind leap in the terra incognita of the publishing world then this volume forces us to stop and evaluate the reasons for the journal's protracted existence This is all the more important when we consider how the range of meanings of the term speculative realism seems to be growing with increasing numbers of thinkers situating themselves in its trail or holding a somewhat cautious interest in it while its effective reference seems nowhere to be found

Quentin Meillassoux Graham Harman, 2011-07-07 Quentin Meillassoux has been described as the fastest rising star in French philosophy since Derrida in the 1960s In Meillassoux Philosophy in the Making Graham Harman takes us behind the scenes for this unique study of Meillassoux's path to philosophy

Hegel and Speculative Realism Charles William Johns, 2023-08-09 Hegel and Speculative Realism has two main objectives Firstly to assess the speculative realist formulations of the real regarding the withdrawn object radical contingency the absolute register of extinction and the current interest in powers philosophy with special attention to their possible relation to the absolute scope of Hegelian philosophy Secondly to invite the reader to reconsider Hegel in a new way uncovering rare insights into his thoughts on astronomy actuality the concrete and non being Johns inclination is to not mistake the necessary path to the absolute as the only path Johns argues that Hegel describes the unique trajectory of the dialectical relationship between Nature and Idea as a Spirit oriented by both logical and physical spatio temporal dimensions Johns reads this as a theory of singularity and makes the bold claim that there may be other paths not taken by the Hegelian spatio temporal path synonymous with the dialectic synthesis sublation and unfolding In fact speculative philosophy should not be satisfied to study only what exists but also what could exist or what it means to inexist and should entertain multiple modes of potential becoming between Hegel's initial triad of logical categories Being Non Being and Becoming

Light in the Dark/Luz en lo Oscuro Gloria Anzaldua, 2015-09-17 Light in the Dark is the culmination of Gloria E Anzaldua's mature thought and the most comprehensive presentation of her philosophy Focusing on aesthetics ontology epistemology and ethics it contains several developments in her many important theoretical contributions
