Evangelicalism and the Politics of Reform in Northern Black Thought, 1776-1863 Rita Roberts, 2011 During the revolutionary age and in the early republic when racial ideologies were evolving and slavery expanding some northern blacks surprisingly came to identify very strongly with the American cause and to take pride in calling themselves American In this intriguing study Rita Roberts explores this phenomenon and offers an in depth examination of the intellectual underpinnings of antebellum black activists She shows how conversion to Christianity led a significant and influential population of northern blacks to view the developing American republic and their place in the new nation through the lens of evangelicalism American identity therefore even the formation of an African ethnic community and later an African American identity developed within the evangelical and republican ideals of the revolutionary age Evangelical values Roberts contends exerted a strong influence on the strategies of northern black reformist activities specifically abolition anti racism and black community development The activists and reformers commitment to the United States and firm determination to make the country live up to its national principles hinged on their continued faith in the possibility of the collective transformation of all Americans The people of the United States both black and white they believed would become a new citizenry distinct from any population in the world because of their commitment to the tenets of the Christian republican faith Roberts explores the process by which a collective identity formed among northern free blacks and notes the ways in which ministers and other leaders established their African identity through an emphasis on shared oppression She shows why in spite of slavery's expansion in the 1820s and 1830s northern blacks demonstrated more not less commitment to the nation Roberts then examines the Christian influence on racial theories of some of the major abolitionist figures of the antebellum era including Frederick Douglass Martin Delany and especially James

McCune Smith and reveals how activists sense of their American identity waned with the intensity of American racism and the passage of laws that further protected slavery in the 1850s But the Civil War and Emancipation Proclamation she explains renewed hope that America would soon become a free and equal nation Impeccably researched Evangelicalism and the Politics of Reform in Northern Black Thought 1776 1863 offers an innovative look at slavery abolition and African American history *Thoughts That Burned* Steve Gowler,2025-04-15 In *Thoughts That Burned* Steve Gowler showcases the life of William Goodell one of the most significant leaders of the antebellum antislavery movement Between 1826 and 1864 Goodell edited more than a dozen reform newspapers and played a leading role in the formation of several organizations including the American Anti slavery Society the Liberty Party the American Missionary Association and the Radical Abolition Party His 1852 book *Slavery and Anti slavery* was the first comprehensive history of the antislavery movement written by an American Convinced that the logic of slavery needed to be investigated and laid bare Goodell explored the institution s deep structures Whereas many abolitionists based their arguments on the inhumane consequences of enslavement Goodell analyzed the legal and psychological relations constituting the slave system At the heart of this analysis was his close reading of Southern slave codes and of the United States Constitution He argued that the Constitution properly understood is incompatible with slavery and should be used as an instrument of emancipation Among those influenced by his constitutional hermeneutic was Frederick Douglass who described Goodell as the man to whom the cause of liberty in America is as much indebted as to any other one American citizen *Thoughts That Burned* is the first comprehensive biography of this extraordinary thinker whose powerful political and theological arguments grounded abolition within the concept of human rights **William Cooper Nell, Nineteenth-century African American Abolitionist, Historian, Integrationist** William Cooper Nell,2002 For the first time a biography of William Cooper Nell and a major portion of his articles for *The Liberator* *The National Anti Slavery Standard* and *The North Star* have been published in a single volume The book is the first to document the life and works of Nell and includes correspondence with many noted abolitionists such as Wendell Phillips Frederick Douglass Amy Kirby Post and Charles Sumner **Their Right to Speak** Alisse PORTNOY,Alisse Portnoy,2009-06-30 When Alisse Portnoy recovered petitions from the early 1830s that nearly 1 500 women sent to the U S Congress to protest the forced removal of Native Americans in the South she found the first instance of women s national collective political activism in American history In this groundbreaking study Portnoy links antebellum Indian removal debates with crucial simultaneous debates about African Americans abolition of slavery and African colonization revealing ways European American women negotiated prohibitions to make their voices heard Situating the debates within contemporary competing ideas about race religion and nation Portnoy examines the means by which women argued for a right to speak on national policy Women s participation in the debates was constrained not only by gender but also by how these women and the men with whom they lived and worshipped imagined Native and African Americans as the objects of

their advocacy and by what they believed were the most benevolent ways to aid the oppressed groups Cogently argued and engagingly written this is the first study to fully integrate women s Native American and African American rights debates

Negro Year Book ,1922 *Negro Yearbook* ,1925 The Strangers Book Lloyd Pratt,2016 The Strangers Book explores how various nineteenth century African American writers radically reframed the terms of humanism by redefining what it meant to be a stranger Rejecting the idea that humans have easy access to a common reserve of experiences and emotions they countered the notion that a person can use a supposed knowledge of human nature to claim full understanding of any other person s life Instead they posited that being a stranger unknown and unknowable was an essential part of the human condition Affirming the unknown and unknowable differences between people as individuals and in groups laid the groundwork for an ethical and democratic society in which all persons could find a place If everyone is a stranger then no individual or class can lay claim to the characteristics that define who gets to be a human in political and public arenas Lloyd Pratt focuses on nineteenth century African American writing and publishing venues and practices such as the Colored National Convention movement and literary societies in Nantucket and New Orleans Examining the writing of Frederick Douglass in tandem with that of the francophone free men of color who published the first anthology of African American poetry in 1845 he contends these authors were never interested in petitioning whites for sympathy or for recognition of their humanity Instead they presented a moral imperative to develop practices of stranger humanism in order to forge personal and political connections based on mutually acknowledged and always evolving differences *Black Marxism* Cedric J. Robinson,2005-10-12 In this ambitious work first published in 1983 Cedric Robinson demonstrates that efforts to understand black people s history of resistance solely through the prism of Marxist theory are incomplete and inaccurate Marxist analyses tend to presuppose European models of history and experience that downplay the significance of black people and black communities as agents of change and resistance Black radicalism must be linked to the traditions of Africa and the unique experiences of blacks on western continents Robinson argues and any analyses of African American history need to acknowledge this To illustrate his argument Robinson traces the emergence of Marxist ideology in Europe the resistance by blacks in historically oppressive environments and the influence of both of these traditions on such important twentieth century black radical thinkers as W E B Du Bois C L R James and Richard Wright Thoughts on African Colonization, Or, An Impartial Exhibition of the Doctrines, Principles and Purposes of the American Colonization Society William Lloyd Garrison,1832
