

The Three Levels of Comprehension

A Guide for Writing Comprehension Questions

The Literal Level

The **literal level** focuses on reading the passages, hearing the words or viewing the images. It involves identifying the important and essential information. With guidance, students can distinguish between the important and less important ideas.

Question: What did the author say?

Example: Where did Henry's family go on vacation?

The Interpretive Level

At the **interpretive level**, the focus shifts to reading between the lines, looking at what is implied by the material under study. It requires students to combine pieces of information in order to make inferences about the author's intent and message. Guiding students to recognize these perceived relationships promotes understanding and decreases the risk of being overwhelmed by the complexities of the text being viewed, heard or read.

Question: What was meant by what was said?

Example: Why did Henry roll his eyes when his dad started to play the guitar?

The Applied Level

Understandings at the literal and interpretive levels are combined, reorganized and restructured at the **applied level** to express opinions, draw new insights and develop fresh ideas. Guiding students through the applied level shows them how to synthesize information, to read between the lines and to develop a deeper understanding of the concepts, principles and implications presented in the text.

Question: How would the author's message apply to other situations given what you memorized and understood at the other two levels?

Example: If Henry's friend Tom was the one playing the guitar, do you think Henry would have rolled his eyes? Why or why not?
