Politics of Citizenship in Indonesia Eric Hiariej, Kristian Stokke, The core argument of this book is that citizenship is produced and practiced through movements against injustice These take the shape of struggles by people at the grass roots level and middle classes and their representing organisations and activists for cultural recognition social and economic justice and popular representation Such popular struggles in Indonesia have largely ended up engaging with the state through both discursive and non discursive processes While the state is a common focal point these struggles are fragmented across different sectors and subject positions Developing chains of solidarity among fragments of struggles is highly important yet attempts at bridging fragmentation leave much to be desired The character

and fragmentation of popular struggles reflects the diversity of injustices and subject positions in society but is also shaped by political dynamics. The struggle for citizenship and the historical development of democracy in Indonesia are closely interwoven. The inability to bridge fragmentation among citizenship struggles mimics pro democracy movements lack of capacity in building broader alliances. Likewise these movements tendency toward elitism and habit of penetrating the State also characterise current struggles for citizenship. In this situation of multiple injustices collectivities and mobilisations it could be argued that democratic representation and politics is the foremost arena for integrating and transforming antagonistic relations within fragmented popular struggles. However this requires a democracy that not only has sovereign control over public affairs but also contains robust channels and organisations for political representation. In Indonesia it is found that formal democracy is underperforming in this respect. It is thus a foremost concern to transform democracy itself also as a means for transforming structures of injustice in society. The development of transformative agendas organisations and strategies remains a continued need and challenge for the realisation of citizenship in contemporary Indonesia.

Comparative Perspectives on Environmental Policies and Issues Robert A. Dibley, 2014-01-10. Comparative Perspectives on Environmental Policies and Issues presents tools and concepts about environmental policies in several developed and developing countries. It explores a broad survey of ecological modernization theory ecological feminism theory environmental justice theory the concept of sustainability and research on environmental policies. Data were collected through surveys interviews and focus groups and are used to analyze social economic and environmental impact on people. The book specifically discusses how the earth's basic life supporting capital soils forests species fresh water and oceans is degraded or depleted to provide for human needs and how air pollution and acid precipitation are causing widespread injury to humans forests and crops. Realistically over taxing of natural resources and ecological systems throughout the world has promoted economic growth and created increasing opportunities for people while also advancing social injustice. The use of the environment to accomplish social and economic transformation raises fundamental issues for the study of environmental policy and the natural ecological system. As human beings exploit the natural environment to meet present needs they often will destroy resources needed for the future generations. Thus environmental policies are enacted to ensure that social and economic impacts of the environment are compatible with the limits of natural systems. Offering an intuitive and crystal clear explanation of the key concepts and principles of environmental policies and sustainable development this volume is suitable not only for environmental science students but also for instructors practitioners researchers and academics. *The Practice of American Public Policymaking* Selden Biggs, Lelia B.
