

BASIC OPERATING PROCEDURE

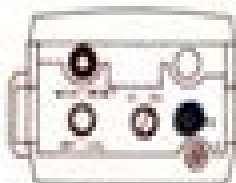

TURN ON, SET VOLUME, SET SQUELCH

1

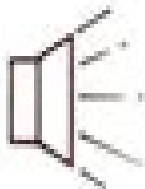

Rotate the OFF-VOL control one-half turn clockwise. The radio is now in the carrier squelch mode.

2

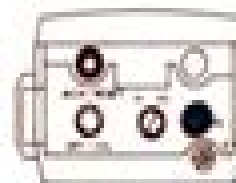

Rotate the squelch control (SQ) to the fully counterclockwise position.

3

With the antenna fully extended, listen for a broadcast and set the volume control to a comfortable listening level. The volume control setting also affects the level of the pulsed page tone.

4

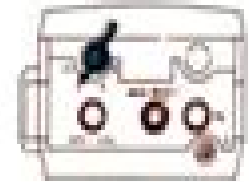

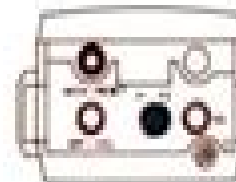

When the channel is clear, slowly rotate the squelch control clockwise until the noise just stops. This is the threshold setting. DO NOT adjust the control further. Excessive squelch reduces the radio sensitivity, and may prevent reception.

SELECT FREQUENCY, SET FOR PAGE

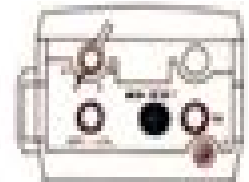

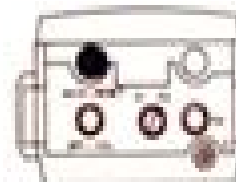

5

Set the frequency selector switch (multi-frequency models) to the desired frequency.

6

Momentarily press and release the MON-RESET switch. The radio is now in the page mode.

When paged, you will hear a pulsed tone. The radio is automatically switched to the carrier squelch mode, and you will hear the caller's voice. You may now transmit and receive.
