Expanding Reading Comprehension in Grades 3–6 Katherine A. Dougherty Stahl, Georgia Earnest García, 2022-03-29 Students in grades 3–6 need to use increasingly sophisticated comprehension skills and strategies as they read and build knowledge across disciplinary content areas. Grounded in research, this book presents effective practices for integrating literacy instruction with literature, science, and social studies. Chapters address text selection, vocabulary development, strategy instruction, discussion formats, writing to express and expand comprehension, assessment, and more. Ways to meet the needs of emergent bilingual and culturally diverse students are highlighted throughout. Ideal for preservice and inservice teachers and professional staff development, the book includes classroom vignettes, text boxes with easy-to-read instructional procedures, and curriculum resources. Helpful reproducible forms can be downloaded and printed in a convenient 8 1/2 x 11 size. Language Processing in Spanish Manuel Carreiras, José E. García-Albea, Núria Sebastián-Gallés, José E. García-Albea, Núria Sebastián-Gallés, 2013-05-13 This book presents a set of contributions to the current flow of psycholinguistic research with new and challenging data gathered from Spanish that may illuminate issues about the generality of language processing models. Although it is possible to find a considerable amount of papers on psycholinguistic research with the Spanish language published in English-speaking journals, unfortunately, the scientific community does not have access to an overview of psycholinguistics in Spain. This book overcomes these limitations because it brings together state-of-the-art descriptions of the research and theory of the different subareas of psycholinguistics currently being studied in Spain. Spanish, the third most widely used language in the world, differs from English in a number of important respects. Since English has been predominant in psycholinguistic research, contrasting properties of Spanish may help to test the generality of language processing mechanisms and to refine their description. The set of contrasting features considered in this book includes acoustical and syllabic transparency, shallow orthography, a much richer morphology, flexibility in word order, less variability in intonational contours, and the existence of null pronominal subjects for inflected verbs. There are also interesting contrasts in the frequency of different linguistic units whose impact on language processing is also evaluated. One of the main lines of argument throughout this book deals with the tension between universality and variation as a way of characterizing the functioning of language capacities and processes. The variety of topics covered by this book ranges from one end of the spectrum of language-related behavior to the other: speech perception, lexical access in word recognition, relations between phonological and orthographic representations, sentence processing, discourse comprehension, and language production. All chapters focus on questions of general interest within each topic, and in most cases, they appeal to one particular feature of the Spanish language that is relevant for a given question. Most chapters show the indisputable importance of crosslinguistic research in psycholinguistics to improve understanding on whether universal cognitive

mechanisms and language specific routines underlie the ability of understanding and producing language *THE EARLY GRADE READING ASSESSMENT* Amber K. Gove, Anna Wetterberg, 2011-09-28 The Early Grade Reading Assessment EGRA measures students progress towards reading EGRA gauges early literacy skills through a 15 minute individual oral assessment of five fundamental reading skills RTI worked with education experts to develop the EGRA in 2006 and it has been piloted and implemented in more than 40 countries This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA and to share this knowledge with practitioners policymakers and international donors Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education *Early Biliteracy Development* Eurydice B. NUNES The time that it takes children to learn to read varies greatly between different orthographies as the chapter by Sprenger Charolles clearly shows and so do the difficulties that they encounter in learning about their own orthography Nevertheless most people who have the chance to learn to read do in the end read well enough even though a large number experience some significant difficulties on the way Most of them eventually become reasonably efficient spellers too even though they go on make spelling mistakes at any rate if they are English speakers for the rest of their lives So the majority of humans plainly does have intellectual resources that are needed for reading and writing but it does not always find these resources easy to marshal What are these resources Do any of them have to be acquired Do different orthographies make quite different demands on the intellect Do people differ significantly from each other in the strength and accessibility of these resources If they do are these differences an important factor in determining children s success in learning to read and write These are the main questions that the different chapters in this section on Basic Processes set out to answer
