How to Live a Low-Carbon Life Christopher Goodall, 2012-05-04 Climate change is the greatest challenge facing humanity drastic reduction of carbon emissions is vital if we are to avoid a catastrophe that devastates large parts of the world Governments and businesses have been slow to act and individuals now need to take the lead The Earth can absorb no more than 3 tonnes of carbon dioxide emissions each year for every person on the planet if we are to keep temperature and rainfall change within tolerable limits Yet from cars and holiday flights to household appliances and the food on our plates Western consumer lifestyles leave each of us responsible for over 12 tonnes of carbon dioxide a year four times what the Earth can handle Individual action is essential if we want to avoid climate chaos *How to Live a Low Carbon Life* shows how easy it is to take responsibility providing the first comprehensive one stop reference guide to calculating your CO2 emissions and reducing them to a sustainable 3 tonnes a year *How to Live a Low-carbon Life* Chris Goodall, 2010 First Published in 2010 Routledge is an imprint of Taylor Francis an informa company **Focus On: 100 Most Popular Compact Cars** Wikipedia contributors, **Plug-in Vehicles, Plugged in Policy?** Great Britain: Parliament: House of Commons: Transport Committee, 2012-09-20 Consumer demand for plug in vehicles remains very low and the Government grant to encourage demand may not be proving effective The Government must do more to show that its plug in vehicle strategy is a good use of public money Carbon emissions from transport must be reduced if the UK is to meet its climate change targets but public money must be targeted on effective policies So far Department for Transport expenditure on plug in cars some 11 million has benefited just a handful of motorists There is a risk that the Government is basically subsidising second cars for affluent households It is also unclear whether the provision of public charging infrastructure encourages demand for plug in cars Indeed the Government does not even have a register of all the chargepoints installed at public expense Autocar ,2004 *The Times Index* ,2010 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement Popular Science ,2004-09 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better *Environmental Publics* Sally Eden, 2016-12-08 How do ordinary people think about the environment as they go about their daily lives Does thinking about the environment make them do things differently This book is the first to explore the idea of environmental publics that is the ways in which ordinary people engage with environmental issues across different practical contexts of work play and home Emphasising the practices of environmental engagement *Environmental Publics* examines how people consume the environment learn about it campaign for its protection and enjoy it through their leisure time But the book avoids relying on idealisations of consumers or citizens or theoretical constructs about behavioural norms that have traditionally dominated research in this field Instead this book differentiates

environmental public not by who they are but by what they are doing their daily practices It also analyses specifically the geographies of those practices how what people do affects the environment but in different ways across time and space and at different scales aspects of practices that are neglected in the literature With an interdisciplinary perspective this book will be of interest to students and scholars in geography sociology science and technology studies political science and anthropology It is written in an accessible and readable style so as to be useful for preliminary and more advanced courses in environmental management perception and policy as well as in studies of modern society consumption and environmentalism

The Handbook of Lithium-Ion Battery Pack Design John T. Warner, 2015-05-23 The Handbook of Lithium Ion Battery Pack Design Chemistry Components Types and Terminology offers to the reader a clear and concise explanation of how Li ion batteries are designed from the perspective of a manager sales person product manager or entry level engineer who is not already an expert in Li ion battery design It will offer a layman's explanation of the history of vehicle electrification what the various terminology means and how to do some simple calculations that can be used in determining basic battery sizing capacity voltage and energy By the end of this book the reader has a solid understanding of all of the terminology around Li ion batteries and is able to do some simple battery calculations The book is immensely useful to beginning and experienced engineer alike who are moving into the battery field Li ion batteries are one of the most unique systems in automobiles today in that they combine multiple engineering disciplines yet most engineering programs focus on only a single engineering field This book provides you with a reference to the history terminology and design criteria needed to understand the Li ion battery and to successfully lay out a new battery concept Whether you are an electrical engineer a mechanical engineer or a chemist this book helps you better appreciate the inter relationships between the various battery engineering fields that are required to understand the battery as an Energy Storage System Offers an easy explanation of battery terminology and enables better understanding of batteries their components and the market place Demonstrates simple battery scaling calculations in an easy to understand description of the formulas Describes clearly the various components of a Li ion battery and their importance Explains the differences between various Li ion cell types and chemistries and enables the determination which chemistry and cell type is appropriate for which application Outlines the differences between battery types e g power vs energy battery Presents graphically different vehicle configurations BEV PHEV HEV Includes brief history of vehicle electrification and its future
