Transplanting Trees and Other Woody Plants A. Robert Thompson, United States. National Park Service, 1940

Transplanting Trees and Other Woody Plants A. Robert Thompson, 2005-01 The moving or transplanting of trees and shrubs is an activity probably as old as mankind Basically the process of moving growing plants from one place to another is little changed from early times but our increased understanding of the processes of nature through recent research and investigations in the broad fields of horticulture arboriculture and forestry and the development of better machinery and equipment have brought about many improvements in the technique of moving trees and shrubs Today the moving of trees 12 to 18 inches in diameter is a matter of routine and trees several times as large frequently are transplanted with success The cost of such operations is relatively high and seldom in national park work is it justifiable except under special conditions The transplanting of small to medium sized trees and shrubs however is a constantly recurring activity in areas under Service jurisdiction and it is to aid the planners and supervisors of such work that this bulletin is issued Because of the varying conditions of climate soil temperature species etc encountered in national park areas it is impossible to lay down rigid rules for transplanting The principles involved however are the same in Maine as they are in Texas and it is hoped that a codification and explanation of some of these principles and descriptions of certain techniques will prove to be adaptable and of value under many of the various conditions encountered Transplanting Trees and Other Woody Plants [with Bibliography], 1940 **Transplanting Trees and Other Woody Plants** Adolph Murie, United States. Robert Thompson, 2017-10-21 Excerpt from *Transplanting Trees and Other Woody Plants* It is not within the scope of this short bulletin and it would be obviously presumptuous on the part of the author to enter into a discussion of the vast field of landscape architecture but since many plantsmen who may use this bulletin do not have the benefit of landscape advice a brief mention of some of the major esthetic features which the landscape architect must consider in the selection of plant materials may be in order About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works Trees United States.
