Guide to FPGA Implementation of Arithmetic Functions Jean-Pierre Deschamps, Gustavo D. Sutter, Enrique Cantó, 2012-04-02 This book is designed both for FPGA users interested in developing new specific components generally for reducing execution times and IP core designers interested in extending their catalog of specific components The main focus is circuit synthesis and the discussion shows for example how a given

algorithm executing some complex function can be translated to a synthesizable circuit description as well as which are the best choices the designer can make to reduce the circuit cost latency or power consumption This is not a book on algorithms It is a book that shows how to translate efficiently an algorithm to a circuit using techniques such as parallelism pipeline loop unrolling and others Numerous examples of FPGA implementation are described throughout this book and the circuits are modeled in VHDL Complete and synthesizable source files are available for download **Byrhtferth's Manual (A. A Guide to Surface Engineering Terminology Eugeniusz Tyrkiel, 2024-11-01 First published in 1995 The International Federation for the Heat Treatment of Materials was founded in 1971 The name was modified in 1986 to International Federation for Heat Treatment and Surface Engineering but the acronym IFHT was retained The objective of IFHT is to serve as the premier organisation for facilitating and promoting the international exchange of information in the science and technology of heat treatment and surface engineering Its particular strength is its effectiveness as a forum uniting science and industry Surface Engineering is now accepted as a discipline in its own right This work strives to be more than a mere collection of definitions Wherever possible the guide expands to provide greater technical detail and where appropriate cited further references and application examples It is hoped that the book will serve as an informative quick reference guide that will prove valuable to the expert and non expert alike
