Treatment of Adolescents with Substance Use Disorders, 1999 EXECUTIVE SUMMARY AND RECOMMENDATIONS This document Treatment of Adolescents With Substance Use Disorders is a revision and update of Treatment Improvement Protocol TIP 4 published in 1993 by the Center for Substance Abuse Treatment CSAT of the Substance Abuse and Mental Health Services Administration SAMHSA Like TIP 4 this document aims to help treatment providers design and deliver better services to adolescent clients with substance use

disorders In 1992 CSAT convened a Consensus Panel of experts on adolescent substance use disorder treatment to produce guidelines for treatment programs on designing and delivering effective services to adolescent clients The clients addressed in the TIP included among others young people involved with the juvenile and criminal justice systems CSAT also intended for the Panel s guidelines to help governmental agencies and treatment providers establish fund operate monitor and evaluate treatment programs for substance using adolescents The result of that Panel s work was TIP 4 Guidelines for the Treatment of Alcohol and Other Drug Abusing Adolescents In July 1997 CSAT convened a small Revision Panel to review TIP 4 The Panel recommended changes and developed content for this revised TIP Since the publication of TIP 4 the understanding of substance use disorders and its treatment among adolescents has advanced More is known today about the immediate and long term physiologic behavioral and social consequences of use abuse and dependency New research attention has begun to examine the effectiveness of various treatment methods and components that meet the specific treatment needs of substance using adolescents and this literature is reviewed However the literature is small Fortunately a large multisite national study on the effectiveness of treatment for adolescent substance users is underway with funds from the National Institute on Drug Abuse CSAT is also conducting studies on adolescents focusing on marijuana treatment diversion programs in the juvenile justice system JJS and exemplary treatment programs The field will likely mature greatly by the knowledge advanced from these studies The structure of the earlier TIP of separate inpatient and outpatient treatment chapters which represented a continuum of service intensity was viewed by the Revision Panel to be less central to treatment decisions than a continuum based on the severity of the substance use disorder This shift in focus better reflects clinical experience extant treatment research and the recent changes regarding reimbursement by health care payors for treatment However the Revision Panel retained a broad definition of treatment Treatment is defined in this TIP as those activities that might be undertaken to deal with problem s associated with substance involvement and with individuals manifesting a substance use disorder Although the Panel recognizes that primary or secondary prevention of substance use are included in expanded definitions of treatment the Panel limited the continuum of interventions to what is traditionally viewed as acute intervention rehabilitation and maintenance The elements of the continuum primarily reflect the treatment philosophies of providers with less emphasis on settings and modalities In addition to defining the treatment needs of adolescents and providing a full description of the use of the severity continuum the Revision Panel focused attention on three common types of treatment for adolescents today 12 Step based treatment treatment in the adolescent therapeutic community and family therapy The 12 Step model lies at the heart of many adolescent treatment programs Therapeutic communities TCs are an intensive type of residential treatment that is attracting attention as a preferred approach for substance using juveniles incarcerated in the justice system Clinicians have found that effective treatment of the adolescent almost always involves the family and the effectiveness of family therapy has been documented extensively particularly among those substance using

adolescents who are normally the most difficult to treat This revision of the earlier TIP then offers guidelines for using the severity continuum to make treatment decisions and for providing three common models of treatment for adolescents with substance use disorders Recommendations of the Revision Panel supported by extensive clinical experience and the literature are summarized below The organization of this TIP reflects the core facets of initiating engaging and maintaining the change process for youths with substance use disorders Chapter 1 details the scope and complexity of the problem Chapter 2 covers factors considered in making treatment decisions and Chapter 3 details the features of successful programs Chapters 4 5 and 6 introduce and describe the treatment approaches used in 12 Step based treatment therapeutic communities and family therapy respectively Chapter 7 discusses adolescents with distinctive treatment needs such as youths involved in the juvenile justice system homeless and runaway youth and youth with coexisting disorders Chapter 8 describes the legal and ethical issues that relate to diagnosis and treatment of adolescents This new TIP derives from CSAT's intention to provide protocols that reflect the work now being done by providers of high quality treatment As with other TIPs this document brings the best knowledge from the field to State and local treatment programs In order to avoid awkward construction and sexism this TIP alternates between he and she for generic examples The companion document TIP 31 Screening and Assessing Adolescents for Substance Use Disorders a revision of TIP 3 has also been published CSAT 1999

Principles of Adolescent Substance Use Disorder Treatment National Drug Abuse, 2018-05-29 Principles of Adolescent Substance Use Disorder Treatment focuses on the unique realities of adolescent substance use which includes abuse of illicit and prescription drugs alcohol and tobacco and the special treatment needs for people aged 12 to 17 The adolescent years are a key window for both substance use and the development of substance use disorders Brain systems governing emotion and reward seeking are fully developed by this time but circuits governing judgment and self inhibition are still maturing causing teenagers to act on impulse seek new sensations and be easily swayed by their peers all of which may draw them to take risks such as trying drugs of abuse What is more because critical neural circuits are still actively forming teens brains are particularly susceptible to being modified by those substances in a lasting way making the development of a substance use disorder much more likely In addition abusing drugs during adolescence can interfere with

meeting crucial social and developmental milestones and also compromise cognitive development Historically the focus with adolescents has tended to be on steering young people clear of drugs before problems arise But the reality is that different interventions are needed for adolescents at different places along the substance use spectrum and some require treatment not just prevention Scientific research has now established the efficacy of a number of treatment approaches that can address substance use during the teen years This guide describes those approaches as well as presents a set of guiding principles and frequently asked questions about substance abuse and treatment in this age group **Adolescent**

Substance Abuse Gary Lawson, Ann W. Lawson, 1992 This comprehensive book not only covers treatment of the adolescent population it also looks at the causes issues and related problems special groups and prevention It provides a solid etiological background for why adolescents use drugs and explores a broad range of treatment approaches **Clinical Manual of Youth Addictive Disorders** Yifrah Kaminer, M.D., M.B.A., Ken C. Winters, Ph.D., 2019-10-30 This long awaited follow up to the classic text Clinical Manual of Adolescent Substance Abuse Treatment presents the latest research on substance use and substance use disorders SUDs in adolescents 12-18 and emerging adults 18-25 years of age This new manual offers a substantive update of the previous manual's 16 chapters offering 7 additional chapters devoted to important new topics such as pediatric primary care assessment and intervention electronic tools specific substances e.g. cannabis opioids alcohol and much more Psychiatrists psychologists social workers and substance abuse specialists as well as applied researchers and public health professionals will find this new manual a research rich and clinically compelling resource for understanding disease course prevention diagnosis substance specific interventions co-occurring disorders and issues related to special populations **Preventing Youth Substance Abuse** Patrick H. Tolan, José Szapocznik, Soledad Sambrano, 2007

Adolescent substance use can interfere with cognitive emotional and social development and may even affect later functioning in adult domains such as parenting and employment The Center for Substance Abuse Prevention CSAP recognized that this problem does not arise anew in adolescence but in fact has roots in childhood CSAP identified four critical predictors from childhood for substance use that could be valuable targets for prevention of adolescent substance use parental management of and involvement with the child and the child's social competence self regulation and school achievement In this book the editors bring together a body of intervention research into a practical guide that shows how seven selected prevention programs address these risk factors After introducing the developmental and setting factors that affect risk for substance use a general framework for translating this research into practice is provided Chapters describing each intervention contain user friendly explanations of the theoretical basis intended population methods and procedures and critical implementation characteristics of each program and summarize how it was tested and shown to reduce risk for substance abuse Illustrative case examples are woven throughout the text showing the benefits gained from the approach The book is organized to describe interventions that apply to participants at differing developmental periods Chapters

include programs for universal or general population and for high risk youth and families The included chapters cover programs developed and tested for a variety of ethnic and cultural groups across varying locations Brief Interventions for Adolescent Alcohol and Substance Abuse Peter M. Monti,Suzanne M. Colby,Tracy O'Leary Tevyaw,2018-05-04 Bringing together leading experts this book demonstrates the unique value of brief motivational interventions for addressing adolescent alcohol and other substance use in a range of clinical contexts It presents cutting edge knowledge on the etiology and developmental context of adolescent addictive behaviors and reviews exemplary treatment approaches Effective strategies are described for intervening with diverse populations such as college students youth in the justice system and in foster care those with co occurring substance abuse and psychiatric problems LGBT youth and Latino and American Indian adolescents This book replaces the editors influential earlier work Adolescents Alcohol and Substance Abuse With an expanded focus on practical applications most content is completely new **Helping Students Overcome Substance Abuse** Jason J. Burrow-Sanchez,Leanne S. Hawken,2013-12-17 Unique in its coverage of both prevention and intervention this book provides evidence based strategies and ready to use tools for addressing substance abuse in middle and high school settings Readers learn ways to identify students at risk and implement programs that meet a broad continuum of needs from psychoeducational and support groups to individual intervention and referral to community services Also provided is up to date information on the nature of adolescent substance abuse problems their prevalence and how they develop Clearly organized and accessible the book is designed for optimal practical utility Special features include illustrative case examples resources and reproducible worksheets and forms This book is in The Guilford Practical Intervention in the Schools Series edited by T Chris Riley Tillman **Clinical Handbook of Adolescent Addiction** Richard Rosner,2012-11-19 Since 1960 the burden of adolescent illness has shifted from the traditional causes of disease to the more behavior related problems such as drinking smoking and drug abuse nearly half of American adolescents have used an illicit drug sometime during their life Instilling in adolescents the knowledge skills and values that foster physical and mental health will require substantial changes in the way health professionals work and the way they connect with families schools and community organizations At the same time the major textbooks on addiction medicine and addiction psychiatry devote relatively little attention to the special problems of diagnosing and treating adolescent addicts Similarly the major textbooks on general and child and adolescent psychiatry direct relatively little attention to the issues surrounding adolescent addiction The Clinical Handbook of Adolescent Addiction is one response to the challenge of meeting the mental health needs and behavior related problems of addicted teenagers The work has been edited as an independent project by members of the American Society for Adolescent Psychiatry the oldest professional organization of psychiatrists devoted solely to the mental health care and treatment of teenagers in the USA The forensic psychiatry perspective permeates the entire book It will help to produce health providers with a deep and sensitive understanding of the developmental needs and behavior related problems of

adolescents The Clinical Handbook of Adolescent Addiction is a practical tool for all those who help adolescents practitioners of family medicine general psychiatrists child adolescent psychiatrists adolescent psychiatrists addiction psychiatrists non psychiatric physicians specializing in addiction medicine forensic psychiatrists psychologists clinical social workers mental health administrators Court Probation Parole Correctional health workers The book is organized in a user friendly format so that readers can easily locate the chapters that provide the information that is required In some instances topics of special importance deliberately have been addressed in more than one chapter to illuminate the topics from a variety of vantage points One aim of the editors is to move the topic from being a specialist area to a generalist one by providing tools for generalist to use **Adolescents and Substance Use** Philip James,Catriona Kearns,Ann Campbell,Bobby nP.

Smyth,2013-09-30 Highly Commended BMA Medical Book Awards 2014This highly practical manual presents an ideal introduction to adolescent substance use It offers invaluable guidance for all professionals involved with adolescents including social workers health and social care professionals youth workers family support workers teachers counsellors mental heal **Adolescent Substance Abuse** Yifrah Kaminer,2013-06-29 This volume provides a unique and advantageous perspective to the trainees and practitioners in the adolescent substance abuse field It offers a sophisticated perspective on addiction treatment techniques developed in recent years with a sensitivity to the social and developmental needs of the adolescent Marc Galanter from the Foreword
