Yuichi Yokoyama New Engineering:

□□□□ Yuichi Yokoyama,2011 The first book of colour paintings and comics from the New York Times acclaimed and Eisner nominated manga artist Yuichi Yokoyama is designed and edited by the artist himself It seamlessly integrates his lush painted canvases often presented as fold out pages with a sequence of comic strips in a variety of techniques photography loose marker drawings hyper real portraiture and much more Throughout Yokoyama continues his investigations into the world of machines architecture and post human fashion **New Engineering** Yuichi Yokoyama,2007 Combines two of Yokoyama s central themes fighting and building One set of stories details massive structures being erected across a landscape Plot is pushed aside in favor of sheer formal verve as we watch buildings about which we know nothing come into being The other set of stories is one sequence after another of elegantly choreographed battles Yokoyama builds things up and tears them down Speculative Everything Anthony Dunne,Fiona Raby,2013-12-06 How to use design as a tool to create not only things but ideas to speculate about possible futures Today designers often focus on making technology easy to use sexy and consumable In Speculative Everything Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas For them design is a means of speculating about how things could be to imagine possible futures This is not the usual sort of predicting or forecasting spotting trends and extrapolating these kinds of predictions have been proven wrong again and again Instead Dunne and Raby pose what if questions that are intended to open debate and discussion about the kind of future people want and do not want Speculative Everything offers a tour through an emerging cultural landscape of design ideas ideals and approaches Dunne and Raby cite examples from their own design and teaching and from other projects from fine art design architecture cinema and photography They also draw on futurology political theory the philosophy of technology and literary fiction They show us for example ideas for a solar kitchen restaurant a flypaper robotic clock a menstruation machine a cloud seeding truck a phantom limb sensation recorder and devices for food foraging that use the tools of synthetic biology Dunne and Raby contend that if we speculate more about everything reality will become more malleable The ideas freed by speculative design increase the odds of achieving desirable futures **Spaces of Possibility** Clark W. Sorensen,Andrea Gevurtz Arai,2016-07-01 Spaces of Possibility which arose from a 2012 conference held at the University of Washington s Simpson Center for the Humanities engages with spaces in between and beyond the national borders of Japan and Korea Some of these spaces involve the ambiguous longings and aesthetic refigurings of the past in the present the social possibilities that emerge out of the seemingly impossible new spaces of development the opportunities of genre and spaces of new ethical subjectivities Museums colonial remains new architectural spaces graffiti street theater popular song recent movies photographic topography and translated literature all serve as keys for unlocking the ambiguous and contradictory yet powerful emotions of spaces whether in Tokyo Seoul or New York PEN America 14: The Good Books , *The Comics Journal* ,2008 *Iceland* Yuichi Yokoyama,2017 A new
