No Communication with the Sea Tim Sullivan, 2010-11-15 Few other places in the United States are as high dry sparsely inhabited and urbanized as the Great Basin of Utah and Nevada The great majority of the population of this rapidly growing region lives in the two metropolitan areas at its edges Salt Lake City and the Wasatch Front and Reno and the Truckee Meadows These cities embody the allure and the challenge of the contemporary American West deemed by some The New American Heartland

No Communication with the Sea is a journey through this urbanizing Great Basin landscape Here the land fosters illusions of limitless space and resources but its space and resources are severely limited its people live clustered in cities but are often reluctant to embrace urbanity These tensions led journalist and urban planner Tim Sullivan to explore the developing centers and edges of the Great Basin cities and the ways some are trying to build livable and sustainable urban environments In this highly readable book of creative nonfiction Sullivan employs a variety of methods including interviews research travelogues and narrative to survey the harsh landscape for clues to the ways cities can adapt to their geography topography ecology hydrography history and culture

No Communication with the Sea embarks on a quest for a livable future for the heart of the interior West In the process it both unearths the past and ponders the present and future Great Basin cities

Islands Magazine ,2000-02 **Great Salt Lake** Gary Topping,2002 Probably Utah's most widely recognized topographical feature the Great Salt Lake is possibly also the state's least appreciated and understood one While visitors often feel compelled to take a closer look at it and even test its salinity by dipping a finger or a toe many native Utahns and tourists never take the time to explore the lake more extensively or to learn about its many facets Awaiting those who do so is the discovery of just how fascinating a place the lake is As Gary Topping points out in his introduction Great Salt Lake sounds like someone's literary fantasy a vast interior sea bordered by marshes and dotted with islands that support thousands of shore birds of a great variety of species yet flanked on other sides by an immense salt waste that forbids human habitation Great Salt Lake remains one of the world's most remarkable geological phenomena a place of beauty drama and complexity to challenge the most ambitious curiosity and imagination To encourage a deeper knowledge and understanding of this unique body of water Topping has assembled some of the best historical and contemporary writing on Great Salt Lake The authors include historical figures such as Osborne Russell Jedediah Smith John C Fremont Howard Stansbury and less known Alfred Lambourne a turn of the century artist and western Thoreau who sought solitude and contemplation by building a house on remote Gunnison Island Also included are selections from more recent writing about the lake among them pieces by well known historians Dale Morgan and Brigham Madsen and other essays that look at the varied ways recreational and economic that people have used or sought to use the lake The subjects of the collected pieces range from fantastic stories people tell about this odd inland sea to attempts they have made to exploit it for commercial value from exploration and emigration to recreation and resorts from the lake's prehistory to its future as development and population growth near its shores create conflicting demands and pressures

Intermountain West is home to some of the world's rarest and most fascinating animals and plants. *Creatures of Habitat* details many unique but little known talents of this region's strange and wonderful wild inhabitants and describes their connections with native environments. For example, readers will learn about the pronghorn antelope's supercharged cardiovascular system, a brine shrimp powered shorebird that each year flies nonstop from the Great Salt Lake to Central Argentina, and a rare mustard plant recently discovered on Mount Ogden. Emphasizing how increasing loss and degradation of habitat hinders native species survival, Mark Gerard Hengesbaugh discusses what is happening to wildlife and wild places and what is being done about it. Well illustrated, this book has habitat maps, pen and ink illustrations, and fifty photos of wildlife and wild places selected by photo editor Dan Miller. Also included are guides to wildlife viewing and lists of Utah species including those considered sensitive, threatened, or endangered.
