Western Civilizations JUDITH ET AL. COFFIN, Anglo-Chinese Relations During the Seventeenth and Eighteenth Centuries Earl Hampton Pritchard, 1929

Dutch Reformed Orthodoxy and Islam Felipe Boechat Asseruy Silva, 2025-03-10 However turbulent and virulent Christian Muslim Relations may have been throughout the centuries it does not mean that each side did not take the time to evaluate and appreciate each other s theological dogmas Felipe Boechat Asseruy Silva shows that although Christians were subjected to constant attacks and invasions by the Turks for multiple centuries they eventually Early Modern Period sought to refine their thinking about Islam and evaluate its theological tenets in a semi dispassionate form and to provide a large scale reply In the Medieval period in depth analysis of Islam from a purely theological

philosophical point of view were rare Most publications frequently resorted to the use of offensive and inaccurate language which at times fomented a disagreement between the parties based not on real theological differences besides the obvious political differences but on imagined ones This volume shows that Post Reformation Reformed Orthodox theologians especially those from the Dutch Republic after having access to a long legacy of Christian Muslim written publications collected by Dutch Universities were able to build much more refined arguments and indeed present well informed apologetical theological and historical arguments against Islam The author also shows that the intense commerce between Christian and Islamic nations and the contemporary flourishing of orientalist studies in the Dutch Universities contributed to the formation of an intellectual arena that was willing to overlook past animosities and focus on the theological differences addressing them as such

The School of Montaigne in Early Modern Europe Warren Boutcher, 2017 The second volume of a major two volume study of the fortunes of Michel de Montaigne's *Essais* in both the early modern 1580-1725 and modern periods 1900-2000 Volume Two focuses on the reader writers across Europe who used the *Essais* to make their own works

The Formation of Christian Europe Owen M. Phelan, 2014-10-23 The Formation of Christian Europe analyses the Carolingians efforts to form a Christian Empire with the organizing principle of the sacrament of baptism Owen M Phelan argues that baptism provided the foundation for this society and offered a medium for the communication and the popularization of beliefs and ideas through which the Carolingian Renewal established the vision of an *imperium christianum* in Europe He analyses how baptism unified people theologically socially and politically and helped Carolingian leaders order their approaches to public life It enabled reformers to think in ways which were ideologically consistent publically available and socially useful Phelan also examines the influential court intellectual Alcuin of York who worked to implement a sacramental society through baptism The book finally looks at the dissolution of Carolingian political aspirations for an *imperium christianum* and how by the end of the ninth century political frustrations concealed the deeper achievement of the Carolingian Renewal

Globalism, Nationalism, Tribalism Paul James, 2006-04-20 Paul James has written a magnificent account of the world's current condition one that highlights the complexities and contradictions with which people communities and nations must contend and that does so in a compelling and creative style Stressing the interaction between global and local forces his writing style is lively and compelling as well as peppered with a wide range of citations from *Woman's Day* to the *Cambodian Daily* on the same page James N Rosenau University Professor of International Affairs The George Washington University Globalism Nationalism Tribalism establishes a new basis for understanding the changing nature of polity and community and offers unprecedented attention to these dominant trends Paul James charts the contradictions and tensions we all encounter in an era of increasing globalization from genocide and terrorism to television and finance capital Globalism is treated as an uneven and layered process of spatial expansion not simply one of disorder fragmentation or rupture Nor is it simply a force of homogenization Nationalism is taken seriously as a continuing and

important formation of contemporary identity and politics James rewrites the modernism theories of the nation state without devolving into the postmodernist assertion that all is invention or surface gloss Tribalism is given the attention it has long warranted and is analyzed as a continuing and changing formation of social life from the villages of Rwanda to the cities of the West Theoretically adept and powerfully argued this is the first comprehensive analysis that brings these crucial themes of contemporary life together

The Nature of the Book Adrian Johns, 2009-05-15 In *The Nature of the Book* a tour de force of cultural history Adrian Johns constructs an entirely original and vivid picture of print culture and its many arenas commercial intellectual political and individual A compelling exposition of how authors printers booksellers and readers competed for power over the printed page The richness of Mr Johns s book lies in the splendid detail he has collected to describe the world of books in the first two centuries after the printing press arrived in England Alberto Manguel Washington Times A mammoth and stimulating account of the place of print in the history of knowledge Johns has written a tremendously learned primer D Graham Burnett New Republic A detailed engrossing and genuinely eye opening account of the formative stages of the print culture This is scholarship at its best Merle Rubin Christian Science Monitor The most lucid and persuasive account of the new kind of knowledge produced by print A work to rank alongside McLuhan John Sutherland The Independent Entertainingly written The most comprehensive account available well documented and engaging Ian Maclean Times Literary Supplement

The Politics of Rationality Charles Webel, 2013-12-04 What are reason and rationality How significant are recent postmodernist and neuroscientific challenges to these longheld notions Should we abandon a belief in reason and an adherence to rationality Or can reason and rationality be reformulated and reframed And what does politics have to do with how we think about reason and why we act more or less rationally The Politics of Rationality differs from other books with reason or rationality due to its historical political depth psychological and multidisciplinary approach to understanding reason through history Charles P Webel eloquently clarifies the links among ideas their creators the relevant mental processes and the political cultures within which such important concepts as reasons and rationality take hold He demonstrates how reason and rationality irrationality have become what they mean for us today and proposes a way to rethink reason and rationality in light of the withering critiques leveled against them In doing so he presents a history of reason and rationality by examining the intellectual and political contexts of four representative theorists of reason and rationality Plato Machiavelli Kant and Weber and by addressing contemporary challenges posed by postmodernism depth psychology and neurophilosophy

Anticorruption in History Ronald Kroeze, André Vitória, Guy Geltner, 2017-12-01 Anticorruption in History is a timely and urgent book corruption is widely seen today as a major problem we face as a global society undermining trust in government and financial institutions economic efficiency the principle of equality before the law and human wellbeing in general Corruption in short is a major hurdle on the path to Denmark a feted blueprint for stable and successful statebuilding The resonance of this view explains why efforts to promote anticorruption policies have

proliferated in recent years But while the subject of corruption and anticorruption has captured the attention of politicians scholars NGOs and the global media scant attention has been paid to the link between corruption and the change of anticorruption policies over time and place with the attendant diversity in how to define identify and address corruption Economists political scientists and policy makers in particular have been generally content with tracing the differences between low corruption and high corruption countries in the present and enshrining them in all manner of rankings and indices The long term trends social political economic cultural potentially undergirding the position of various countries plays a very small role Such a historical approach could help explain major moments of change in the past as well as reasons for the success and failure of specific anticorruption policies and their relation to a country s image of itself or as construed from outside as being more or less corrupt It is precisely this scholarly lacuna that the present volume intends to begin to fill The book addresses a wide range of historical contexts Ancient Greece and Rome Medieval Eurasia Italy France Great Britain and Portugal as well as studies on anticorruption in the Early Modern and Modern era in Romania the Ottoman Empire the Netherlands Germany Denmark Sweden and the former German Democratic Republic
