Wetland Landscape Characterization Ricardo D. Lopez, John G. Lyon, Lynn K. Lyon, Debra K. Lopez, 2013-03-27 Wetlands are by their very nature ephemeral and transitional which makes them challenging to characterize Yet the need for characterizing wetlands continues to grow particularly as we develop a better understanding of the wealth of ecosystem services that they provide This book provides practical tools and methods to help practitioners more effectively locate identify and map the extent of wetlands and therefore better understand the importance of wetlands to society and the larger landscape The authors address jurisdictional regulatory and practical applications from the scientific engineering and lay perspectives Numerous techniques examples figures and lessons learned supply the ideas and solutions needed for solving the complex issues associated with wetlands This second edition has been updated throughout and includes more techniques examples and illustrations

Geo-Spatial Technologies in Urban Environments Ryan R. Jensen, Jay D. Gatrell, Daniel McLean, 2005-08-29 Using Geospatial Technologies in Urban Environments simultaneously fills two gaping vacuums in the scholarly literature on urban geography The first is the clear and straightforward application of geospatial technologies to practical urban issues By using remote sensing and statistical techniques correlation regression analysis the expansion method factor analysis and analysis of variance the thors of these 12 chapters contribute significantly to our understanding of how geospatial methodologies enhance urban studies For example the GIS Specialty Group of the Association of American Geographers AAG has the largest m bership of all the AAG specialty groups followed by the Urban Geography S cialty Group Moreover the Urban Geography Specialty Group has the largest number of cross memberships with the GIS Specialty Group This book advances this important geospatial and urban link Second the book fills a wide void in the urban environment literature Although the Annals of the Association of American Geographers has recently established an editorship devoted to human environmental issues Nature and Society re tively few of the articles in this section of the

journal have focused specifically on urban environmental topics Likewise of the textbooks in urban geography published over the past decade Knox 1994 Pacione 2001 Kaplan Wheeler and Holloway 2004 none has offered a single chapter on urban environmental questions and only passing references to such topics as urban heat islands
