

What Is Called Thinking? (Harper Perennial Modern Thought)

For an acquaintance with the thought of Heidegger, *What Is Called Thinking?* is as important as *Being and Time*. It is the only systematic presentation of the thinker's late philosophy and . . . it is perhaps the most exciting of his books.--Hannah Arendt

introductions to theories paradigm shifts and key concepts in postqualitative feminist new materialist and critical posthumanist research The ten authors who have a wealth of experience of teaching and conducting postqualitative research have explored 72 key concepts and binaries Supported by links to the series website <https://postqualitative-research.com> this user friendly glossary contains short entries of the main concepts binaries and verbs in this field of research The series website gives practical provocations that characterize the postqualitative terrain Disrupting the theory practice divide the Glossary provides a postqualitative reimagining of traditional research processes while guiding readers through the contestation of binaries and innovative concepts The Glossary is an accessible and introductory guide for novice qualitative researchers and is of use to established academics already working with postqualitative approaches It is an indispensable companion to the primary texts and original sources by theorists discussed in this and other books in the series

Being and Film Christine Reeh-Peters, 2021-03-16 This book develops the so called solaristic ontology of film by building a philosophical system based on an inquiry into the nature of film being and reality This solaristic system appropriates the aesthetic ideas and principles of thought present in the 1972 sci fi movie *Solaris* by Andrei Tarkovsky This movie is the main center of analysis here since it is highly symptomatic of the medium's philosophical self reflexivity and its intriguing correlation with reality and being The solaristic science is a fictional science introduced in the movie's diegesis and dedicated to the investigation of the planet Solaris an unattainable challenge In this sense the solaristic system closes the film's narrative by telling a philosophical story on the planet Solaris The book thus details a philosophical form of concept art and at the same time builds on previous results of film philosophy as well as the speculative turn in contemporary philosophy

Complexity and Values in Nurse Education Martin Lipscomb, 2022-07-06 This work explores the interplay of complexity and values in nurse education from a variety of vantages Contributors who come from a range of international and disciplinary backgrounds critically engage important and problematic topics that are under investigated elsewhere Taking an innovative approach each chapter is

followed by one or more responses and on occasion a reply to responses This novel dialogic feature of the work tests animates and enriches the arguments being presented Thought provoking challenging and occasionally rumbustious in tone this volume has something to say to both nurse educators who may find cherished practices questioned and students Given the breadth and nature of subjects covered the book will also appeal to anyone concerned about and interested in nursing s professional development trajectory

Self Definition Teodros Kiros,2019-10-10 *Self Definition* argues that sex gender and race are constructions by the ineffable self as it seeks to define its possibilities free of domination The self s embodiments are themselves performances of self definition Teodros Kiros supports his argument by a careful reading of the literature from both the Global South and Global North that spans figures works and eras from antiquity to our late modern present These readings demonstrate that race gender and sex are performed in the Global South radically differently from in the Global North These three notions as markers of identity are fluid open and expansive and Kiros brilliantly shows this through inquiry into thought rooted in Egypt Ethiopia India and China By the time that the Global North forges possibilities of the self in the modern period race gender and sex become fixed Biology and anatomy become understood as destinies and the possibilities of the self are deeply constrained This book approaches case studies of key figures and movements chronologically and thematically and in doing so Kiros highlights the tensions between the openness of the Global South and the rigidity of the Global North through which human possibilities as exercises of self definition become clear under conditions of freedom Our views of self definition will forever be transformed after reading this important text

Heidegger, the Introduction of Nazism Into Philosophy in Light of the Unpublished Seminars of 1933-1935 Editions Albin Michel,Emmanuel Faye,2009-01-01 In the most comprehensive examination to date of Heidegger s Nazism Emmanuel Faye draws on previously unavailable materials to paint a damning picture of Nazism s influence on the philosopher s thought and politics In this provocative book Faye uses excerpts from unpublished seminars to show that Heidegger s philosophical writings are fatally compromised by an adherence to National Socialist ideas In other documents Faye finds expressions of racism and exterminatory anti Semitism Faye disputes the view of Heidegger as a na ve temporarily disoriented academician and instead shows him to have been a self appointed spiritual guide for Nazism whose intentionality was clear Contrary to what some have written Heidegger s Nazism became even more radical after 1935 as Faye demonstrates He revisits Heidegger s masterwork *Being and Time* and concludes that in it Heidegger does not present a philosophy of individual existence but rather a doctrine of radical self sacrifice where individualization is allowed only for the purpose of heroism in warfare Faye s book was highly controversial when originally published in France in 2005 Now available in Michael B Smith s fluid English translation it is bound to awaken controversy in the English speaking world

Heidegger and the Lived Experience of Being a University Educator Joshua Spier,2018-02-09 This book explores the lived meanings of being a university educator from an existential perspective The book enriches our understanding of educators experiences in light of Martin Heidegger s early

philosophy and vice versa opening our understanding of Heidegger's philosophy through educators' experiences. Also drawing on the philosophical insights of Hans Georg Gadamer, the book situates the purposes and experiences of the educator in historical and contemporary contexts. In doing so, the author reveals that being a university educator is essentially characterised by conversation and time. Inspired by the author's own experiences of teaching community development and sociology within a youth work specific bachelor degree, the book invites educators to apply existential philosophy as a tool to reflect upon their own experiences and to reconnect with the question of what it means to be an educator in their shared world of practice. This thoughtful volume is sure to resonate with the experiences of readers who educate within a university context.

Hermeneutic Phenomenology in Health and Social Care Research Susan Crowther, Gill Thomson, 2022-08-23

This book explores how, why, and when hermeneutic phenomenology can be used as a methodology in health and social research. Providing actual examples of doing robust hermeneutic phenomenology and a focus on praxis, the book demonstrates how philosophical or theoretical notions can inform, enrich, and enhance our research projects. The chapters offer examples of many different research designs and interpretive decisions in order to illustrate the unbounded and creative nature of this type of inquiry, whilst also demonstrating the trustworthiness of the scientific processes adopted. The chapter authors invite the reader on a unique journey that highlights how they made individual and tailored decisions throughout their projects, emphasising the challenges and joys they encountered. This book is a valuable resource for all students and academics who wish to explore the meaningfulness of human lived experiences across the multitude of phenomena in health and social care.

Thinking about Technology Gil Germain, 2017-08-04

The world we make reflects the way reality is perceived, and today the world is perceived primarily in technological terms. So argues Gil Germain in *Thinking About Technology: How the Technological Mind Misreads Reality*. Given the connection between perception and action or thinking and doing, Germain first highlights the central features of technological worldview to better understand the contemporary drive to master the conditions of human existence. He then boldly proposes that the technological worldview seriously misreads the nature of the world it seeks mastery over and shows how this misinterpretation invariably leads to the technologically related challenges currently vexing the contemporary social order: from the drift toward a posthuman future to the anti-globalization backlash. Germain closes *Thinking About Technology* by articulating an alternative worldview to the technological perspective and illustrating how this re-reading of reality might help us inhabit the technological landscape in ways better attuned to the human condition.

Henry Miller: The Inhuman Artist Indrek Männiste, 2013-06-20

Against skeptics, Männiste argues that Miller does indeed have a philosophy of his own which underpins most of his texts. It is demonstrated that this philosophy, as a metaphysical sense of life, forms a system the understanding of which is necessary to adequately explain even some of the most basic of Miller's ideas. Building upon his notion of the inhuman artist, Miller's philosophical foundation is revealed through his literary attacks against the metaphysical design of the modern age. It is

argued that by repudiating some of the most potent elements of late modernity such as history modern technology and an aesthetisized view of art Miller paves the way for overcoming Western metaphysics Finally it is showed that philosophically this aim is governed by Miller s idiosyncratic concept of art in which one is led towards self liberation through transcending the modern society and its dehumanizing pursuits New Studies in Indian and Comparative Philosophy Ravindra Raj Singh,Jacqueline Kumar,2025-04-29 New Studies in Indian and Comparative Philosophy presents innovative research on pivotal themes in Indian philosophy that have often been misinterpreted or overlooked It illuminates key ideas through fresh perspectives and critical analyses offering a richer understanding of their global significance In addition to new explorations of Indian philosophical concepts the book investigates how Western thinkers including Schopenhauer Simone Weil and others engaged deeply with Indian thought These cross cultural forays are thoroughly evaluated highlighting both the Western philosophers enduring interest in Indian philosophy and the broader intellectual dialogues that arise from such engagements The result is a thought provoking volume that underscores the continuing relevance of Indian philosophy in contemporary global discourse *Possibilities of Place in Continental Thought* Jussi Palmusaari,Nicolas Schneider,2024-09-05 Exploring the critical potential of place in continental philosophy Possibilities of Place in Continental Thought tests the political and ontological valences of this concept to go beyond the limits of existing geographical and phenomenological approaches Considering place as emergent relational and enveloping or in connection to passage becoming or redemption the contributions to this volume point to the possibilities inherent in philosophical uses of place By rejecting a singular and homogenous theory of place this collection collapses the dichotomies that tend to characterize the discourse on place in favour of a plural conceptualization It draws attention to the spatial and temporal dynamics within varying theoretical and historical contexts and moves the field forward in significant and vital ways **New Trinitarian Ontologies, Volume I** John Milbank,Ryan Haecker,JD Lyonhart,2025-11-11 The Holy Trinity is the oldest idea of Christian hope The study of being or ontology was once regarded as a seminal preparation for the study of God as the creative cause of all being in theology Yet due to a series of theological mistakes metaphysics came to be separated from the Trinity before God came to be conceived as the supreme being of all beings in general metaphysics natural theology and modern ontology The analytic and continental philosophical traditions have since tended to treat the Trinity as at best superfluous and at worst redundant to modern formal ontologies Yet the postmodern collapse of all such formal ontologies has prepared the path for a renewed study of metaphysics or ontology that shares in participation with the Trinity New Trinitarian Ontologies names a creative response to this pivotal collapse of modern formal ontologies If ontology cannot contain but rather more radically points to God and if all nature thus tends towards the supernatural the angelic and the metaphysical then we should renew the study of the metaphysics or ontology of the Trinity This volume represents a collection of responses to this challenge of rendering ontology in a Trinitarian style *The Oxford Handbook of Process Philosophy and Organization*

Studies Jenny Helin, Tor Hernes, Daniel Hjorth, Robin Holt, 2014-05-15 Process approaches to organization studies focus on flow activities and evolution understanding organizations and organizing as processes in the making They stand in contrast to positivist approaches that see organizations and phenomena as fixed static and measurable Process approaches draw on a range of ideas and philosophies The Handbook examines 34 philosophers and social theorists both those commonly linked to process thinking such as Whitehead Bergson and James and those that are not as often addressed from a process perspective such as Dilthey and Tarde Each chapter addresses the background and context of this thinker their work with a focus on the processual elements and the potential contribution to organization and management research For students and scholars in the field of Organization Studies this book is an entry point into the work of philosophical thinkers and social theorists for whom the world is far from being a solid place

How the Neoliberalization of Academia Leads to Thoughtlessness

Justin Pack, 2018-11-15 Universities across the US have committed to a process of neoliberalization that is radically altering higher education academia is increasingly being run like a business As a result the university is becoming less and less a place of wonder self cultivation and thinking and instead is becoming more and more a place to specialize strategize produce and profit Students race through coursework to bolster job prospects while facing massive debt Faculty scramble for the biggest grants and angle for the most prestigious journals Sink or swim publish or perish triumph and win there is no longer time to think and to wonder This undermines the opportunity for students to develop into good citizens that can truly think critically and judge carefully Thinking and judgment are according to the philosopher Hannah Arendt the only things that can save us if the powerful machines of science or capitalism begin to work in ways they should not Arendt saw Nazi Germany use the newest science and the best economic management to systematically kill six million Jews She saw the disturbing inability of the populace and the intellectuals to capably resist the Nazi machine once it got rolling Applying Arendt's insights to modern academia Pack argues that unless checked neoliberalization threatens to turn the university into a place that discourages thinking and the development of judgment in favor of hyper specialization and strategic action

Science Meets Philosophy

Hans Christian Garmann Johnsen, 2023-04-26 The book is an attempt to bring together what are often seen as incommensurable scientific and philosophical positions Its core argument is that a main reason for the divisions about what constitutes scientific knowledge relates to disagreements on philosophical issues The book explores what these disagreements are about and discusses whether they can be overcome Taking a historical perspective the book traces the divides in science back to three main philosophical traditions realism idealism and scepticism It maps how these have inspired three main current positions in science logical empiricism phenomenology and sociology of scientific knowledge The book is intended for a general audience concerned with today's debates on scientific knowledge and society It will be useful for students and researchers studying philosophy of science sociology of scientific knowledge realism phenomenology positivism logical empiricism analytical philosophy and sustainable scientific knowledge

Philosophy as Orientation Emilio

Carlo Corriero, 2025-10-30 Emilio Carlo Corriero makes a radical intervention on the question of the Anthropocene proposing that to rethink our relationship with nature also requires the rediscovery of philosophy understood as orientation. This book contends that the environmental issue is a philosophical problem and outlines the theoretical contradictions that must first be overcome to effectively resolve the difficulties on a practical level. At the moment in which the human being discovers himself as a natural force capable of annihilating himself and other species, it is necessary to rethink human action in terms of cooperation with other entities, a natural world to which the human being belongs with his acts and his thoughts. Unlike other human activities, philosophy is capable of taking the right distance and orienting creativity, ultimately assigning a new meaning to the earth. *Philosophy as Orientation* draws on Anglophone philosophical traditions and philosophers including Dewey, Rorty, Wittgenstein, Williams, Cavell, and Putnam. It puts these traditions and thinkers into a generative dialogue with continental philosophers, in particular Schelling and Nietzsche, providing a novel framework for understanding ecological crisis. Translated by Vanessa Di Stefano, this book will be essential reading not only for philosophers but also for those in environmental humanities and science studies.
