What Is Urban History What Is History Series:

What is Urban History? Shane Ewen, 2016-09-12 Urban history is a well established and flourishing field of historical research. Written by a leading scholar, this short introduction demonstrates how urban history draws upon a wide variety of methodologies and sources and has been integral to the rise of interdisciplinary and comparative approaches to history since the second half of the twentieth century. Shane Ewen offers an accessible and clearly written guide to the study of urban history for the student, teacher, researcher or general reader who is new to the field and interested in learning about past approaches as well as key themes, concepts and trajectories for future research. He takes a global and comparative viewpoint, combining a discussion of classic texts with the latest literature to illustrate the current debates and controversies across the urban world. The historiography of the field is mapped out by theme, including new topics of interest with a particular focus on space and social identity, power and governance, the built environment, culture and modernity, and the growth and spread of transnational networking. By discussing a number of historic and fast growing cities across the world, *What is Urban History* demonstrates the importance of the history of urban life to our understanding of the world both in the present and the future. As a result, urban history remains pivotal for explaining the continued growth of towns and cities in a global context and is particularly useful for identifying the various problems and solutions faced by fast growing megacities in the developing world.

Urban Space and Urban History in the Roman World Miko Flohr, 2020-05-25 This volume investigates how urban growth and prosperity transformed the cities of the Roman Mediterranean in the last centuries BCE and the first centuries CE, integrating debates about Roman urban space with discourse on Roman urban history. The contributions explore how these cities developed landscapes full of civic memory and ritual, saw commercial priorities transforming the urban environment and began to expand significantly beyond their wall circuits. These interrelated developments not only changed how cities looked and could be experienced but they also affected the functioning of the urban community and together contributed to keeping increasingly complex urban communities socially cohesive. By focusing on the transformation of urban landscapes in the Late Republican and Imperial periods, the volume adds a new, explicitly historical angle to current debates about urban space in Roman studies. Confronting archaeological and historical approaches, the volume presents developments in Italy, Africa, Greece and Asia Minor, thus significantly broadening the geographical scope of the discussion and offering novel theoretical perspectives alongside well documented thematic case studies. *Urban Space and Urban History in the Roman World* will be of interest to anyone working on Roman urbanism or Roman history in the Late Republic and early Empire.

1870-1950 Eszter Gantner, Heidi Hein-Kircher, Oliver Hochadel, 2020-10-22 Around 1900 cities in Southern and Eastern Europe were persistently labeled backward and delayed. Allegedly they had no alternative but to follow the role model of the metropolises of London, Paris or Vienna. This edited volume fundamentally questions this assumption. It shows that cities as diverse as Barcelona, Berdyansk, Budapest, Lviv, Milan, Moscow, Prague, Warsaw and Zagreb pursued their own agendas of modernization. In order to solve their pressing problems with respect to urban planning and public health, they searched for best practices abroad. The solutions they gleaned from other cities were eclectic to fit the specific needs of a given urban space and were thus often innovative. This applied urban knowledge was generated through interurban networks and multi-directional exchanges. Yet in the period around 1900, this transnational municipalism often clashed with the forging of urban and national identities, highlighting the tensions between the universal and the local. This interurban perspective helps to overcome nationalist perspectives in historiography as well as outdated notions of center and periphery. This volume will appeal to scholars from a large number of disciplines including urban historians, historians of Eastern and Southern Europe, historians of science and medicine, and scholars interested in transnational connections. **Introduction to the Urban**

History of China Chonglan Fu, Wenming Cao, 2019-07-25 This book explores China's urban development, examining the history and culture of Chinese cities and providing a cultural background to the rapid urban development of contemporary China. It offers a new perspective on Chinese urban history, showcasing the traditional culture which underpins the emergence of the modern city and highlighting how traditional Chinese philosophical thought is reflected in the culture of urban planning and architecture in China, notably examining such issues as the integration of man and nature, yin and yang, bagua, and the Wu Xing. Urban Life in Nordic Countries Heiko Droste, 2023-12-18 Based on empirical studies, this book investigates the particular urban history of the North from the 17th century until today in a comparative Northern perspective. Urban Life in Nordic Countries is the result of a conference on Urbanity in the Periphery held in Stockholm on the occasion of the 100th anniversary of the Institute of Urban History at Stockholm University, aimed at establishing the field of the urban history of the North and creating a network of urban historians of the North. With a broad range of contributions from Sweden, Finland, Denmark, Norway, and Estonia, the volume seeks to further discourse on the region within national and transnational lenses and to highlight possibilities for new cooperation among researchers. Urban history is a transdisciplinary subject engaging not only historians but also ethnologists, sociologists, urban planners, and cultural geographers, and this book targets all scholars whose work requires a historical understanding of the Northern town. European urban historians outside the region will also find this text valuable as one of the few studies to consider the urban history of the continent from a North-centered viewpoint. **African American Urban History since World War II**

Our Urban Planet in Theory and History Carl Nightingale, 2024-06-06 This Element offers seven propositions toward a theory of Our Urban Planet that is useful to global urban historians I argue that historians have much to offer to theorists particularly those involved in debates over planetary urbanization theory and the Anthropocene We must enlarge our concept of urban to include spaces that make cities possible and that cities make possible and become comfortable with longer temporal frames that nest global urban history within Earth Time Above all we need to add the crucial dimension of power redefining cities as spaces that humans produce to amplify harvests of geo solar energy and deploy human power within space and time The element uses insights from deep history to set the stage for a theory by verb elaborating the many paradoxes of humans 6 000 year gamble with the Urban Condition and explaining cities own intrinsic capacity to outrun their own theorizability

The History of Urban Planning in Spain, Portugal and Morocco Carmen Hass-Klau,2025-09-08 This book includes a historic overview of urban planning in the Iberian Peninsula and Morocco from 700 AD until the 20th century Under Muslim rule there was an urban sophistication which was unfamiliar in the Christian world The conquest of Granada and the discovery of America was seen as the beginning of a new era but this book presents a different view of Spain and Portugal which does not equate with the glamorous picture usually painted Chapters detail the untold story of Muslim refugees who founded towns in Morocco and how the conflicts between Morocco and Spain started not only politically but also in terms of town planning when Spain took over the Moroccan north The history of Islamic city planning shows more consistency compared to the Christian equivalent which became dominant worldwide whereas the Islamic approach is mainly forgotten Despite this the change from Islamic to Christian cities was extremely slow regardless of the power of the church and the wealth which came from abroad In tracing this history this book seeks to highlight the past in order to learn from it and move towards building a future of livable cities This book will be of interest to students and instructors of planning history urban planning and human geography and to people who are generally interested in history and cities
