Toward A Political Philosophy Of Race Suny Series Philosophy And Race:

Toward a Political Philosophy of Race Falguni A. Sheth, 2009-03-05 Timely controversial and incisive *Toward a Political Philosophy of Race* looks uncompromisingly at how a liberal society enables racism and other forms of discrimination Drawing on the examples of the internment of U S citizens and residents of Japanese descent of Muslim men and women in the contemporary United States and of Asian Indians at the turn of the twentieth century Falguni A Sheth argues that racial discrimination and divisions are not accidents in the history of liberal societies Race she contends is a process embedded in a range of legal technologies that produce racialized populations who are divided against other groups Moving past discussions of racial and social justice as abstract concepts she reveals the playing out of race racialization of groups and legal frameworks within concrete historical frameworks Book jacket

The Assisted Reproduction of Race Camisha A. Russell, 2018-12-06 The use of assisted reproductive technologies ART in vitro fertilization artificial insemination and gestational surrogacy challenges contemporary notions of what it means to be parents or families Camisha A Russell argues that these technologies also bring new insight to ideas and questions surrounding race In her view if we think of ART as medical technology we might be surprised by the importance that people using them put on race especially given the scientific evidence that race lacks a genetic basis However if we think of ART as an intervention to make babies and parents as technologies of kinship the importance placed on race may not be so surprising after all Thinking about race in terms of technology brings together the common academic insight that race is a social construction with the equally important insight that race is a political tool which has been and continues to be used in different contexts for a variety of ends including social cohesion economic exploitation and political mastery As Russell explores ideas about race through their role in ART she brings together social and political views to shift debates from what race is to what race does how it is used and what effects it has had in the world

Genealogies of Terrorism Verena Erlenbusch-Anderson, 2018-07-31 What is terrorism What ought we to do about it And why is it wrong We think we have clear answers to these questions But acts of violence like U S drone strikes that indiscriminately kill civilians and mass shootings that become terrorist attacks when suspects are identified as Muslim suggest that definitions of terrorism are always contested In *Genealogies of Terrorism* Verena Erlenbusch Anderson rejects attempts to define what terrorism is in favor of a historico philosophical investigation into the conditions under which uses of this contested term become meaningful The result is a powerful critique of the power relations that shape how we understand and theorize political violence Tracing discourses and practices of terrorism from the French Revolution to late imperial Russia colonized Algeria and the post 9 11 United States Erlenbusch Anderson examines what we do when we name something terrorism She offers an important corrective to attempts to develop universal definitions that assure semantic consistency and provide normative certainty showing that terrorism means many different things and serves a wide range of political purposes In the tradition of Michel Foucault s genealogies Erlenbusch Anderson

excavates the history of conceptual and practical uses of terrorism and maps the historically contingent political and material conditions that shape their emergence She analyzes the power relations that make different modes of understanding terrorism possible and reveals their complicity in justifying the exercise of sovereign power in the name of defending the nation class or humanity against the terrorist enemy Offering an engaged critique of terrorism and the mechanisms of social and political exclusion that it enables *Genealogies of Terrorism* is an empirically grounded and philosophically rigorous critical history with important political implications *The Power of Feminist Theory* Amy Allen, 2025-06-17 In this new second edition of *The Power of Feminist Theory Domination Resistance Solidarity* Amy Allen diagnoses the inadequacies of previous feminist conceptions of power and draws on the work of a diverse group of theorists of power including Michel Foucault Judith Butler bell hooks and Hannah Arendt in order to construct a new feminist conception of power The conception of power developed in this book enables readers to theorize domination resistance and solidarity and perhaps more importantly to do so in a way that illuminates the interrelatedness of these three modalities of power The new edition of this foundational text includes substantial new material on intersectionality and power transnational feminism and power in relation to homonationalism and neo imperialism and empowerment feminism It addresses important criticisms of Foucault Arendt and Butler that have been raised by Black feminists critical philosophers of race postcolonial theorists and Marxists *The Power of Feminist Theory Domination Resistance Solidarity* is an essential text for students engaging with feminist analyses of power feminist theory and feminist political thought **Hip Hop and Political Voice for Young South Sudanese Australians** Sarah J. Williams, 2024-12-15 *Hip Hop and Political Voice for Young South Sudanese Australians Born to Stand Out* explores the building of political voice of young South Sudanese Australians to resist racialising discourses particularly through hip hop Presented as an ethnography Sarah J Williams draws on empirical evidence from a youth participatory action research project facilitated by a small nonprofit organisation Footprints Each chapter foregrounds counter narratives young South Sudanese Australian hip hop artists portray in response to over a decade of media and moral panics targeting their communities limiting their sense of freedom and resulting in a rise in youth suicide The core message throughout suggests participants reject any goal of or focus on fitting in Instead based on their conviction that they are born to stand out these activists carve out space in the face of racialising discourses perpetuated primarily by Australian Whiteness Through the lenses of new social movements and theories and perspectives informed by critical race theory and critical Hip Hop pedagogy this book expands race and ethnicity as a central theme by exploring how the political voice of this group of young South Sudanese Australians manifests in important new ways that conventional theories of activism and resistance may not capture Participants embark on consciousness raising practices to reframe and assert their multiple identities whilst establishing themselves as social agents in the world *Race after Sartre* Jonathan Judaken, 2008-08-26 *Race after Sartre* is the first book to systematically interrogate Jean Paul Sartre s antiracist politics and his largely

unrecognized contributions to critical race theories postcolonialism and Africana existentialism The contributors offer an overview of Sartre's positions on racism as they changed throughout the course of his life providing a coherent account of the various ways in which he understood how racism could be articulated and opposed They interrogate his numerous and influential works on the topic and his insights are utilized to assess some of today's racial quandaries including the November 2005 riots in France Hurricane Katrina immigration affirmative action and reparations for slavery and apartheid The contributors also consider Sartre's impact upon the insurgent antiracist activists and writers who also walked the roads to freedom that Sartre helped pave **IBSS: Political Science: 2009 Vol. 58** The British Library of Political and Economic Sciences, 2010-11

Phenomenology and the Political S. West Gurley, Geoff Pfeifer, 2016-10-12 This timely volume brings together a diverse group of expert authors in order to investigate the question of phenomenology's relation to the political These authors take up a variety of themes and movements in contemporary political philosophy Some of them put phenomenology in dialogue with feminism or philosophies of race others with Marxism and psychoanalysis while others look at phenomenology's historical relation to politics The book shows the ways in which phenomenology is either itself a form of political philosophy or a useful method for thinking the political It also explores the ways in which phenomenology falls short in the realm of the political Ultimately this collection serves as a starting point for a groundbreaking dialogue in the field about the nature of the relationship between phenomenology and the political It is a must read for anyone who is interested in phenomenology or contemporary social and political philosophy *Global Origins of the Modern Self, from Montaigne to Suzuki* Avram

Alpert, 2019-04-16 In *Global Origins of the Modern Self from Montaigne to Suzuki* Avram Alpert contends that scholars have yet to fully grasp the constitutive force of global connections in the making of modern selfhood Alpert argues that canonical moments of self making from around the world share a surprising origin in the colonial anthropology of Europeans in the Americas While most intellectual histories of modernity begin with the Cartesian inward turn Alpert shows how this turn itself was an evasion of the impact of the colonial encounter He charts a counter history of the modern self tracing lines of influence that stretch from Michel de Montaigne's encounter with the Tupi through the writings of Jean Jacques Rousseau

into German Idealism American Transcendentalism postcolonial critique and modern Zen Alpert considers an unusually wide range of thinkers including Kant Hegel Fanon Emerson Du Bois Senghor and Suzuki This book not only breaks with disciplinary conventions about period and geography but also argues that these conventions obscure our ability to understand the modern condition *Philosophy of Culture as Theory, Method, and Way of Life* ,2022-05-16 The idea of culture comprises almost all human activities from science to art from music to microscopy Does anything important escape the limits of this idea The authors of this collection argue that all philosophy is really the philosophy of culture since in some way each and every discipline and subdiscipline is foremost a manifestation of our collective cultural effort Further they argue that by engaging with philosophy as a cultural activity and as a discipline to meaningfully engage with all dimensions of inter cultural life we can live more meaningful flourishing and wisely guided lives **Constructing the Nation** Mariana Ortega,Linda Martín Alcoff,2009-10-23 Philosophers and social theorists of color examine how racism can creep into defensive forms of nationalism **A Radical Political Theology for the Anthropocene Era** Ryan LaMothe,2021-11-18 Given the fierce urgency of now this important book confronts and addresses key problems and questions of political theology with the aim of proposing a radical political theology for the Anthropocene Age LaMothe invites readers to think and be otherwise in living lives in common with all other human beings and other than human beings that dwell on this one earth *MLA International Bibliography of Books and Articles on the Modern Languages and Literatures* ,2007 **Toward a Philosophy of Error in Science** Douglas Allchin,2025-12-19 History is littered with scientific errors This contrasts sharply with the image of science as providing a systematic method that reliably yields trustworthy knowledge Toward a Philosophy of Error in Science seeks to resolve this puzzle *Desire beyond Identity* Wesley N. Barker,2025-04-01 Critically adapts the notion of desire in Luce Irigaray s philosophy to rethink the role of embodiment in sociopolitical and philosophical discourses today Arguing for a radical return to desire in Luce Irigaray s thought this book decisively intervenes in impassés around questions of identity that continue to confound contemporary discourse and politics By prioritizing the disruptive potential of desire rather than sexual difference Wesley N Barker extends Irigaray s relational theory of becoming into new territory opening generative often surprising pathways for conversation with philosophies of race queer theory political theology decolonial theory and posthuman thought As a source for reimagining materiality desire is pulled free of a phallogocentric white colonial framework and mobilized toward a philosophy of living capable of addressing the twenty first century s multifaceted crises of identity representation and embodiment **Braided Selves** Pamela Cooper-White,2011-06-10 What if we are more multiple as persons than traditional psychology has taught us to believe And what if our multiplicity is a part of how we are made in the very image of a loving relational multiple God How have modern Western notions of Oneness caused harm to both individuals and society And how can an appreciation of our multiplicity help liberate the voices of those who live at the margins both of society and within our own complex selves Braided Selves

explores these questions from the perspectives of postmodern pastoral psychology and Trinitarian theology with implications for the practice of spiritual care counseling and psychotherapy This volume gathers ten years of essays on this theme by preeminent pastoral theologian Pamela Cooper White whose writings bring into dialogue postmodern feminist and psychoanalytic theory and constructive theology *Whitaker's Books in Print* ,1998 **Play Among Books** Miro Roman,Alice _ch3n81,2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science **Resources in Education** ,1997 **Blackness Visible** Charles W. Mills,2015-11-20 Charles Mills makes visible in the world of mainstream philosophy some of the crucial issues of the black experience Ralph Ellison s metaphor of black invisibility has special relevance to philosophy whose demographic and conceptual whiteness has long been a source of wonder and complaint to racial minorities Mills points out the absence of any philosophical narrative theorizing and detailing race s centrality to the recent history of the West such as feminists have articulated for gender domination European expansionism in its various forms Mills contends generates a social ontology of race that warrants philosophical attention Through expropriation settlement slavery and colonialism race comes into existence as simultaneously real and unreal ontological without being biological metaphysical without being physical existential without being essential shaping one s being without being in one s shape His essays explore the contrasting sums of a white and black modernity examine standpoint epistemology and the metaphysics of racial identity look at black Jewish relations and racial conspiracy theories map the workings of a white supremacist polity and the contours of a racist moral consciousness and analyze the presuppositions of Frederick Douglass s famous July 4 prognosis for black political inclusion Collectively they demonstrate what exciting new philosophical terrain can be opened up once the color line in western philosophy is made visible and addressed
