Spatial Boundaries, Abounding Spaces Mohit Chandna,2021-06-30 Colonialism advanced its project of territorial expansion by changing the very meaning of borders and space The colonial project scripted a unipolar spatial discourse that saw the colonies as an extension of European borders In his monograph Mohit Chandna engages with narrations of spatial conflicts in French and Francophone literature and film from the nineteenth to the early twenty first century In literary works by Jules Verne Ananda Devi and Patrick Chamoiseau and film by Michael Haneke Chandna analyzes the depiction of ever changing borders and spatial grammar within the colonial project In so doing he also examines the ongoing resistance to the spatial legacies of colonial practices that act as omnipresent enforcers of colonial borders Literature and film become sites that register colonial spatial paradigms and advance competing narratives that fracture the dominance of these borders

Through its analyses Spatial Boundaries Abounding Spaces shows that colonialism is not a finished project relegated to our past Colonialism is present in the here and now and exercises its power through the borders that define us **20,000 LEAGUES UNDER THE SEA** Jules Verne, 2005 20 000 Leagues Under the Sea by Jules Verne PART ONE CHAPTER I A SHIFTING REEF The year 1866 was signalised by a remarkable incident a mysterious and puzzling phenomenon which doubtless no one has yet forgotten Not to mention rumours which agitated the maritime population and excited the public mind even in the interior of continents seafaring men were particularly excited Merchants common sailors captains of vessels skippers both of Europe and America naval officers of all countries and the Governments of several States on the two continents were deeply interested in the matter For some time past vessels had been met by an enormous thing a long object spindle shaped occasionally phosphorescent and infinitely larger and more rapid in its movements than a whale The facts relating to this apparition entered in various log books agreed in most respects as to the shape of the object or creature in question the untiring rapidity of its movements its surprising power of locomotion and the peculiar life with which it seemed endowed If it was a whale it surpassed in size all those hitherto classified in science Taking into consideration the mean of observations made at divers times rejecting the timid estimate of those who assigned to this object a length of two hundred feet equally with the exaggerated opinions which set it down as a mile in width and three in length we might fairly conclude that this mysterious being surpassed greatly all dimensions admitted by the learned ones of the day if it existed at all And that it DID exist was an undeniable fact and with that tendency which disposes the human mind in favour of the marvellous we can understand the excitement produced in the entire world by this supernatural apparition As to classing it in the list of fables the idea was out of the question On the 20th of July 1866 the steamer Governor Higginson of the Calcutta and Burnach Steam Navigation Company had met this moving mass five miles off the east coast of Australia Captain Baker thought at first that he was in the presence of an unknown sandbank he even prepared to determine its exact position when two columns of water projected by the mysterious object shot with a hissing noise a hundred and fifty feet up into the air Now unless the sandbank had been submitted to the intermittent eruption of a geyser the Governor Higginson had to do neither more nor less than with an aquatic mammal unknown till then which threw up from its blow holes columns of water mixed with air and vapour Similar facts were observed on the 23rd of July in the same year in the Pacific Ocean by the Columbus of the West India and Pacific Steam Navigation Company But this extraordinary creature could transport itself from one place to another with surprising velocity as in an interval of three days the Governor Higginson and the Columbus had observed it at two different points of the chart separated by a distance of more than seven hundred nautical leagues La littérature d'imagination scientifique Daniel Fondanèche, 2012 Preliminary Material Introduction Les conditions d'urgence de la littérature d'imagination scientifique Les pré curseurs de la littérature d'imagination scientifique L'urgence de la littérature d'imagination scientifique Les maîtres du genre Conclusion Brève chronologie du XIXe siècle Les principales inventions au XIXe
