Wetenschap Als Mensenwerk Over De Rol Vd Natuurwetenschap In De Samenleving:

The Paradox of Scientific Authority Wiebe E. Bijker, Roland Bal, Ruud Hendriks, 2009 Assessing the influence of scientific advice in societies that increasingly question scientific authority and expertise Today scientific advice is asked for and given on questions ranging from stem cell research to genetically modified food And yet it often seems that the more urgently scientific advice is solicited the more vigorously scientific authority is questioned by policy makers stakeholders and citizens This book examines a paradox how scientific advice can be influential in society even when the status of science and scientists seems to be at a low ebb The authors do this by means of an ethnographic study of the creation of scientific authority at one of the key sites for the interaction of science policy and society the scientific advisory committee The Paradox of Scientific Authority offers a detailed analysis of the inner workings of the influential Health Council of the Netherlands the equivalent of the National Academy of Science in the United States examining its societal role as well as its internal functioning and using the findings to build a theory of scientific advising The question of scientific authority has political as well as scholarly relevance Democratic political institutions largely developed in the nineteenth century lack the institutional means to address the twenty first century s pervasively scientific and technological culture and science and technology studies STS grapples with the central question of how to understand the authority of science while recognizing its socially constructed nature The Diversification of Health Bart Penders, 2014-03-15 Complex problems and ambitious goals are often thought to become easier by enlarging and diversifying the group of experts dealing with them As a result these complex entities are fragmented into smaller ones that can be dealt with by single laboratories Bart Penders ventured into nutrition science to observe and join teams of scientists to find out what happens to these problems and goals He attended conferences and workshops and worked in their laboratories He shows that scientists mobilise everything in their power to solve problems they reconstruct elements of the problem such as our health In the process the search for health has led to its diversification **Chemie en Licht** Fred Brouwer, 2008-07-28 Wanneer zonlicht valt op groene bladeren wordt een deel ervan geabsorbeerd waardoor in het blad een serie chemische reacties op gang wordt gebracht die uiteindelijk leidt tot de opslag van energie in de vorm van brandstof Dit is een onmisbaar chemisch proces voor het leven op aarde zoals wij dat kennen Het is een fantastische uitdaging voor het vakgebied van de moleculaire fotonica om dit proces op de n of andere manier na te bootsen stelt Fred Brouwer De potentiële maatschappelijke betekenis van zulk onderzoek is groot ook al zijn er vele factoren die bepalen hoe de toekomstige energievoorziening van de mensheid eruit zal zien Of kunstmatige fotosynthese daarin een rol zal spelen moet de toekomst uitwijzen Andere uitdagingen die in de rede van Brouwer aan de orde komen zijn het realiseren van door licht aangestuurde moleculaire machines en andere nano functionele materialen Daarnaast stipt hij enkele toepassingen van de fotochemie en spectroscopie aan die een heel direct technologisch en maatschappelijk belang hebben bijvoorbeeld in de polymeerchemie en de forensische opsporing 13 Shirō Hattori, 1983
