NEW Living Science BIOLOGY for CLASS 9, The Cancer Problem Agnes Arnold-Forster, 2022-01-19 The Cancer Problem offers the first medical cultural and social history of cancer in nineteenth century Britain It begins by looking at a community of doctors and patients who lived and worked in the streets surrounding the Middlesex Hospital in London It follows in their footsteps as they walked the labyrinthine lanes and passages that branched off Tottenham Court Road then through seven chapters its focus expands to successively include the rivers lakes and forests of England the mountains poverty and hunger of the four nations of the British Isles the reluctant and resistant inhabitants of the British Empire and the networks of scientists and doctors spread across Europe and North America The Cancer Problem Malignancy in Nineteenth Century Britain argues that it was in the nineteenth century that cancer acquired the unique emotional symbolic and politicized status it maintains today Through an interrogation of the construction deployment and emotional consequences of the disease's incurability this book reframes our conceptualization of the relationship between medicine and modern life and reshapes our understanding of chronic and incurable maladies both past and present

The Living Signature: The Body's Power to Heal and the Question of Design Dr. Octavian Caius Obeada, 2025-06-26 In The Living Signature The Body's Power to Heal and the Question of Design science and spirit converge in a captivating exploration of the human body as more than mere biology Drawing from philosophy theology medicine and biology this book challenges the view that life is the product of blind chance From the cellular dance of regeneration to the breathtaking orchestration of body systems it reveals signs of purpose woven into the fabric of life itself For the scientist the skeptic and the seeker alike this is an invitation to see the body not just as alive but as alive with meaning I will praise thee for I am fearfully and wonderfully made wrote a grateful King David in Psalm 139 three thousand years ago He didn't know the half of it In this marvelous book Dr Octavian Caius Obeada focuses on the marvelous ability of life to regenerate and heal itself surveying what philosophers and theologians throughout the ages have surmised and detailing the intricate molecular mechanisms that have been discovered by scientists only in recent decades The result is a tour de force showcasing the intelligent design of life Michael J Behe PhD Professor of Biological Sciences at Lehigh University in Pennsylvania and a Senior Fellow at Discovery Institute's Center for Science and Culture and author of Darwin's Black Box The Living Signature by Dr Octavian Caius Obeada is a profound exploration of the human body's regenerative

capacity framed as both a scientific marvel and a philosophical clue to purposeful design Drawing on decades of medical experience and insights from biology theology and systems thinking the book challenges reductionist views by asking whether healing is merely mechanical or a message of intention With compelling case studies and a multidisciplinary lens this work invites readers to see the human body not as an accident but as a living signature of meaning and design Adrian Anthony Dormans MD FFAFP From skin and bone to organs and DNA the regenerative capabilities of the human body are not only astonishing they hint at something deeper The Living Signature lays out thoughtful well researched reflections and challenges you to consider whether the complexity and order we see in ourselves could truly be the product of blind chance or the body itself is whispering something about its origin a message not of randomness but of meaning Costiuc Alexandru M D Specialist in Gastroenterology Regina Maria Romania Resident Physician in Family Medicine University of Oradea

The SAGE Encyclopedia of Theory in Science, Technology, Engineering, and Mathematics James Mattingly, 2022-09-21 The SAGE Encyclopedia of Theory is a landmark work that examines theory in general and the broad split between the hard and soft sciences a split that is being re examined as approaches to scientific questions become increasingly multidisciplinary

Logan,2013-03-20 Early in the twentieth century arguments about nature and nurture pitted a rigid genetic determinism against the idea that genes were flexible and open to environmental change This book tells the story of three Viennese biologists Paul Kammerer Julius Tandler and Eugen Steinach who sought to show how the environment could shape heredity through the impact of hormones It also explores the dynamic of failure through both scientific and social lenses During World War I the three men were well respected scientists by 1934 one was dead by his own hand another was in exile and the third was subject to ridicule Paul Kammerer had spent years gathering zoological evidence on whether environmental change could alter heredity using his research as the scientific foundation for a new kind of eugenics one that challenged the racism growing in mainstream eugenics By 1918 he drew on the pioneering research of two colleagues who studied how secretions shaped sexual attributes to argue that hormones could alter genes After 1920 Julius Tandler employed a similar concept to restore the health and well being of Vienna s war weary citizens Both men rejected the rigidly acting genes of the new genetics and instead crafted a biology of flexible heredity to justify eugenic reforms that respected human rights But the interplay of science and personality with the social and political rise of fascism and with antisemitism undermined their ideas leading to their spectacular failure **The Historiography of Contemporary Science and Technology** Thomas

Söderquist,2013-01-11 More than ninety percent of all scientific history has been made during the last half century So far however only a fraction of historical scholarship has dealt with this period Merely a decade ago most scientific historians considered recent science the scientific culture created lived and remembered by contemporary scientists an area of study best left to the historical actors themselves Modern Biology V.
