What Is Darwinism And Other Writings On Science And Religion:

What is Darwinism? Charles Hodge, 1994 **What Is Darwinism?** Charles Hodge, 2018-07-14 What is Darwinism by Charles Hodge WHAT IS DARWINISM This is a question which needs an answer Great confusion and diversity of opinion prevail as to the real views of the man whose writings have agitated the whole world scientific and religious If a man says he is a Darwinian many understand him to avow himself virtually an atheist while another understands him as saying that he adopts some harmless form of the doctrine of evolution This is a great evil It is obviously useless to discuss any theory until we are agreed as to what that theory is The question therefore What is Darwinism must take precedence of all discussion of its merits The great fact of experience is that the universe exists The great problem which has ever pressed upon the human mind is to account for its existence What was its origin To what causes are the changes we witness around us to be referred As we are a part of the universe these questions concern ourselves What are the origin nature and destiny of man Professor Huxley is right in saying The question of questions for mankind the problem which underlies all others and is more interesting than any other is the ascertainment of the place which Man occupies in nature and of his relation to the universe of things Whence our race has come what are the limits of our power over nature and of nature s power over us to what goal are we tending are the problems which present themselves anew and with undiminished interest to every man born into the world Mr Darwin undertakes to answer these questions He proposes a solution of the problem which thus deeply concerns every living man Darwinism is therefore a theory of the universe at least so far as the living organisms on this earth are concerned This being the case it may be well to state in few words the other prevalent theories on this great subject that the points of agreement and of difference between them and the views of Mr Darwin may be the more clearly seen We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience **Science and Religion** Gary B. Ferngren, 2017-03-01 An essential examination of the historical relationship between science and religion Since its publication in 2002 *Science and Religion* has proven to be a widely admired survey of the complex relationship of Western religious traditions to science from the beginning of the Christian era to the late twentieth century In the second edition eleven new essays expand the scope and enhance the analysis of this enduringly popular book Tracing the rise of science from its birth in the medieval West through the scientific revolution the

contributors here assess historical changes in scientific understanding brought about by transformations in physics anthropology and the neurosciences and major shifts marked by the discoveries of Copernicus Galileo Isaac Newton Charles Darwin and others In seeking to appreciate the intersection of scientific discovery and the responses of religious groups contributors also explore the theological implications of contemporary science and evaluate approaches such as the Bible in science and the modern synthesis in evolution which are at the center of debates in the historiography understanding and application of science The second edition provides chapters that have been revised to reflect current scholarship along with new chapters that bring fresh perspectives on a diverse range of topics including new scientific approaches and disciplines and non Christian traditions such as Judaism Islam Asiatic religions and atheism This indispensable classroom guide is now more useful than ever before Contributors Richard J Blackwell Peter J Bowler John Hedley Brooke Glen M Cooper Edward B Davis Alnoor Dhanani Diarmid A Finnegan Noah Efron Owen Gingerich Edward Grant Steven J Harris Matthew S Hedstrom John Henry Peter M Hess Edward J Larsen Timothy Larson David C Lindberg David N Livingstone Craig Martin Craig Sean McConnell James Moore Joshua M Moritz Mark A Noll Ronald L Numbers Richard Olson Christopher M Rios Nicolaas A Rupke Michael H Shank Stephen David Snobelen John Stenhouse Peter J Susalla Mariusz Tabaczek Alan C Weissenbacher Stephen P Weldon and Tomoko Yoshida The Charles Colson Collection: The Good Life / How Now Shall We Live? Charles Colson,2017-01-10 This collection bundles two of popular author Chuck Colson s classics into one volume for a great value The Good Life What constitutes the good life Chuck Colson explores the ways in which people define and live the pursuit of happiness Colson uses fascinating real life stories to illustrate the philosophies and worldviews by which individuals seek the good life Colson speaks directly and revealingly about his Watergate years and he examines the beliefs and assumptions that make up the fabric of our lives The Good Life searches for answers to the questions we all ask Who am I Why am I here How can I make my life count How Now Shall We Live True Christianity goes far beyond John 3 16 beyond private faith and personal salvation It is nothing less than a framework for understanding all of reality It is a worldview In How Now Shall We Live the 2000 Gold Medallion winner for best book about Christianity and society Chuck Colson and Nancy Pearcey show that the great spiritual battle today is a cosmic struggle between competing worldviews Through inspiring true stories and compelling teaching they demonstrate how to Expose the false views and values of modern culture Live a more fulfilling life the way God created us to live Contend for the faith by understanding how nonbelievers think Build a society that reflects biblical principles In short How Now Shall We Live will give you the confidence you need to make a difference in the world today and most of all in the lives of people around you **Evangelicals and Science in Historical Perspective** David N. Hastings,2017-07-28 This book re imagines the universe and the scientific study of it through the lens of a triune Creator three persons of irreducible identity in a perichoretic or coinherent communion It modestly proposes that Trinitarian theology and especially the coinherent natures of the Son in the incarnation provides the metaphysic or theory of everything that manifests itself in the subject matter of science The presence of the image of the triune God in humanity and of traces of this God in the non human creation are discussed highlighting ontological resonances between God and creation resonances between the being of God and his creation such as goodness immensity yet particularity intelligibility agency relationality and beauty This Trinitarian reality suggests there should be a similarity also with respect to how we know in theology and science critical realism something reflected in the history of ideas in each These resonances lead to the conclusion that the disciplines of theology and science are in fact coinherent not conflicted This involves recognition of both the mutuality of these vocations and also importantly their particularity Science its own distinct guild yet finds its place ensconced within an encyclopedic theology and subject to first order credal theology **The Perils of Human Exceptionalism** Dennis L.

Durst,2022-07-18 Over the course of the nineteenth century transatlantic intellectuals slowly revised theological anthropology or the doctrine of humanity seen in light of the divine Gradually elite discourse deposed humanity from its lofty estate and centering it within a naturalistic account wherein likeness to animal fauna became the central evaluative lens Durst argues that theological anthropologies across the disciplines increasingly shifted focus away from classic confessional themes such as the soul and the image of God and toward the methods of natural theology and intuitionism This occurred in the form of challenges to theology in biology phrenology transcendentalism anti theology Christian socialism intuitionism and religious experience The human soul and human sinfulness also found a revised articulation in terms increasingly shaped by the cultural authority of science An ascendant subjective approach to human nature emerged whereby religious experiences not theological claims to truth assumed prominence as the central measures of religious life Evolution, Scripture, and Science

B. B. Warfield,2019-09-10 Are naturalistic and Christian creation irreconcilable ideologies In this collection of B B Warfield s writings editors Mark A Noll and David N Livingstone demonstrate that theologians have not always thought so Around the turn of the twentieth century Princeton theologian B B Warfield believed that synthesizing his commitment to the scientific validity of evolution and to the inerrancy of the Bible was an attainable theological task By drawing reasonable distinctions among Darwinism Charles Darwin and evolution he was able to accept the probability of evolution while denying the implications of full blown Darwinism In the realm of inerrancy and evolution Warfield s writings exemplify civil Christian scholarship and shrewd scientific discernment The editors have carefully gleaned Warfield s writings on evolution and inerrancy from theological essays book reviews lectures and historical papers Editorial headnotes introduce the reader to each article s context and content However the editors let Warfield s articles speak for themselves and inform the contemporary dialogue between science and theology Referring to the current debate the editors concur that One way of

jolting discussion about science and theology out of the fervent but also intellectually barren stand offs of recent decades is to note one of the best kept secrets in American intellectual history B B Warfield Where Darwin Meets the Bible Larry Witham,2005 Where Darwin Meets the Bible provides an account of the lasting conflict between creationists and evolutionists **The Liturgy of Creation** Michael LeFebvre,2019-08-06 How were holidays chosen and taught in biblical Israel and what did they have to do with the creation narrative Michael LeFebvre considers the calendars of the Pentateuch arguing that dates were added to Old Testament narratives not as journalistic details but to teach sacred rhythms of labor and worship LeFebvre then applies this insight to the creation week finding that the days of creation also serve a liturgical purpose *The Authority of Scripture in Reformed Theology* Henk van den Belt,2007-12-01 The authority of Scripture is the cornerstone of Reformed theology Calvin introduced the term *autopistos* from Greek philosophy to express that this authority does not depend on the church or on rational arguments but is self convincing After dealing with Calvin s Institutes the development of Reformed orthodoxy and the positions of Benjamin B Warfield and Herman Bavinck the author draws theological conclusions advocating a renewed emphasis on the *autopistia* of Scripture as starting point for Reformed theology in a postmodern context The subject object scheme leads to separating the certainty of faith from the authority of Scripture The *autopistia* of Scripture understood as a confessional statement implies that truth and trust are inseparable **Darwin's God** Cornelius G. Hunter,2019-10-01 Cornelius Hunter brilliantly supports his thesis that Darwinism is a mixture of metaphysical dogma and biased scientific observation that at its core evolution is about God not science Phillip E Johnson author Darwin on TrialBiophysicist Cornelius Hunter argues perceptively that the main supporting pole of the Darwinian tent has always been a theological assertion God wouldn t have done it that way Rather than demonstrating that evolution is capable of the wonders they attribute to it Darwinists rely on a man made version of God to argue that He never would have made life with the particular suite of features we observe In lucid and engaging prose Hunter shines a light on Darwinian theology making plain what is too often obscured by technical jargon Michael J Behe Lehigh UniversityThis wonderfully insightful book will prove pivotal in the current reassessment of Darwinian evolution Darwinists argue that evolution has to be true because no self respecting deity would have created life the way we find it Hunter unmasks this theological mode of argumentation and argues convincingly that it is not merely incidental but indeed essential to how Darwinists justify evolution William A Dembski Baylor UniversityA fascinating study of a much overlooked aspect of the origins controversy Stephen C Meyer Whitworth College **The Cambridge History of Science: Volume 6, The Modern Biological and Earth Sciences** David C. Lindberg,Peter J. Bowler,Ronald L. Numbers,Roy Porter,2003 This book in the highly respected Cambridge History of Science series is devoted to the history of the life and earth sciences since 1800 It provides comprehensive and authoritative surveys of historical thinking on major developments in these areas of science on the social and cultural milieus in which the knowledge was generated and on the wider impact of the major theoretical and practical

innovations The articles are written by acknowledged experts who provide concise accounts of the latest historical thinking coupled with guides to the most important recent literature In addition to histories of traditional sciences the book covers the emergence of newer disciplines such as genetics biochemistry and geophysics The interaction of scientific techniques with their practical applications in areas such as medicine is a major focus of the book as is its coverage of controversial areas such as science and religion and environmentalism

Science and Religion Yves Gingras, 2017-09-05 Today we hear renewed calls for a dialogue between science and religion why has the old question of the relations between science and religion now returned to the public domain and what is at stake in this debate To answer these questions historian and sociologist of science Yves Gingras retraces the long history of the troubled relationship between science and religion from the condemnation of Galileo for heresy in 1633 until his rehabilitation by John Paul II in 1992 He reconstructs the process of the gradual separation of science from theology and religion showing how God and natural theology became marginalized in the scientific field in the eighteenth and nineteenth centuries In contrast to the dominant trend among historians of science Gingras argues that science and religion are social institutions that give rise to incompatible ways of knowing rooted in different methodologies and forms of knowledge and that there never was and cannot be a genuine dialogue between them Wide ranging and authoritative this new book on one of the fundamental questions of Western thought will be of great interest to students and scholars of the history of science and of religion as well as to general readers who are intrigued by the new and much publicized conversations about the alleged links between science and religion
