Specialised Translation M. Rogers, 2015-05-26 This book shifts the common perception of specialised or LSP translation as necessarily banal and straightforward towards a more realistic understanding of it as a complex and multilayered phenomenon which belies its standard negative binary definition as non literary **The Oxford Handbook of Computational Linguistics** Ruslan Mitkov, 2022-06-02 Ruslan Mitkov s highly successful Oxford Handbook of Computational Linguistics has been substantially revised and expanded in this second edition Alongside updated accounts of the topics covered in the first edition it includes 17 new chapters on subjects such as semantic role labelling text to speech synthesis translation technology opinion mining and sentiment analysis and the application of Natural Language Processing in educational and biomedical contexts among many others The volume is divided into four parts that examine respectively the linguistic fundamentals of computational linguistics the methods and resources used such as statistical modelling machine learning and corpus annotation key language processing tasks including text segmentation anaphora resolution and speech recognition and the major applications of Natural Language Processing from machine translation to author profiling The book will be an essential reference for researchers and students in computational linguistics and Natural Language Processing as well as those working in related industries **Decentering Translation Studies** Judy Wakabayashi, Rita Kothari, 2009-11-12 This book foregrounds practices and discourses of translation in several non Western traditions Translation Studies currently reflects the historiography and concerns of Anglo American and European scholars overlooking the full richness of translational activities and diverse discourses The essays in this book which generally have a historical slant help push back the geographical and conceptual boundaries of the discipline They illustrate how distinctive historical

Efforts and Models in Interpreting and Translation Research Gyde Hansen, Andrew Chesterman, Heidrun Gerzymisch-Arbogast, 2009-01-05 This volume covers a wide range of topics in Interpreting and Translation Research Some deal with scientometrics and the history of Interpreting Studies arguments about conceptual analysis meta language and interpreters risk taking strategies Other papers are on research skills like career management writing communicative abstracts and the practicalities of survey research Several contributions address empirical issues such as expertise in Simultaneous Interpreting the cognitive load imposed on interpreters by a non native accent the impact of intonation on interpreting quality linguistic interference in Simultaneous Interpreting similarities between translation and interpreting and the relation between translation competence and revision competence The collection is a tribute to Daniel Gile in appreciation of his creativity and his commitment to interpreting and translation research All the contributions in some way show his influence or are related to the models and research he has shaped

Self-preservation in Simultaneous Interpreting Claudia Monacelli, 2009-01-01 The image of the tightrope walker illustrates the interpreter's balancing act Compelled to move forward at a pace set by someone else interpreters compensate for pressures and surges that might push them into the void The author starts from the observation that conference interpreters tend to see survival as being their primary objective It is interpreters awareness of the essentially face threatening nature of the profession that naturally induces them to seek what the author calls dynamic equilibrium a constantly evolving state in which problems are resolved in the interests of maintaining the integrity of the system as a whole By taking as a starting point the more visible interventions interpreters make comments on speed of delivery on exchanges between the chair and the floor the author is able to explore the interpreter's instinct for self preservation in an inherently unstable environment This volume is an insightful and refreshing account of interpreters behavior from the other side of the glass fronted booth

Why Translation Studies Matters Daniel Gile, Gyde Hansen, Nike Kocijan, Pokorn, 2010-01-01 Whether Translation Studies really matters is an important and challenging question which practitioners of translation and interpreting raise repeatedly TS scholars many of whom are translators and interpreters themselves are not indifferent to it either The twenty papers of this thematic volume contributed by authors from various parts of Europe from Brazil and from Israel address it in a positive spirit Some do so through direct critical reflection and analysis arguing in particular that the engagement of TS with society should be

strengthened so that the latter could benefit more from the former Others illustrate the relevance and contribution of TS to society and to other disciplines from various angles Topics broached include the cultural mediation role of translators issues in literary translation knowledge as intellectual capital globalization through English and risks associated with it bridging languages mass media corpora training the use of modern technology interdisciplinarity with psycholinguistics and neurophysiology

Descriptive Translation Studies and Beyond Gideon Toury, 1995 A replacement of the author's well known book on Translation Theory In Search of a Theory of Translation 1980 this book makes a case for Descriptive Translation Studies as a scholarly activity as well as a branch of the discipline having immediate consequences for issues of both a theoretical and applied nature Methodological discussions are complemented by an assortment of case studies of various scopes and levels with emphasis on the need to contextualize whatever one sets out to focus on Part One deals with the position of descriptive studies within TS and justifies the author's choice to devote a whole book to the subject Part Two gives a detailed rationale for descriptive studies in translation and serves as a framework for the case studies comprising Part Three Concrete descriptive issues are here tackled within ever growing contexts of a higher level texts and modes of translational behaviour in the appropriate cultural setup textual components in texts and through these texts in cultural constellations Part Four asks the question What is knowledge accumulated through descriptive studies performed within one and the same framework likely to yield in terms of theory and practice This is an excellent book for higher level translation courses
