Each game is played using a map of a continent with each player trying to gather as many followers as possible in order to gain total dominance over the continent and defeating the other players in the process. Deity can be played as a standalone game or if you want to use the tactical combat system option that adds a more strategic feel to it, you can use added rules from the Gaia Saga role playing system **Empirical Studies of Literature**, 1991-01-01 *The Children of Lysandra*

Big Book of Fictional Mythological Stories Yknip Ahsi, 2025-01-20 One of the goals of this book is to highlight the universality of mythological storytelling. Despite the differences in culture and language, the themes and motifs of myths and legends are often strikingly similar. From the hero's journey to the creation myth, from the flood story to the trickster tale, these stories reflect the common concerns and aspirations of humanity. They remind us that no matter where we come from, we share a common heritage of storytelling that has been passed down from generation to generation. Another aim of this book is to showcase the versatility and adaptability of mythological storytelling. The authors of these stories have taken the old myths and infused them with new perspectives, voices, and themes, making them relevant and accessible to contemporary readers. He has used the timeless language and imagery of myth to explore modern concerns and issues such as identity, gender, race, and politics. He has also challenged the traditional narrative structures and conventions of myth, creating stories that are innovative and surprising **Veer Ecology** Jeffrey Jerome Cohen, Lowell Duckert, 2017-12-15

The words most commonly associated with the environmental movement: save, recycle, reuse, protect, regulate, restore, describe what we can do to help the environment, but few suggest how we might transform ourselves to better navigate the sudden turns of the late Anthropocene. Which words can help us to veer conceptually along with drastic environmental flux? Jeffrey Jerome Cohen and Lowell Duckert asked thirty brilliant thinkers to each propose one verb that stresses the forceful potential of inquiry: weather, biomes, apprehensions, and desires to swerve and sheer. Each term is accompanied by a concise essay contextualizing its meaning in times of resource depletion, environmental degradation, and global climate change. Some verbs are closely tied to natural processes: compost, saturate, seep, rain, shade, sediment, vegetate, environ. Many are vaguely unsettling: drown, unmoor, obsolesce, power down, haunt. Others are enigmatic or counterintuitive: curl, globalize, commodify, ape, whirl. And while several verbs pertain to human affect and action: love, represent, behold, wait, try, attune, play, remember, decorate, tend, hope, a primary

goal of Veer Ecology is to decenter the human. Indeed each of the essays speaks to a heightened sense of possibility awakening our imaginations and inviting us to think the world anew from radically different perspectives. A groundbreaking guide for the twenty first century Veer Ecology foregrounds the risks and potentialities of living on and with an alarmingly dynamic planet.

CULTURE OF NAMES IN AFRICA Emma Umana Clasberry, 2012-01-12

INTRODUCTION Personal name is a vital aspect of cultural identity. As a child you may have loved or hated your name. But you were rarely indifferent to it. What's in a name? Shakespeare asked. That which we call a rose by any other name would smell as sweet, he explained. Perhaps in England or somewhere else in Europe but not in Africa. Personal names in African have meanings, can affect personality, hinder or enhance life initiatives. They serve to establish a connection between name and cultural background and thus provide some information about cultural affinity and more such as express one's spirituality, philosophy of life, political or socio-economic status as defined by a given ethnic cleavage. African names tell stories, convert abstract ideas to stories and tell story of the story about different aspects of one's life. They commemorate any unusual circumstance, the family or community once experienced or world event that took place around the time of a child's birth. Outside a given cultural environment names boost and nurture cultural pride and identity, showcase a people's appreciation of their culture and their readiness to defend and live their culture with pride and dignity. Naming practices that tell histories behind the names were the norms in Nigeria. Ibibio and in fact in Africa until the encroachment of two historical forces in Africans' affairs: Christianization and colonization. More than any other forces in history, shattered the connection between personal name and cultural affinity and have ever since contributed to the gradual erosion of African culture of names. On the continent, the combined efforts of their human agents, the missionaries and British colonial personnel, directly and indirectly through their policies and practices, caused African Nigerians to give up their culture-relevant names in favor of foreign ones. Apart from direct erosion of culture of names, colonial administration, a term I use mostly to refer to the combined efforts of the missionaries and British colonial personnel in Nigeria, abrogated many religious, socio-economic and political traditions which were intimately intertwined with the people's naming practices. Their attempt to replace African

traditions with European ones through coercing Africans to accept Western values and beliefs consequently disabled many desirable African traditional structures including authentic African naming practices and caused some to fall into disuse A third force was early European African trade Although the impact of the presence of European merchants in Nigeria was minimal in this regard some of their activities have also left a dent on African naming practices by introducing foreign bodies into the people s names database Even though these alien forces invaded and injected foreign values into Africa over a century ago their impact on naming practices continues to be felt by Africans European intrusion in relation to African naming practices did not end on the continent The Trans Atlantic Trade on human cargo was another major historical event that did not only forcefully disconnect many Africans from their cultural root and natural habitat but also mutilated authentic African naming practices among them Consequently Africans in Diaspora had European names imposed upon them by their slave masters Today many Africans on the continent and in Diaspora continue to carry names which are foreign names whose meanings they do not know names the bearers can not even pronounce correctly in some ethnic contexts and names which have no relevance to nor any form of link with the bearers cultural background In effect culture of names as many other African customary practices has lost its savor Some peoples of African descent still cherish these colonized names Some do not and are making practical efforts to reclaim authentic African cul

Relevance Relations in Discourse Regina Blass, 1990-11-22 This book uses Sperber and Wilson's relevance theory to show that connectivity in discourse is a pragmatic rather than a semantic matter it results from relevance relations between text and context rather than from relations linguistically encoded in the text In two introductory chapters Regina Blass argues that relevance theory offers a more explanatory account of discourse connectivity than do alternative approaches based on notions of cohesion coherence and topic In subsequent chapters she introduces data from the language Sissala and shows how relevance theory can play an important role in guiding and constraining semantic and pragmatic analyses of these data This approach reveals unexpected results for example the detection of an interpretive use marker in Sissala with implications for the analysis of so called hearsay phenomena in other languages and leads to an alternative basis for particle typology
