Unstoppable Global Warming Fred Singer, Dennis Avery, 2006-09-13 Singer and Avery present in popular language supported by in depth scientific evidence the compelling concept that global temperatures have been rising mostly or entirely because of a natural cycle Using historic data from two millennia of recorded history combined with the natural physical records found in ice cores seabed sediment cave stalagmites and tree rings Unstoppable Global Warming argues that the 1500 year solar driven cycle that has always controlled the earth s climate remains the driving force in the current warming trend Trillions of dollars spent on reducing fossil fuel use would have no effect on today s rising temperatures The public policy key Singer and Avery propose is adaptation not fruitless attempts at prevention Further they offer convincing evidence that civilization s most successful eras have coincided with the cycle s warmest peaks With the added benefit of modern technology humanity can not only survive global climate change but thrive The Challenge of Politics Douglas W.

Hart,2015-09-29 The book explores problems and issues that have emerged in national and international discussion of policies to address climate change It concludes that every solution put forward by the UN and activists poses more problems than might ever emerge from the marginal human impact on natural climate change Rather than mitigation governments should focus on adaptation As is climate change discussions have become captive of a utopian agenda that is using climate change as a stalking horse to drive alarm in the hope that it will convince governments to act [OPEC Bulletin](#) ,2008

Indivisible James

Robison, Jay W. Richards, 2012-02-20 Many books have been written on conservative politics. Many more have been written calling Christians to holiness and spiritual revival. Few, however, have managed to combine a clear explanation of the conservative political perspective with its corresponding personal and spiritual virtue. In *INDIVISIBLE*, James Robison, the founder and president of LIFE Outreach International, partners with Jay Richards, Ph.D., a writer who has appeared in both the *New York Times* and *The Washington Post*. Together, they tackle tough, controversial political issues facing conservative Christians today, including abortion, stem cell research, education, economics, health care, the environment, judicial activism, marriage, and others. Written to appeal to a broad spectrum of believers, *INDIVISIBLE* not only argues political questions from a Scriptural standpoint; it also provides simple arguments that Christians can use to support their beliefs in public settings. Most significantly, Robison and Richards recognize that the point of origin for spiritual and moral transformation is the individual. We are convinced by historical precedent that long-term cultural change requires not merely sound thinking and public good works, but rather God's spiritual and moral transformation of us as individuals, which will then transform our churches, our communities, our culture, and ultimately our politics. James Robison is the founder and president of LIFE Outreach International, a worldwide Christian relief organization. He is also the host of *LIFE Today*, a daily syndicated television program that reaches 300 million homes in the U.S., Canada, Europe, and Australia. He is the author of many books, including *The Absolutes*, *True Prosperity*, and *Living in Love*, and has spoken to millions of people through evangelistic crusades since entering public ministry in 1962. Jay W. Richards, Ph.D., is a Senior Fellow at the Discovery Institute and the author of many books, including the award-winning *Money, Greed, and God* and *The Privileged Planet*. He is the executive director of the documentaries *The Call of the Entrepreneur* and *The Birth of Freedom*. He has been featured in the *New York Times* and the *Washington Post* and has appeared on *Larry King Live*. He has also lectured on economic myths to members of the U.S. Congress.
