Urban Commons Rethinking The City Space Materiality And The Normative:

Urban Commons Christian Borch, Martin Kornberger, 2015 This book rethinks the city by examining its various forms of collectivity their atmospheres modes of exclusion and self organization as well as how they are governed on the basis of a critical discussion of the notion of urban commons The idea of the commons has received surprisingly little attention in urban theory although the city may well be conceived as a shared resource *Urban Commons Rethinking the City* offers an attempt to reconsider what a city might be by studying how the notion of the commons opens up new understandings of urban collectivities addressing a range of questi

Urban Commons Christian Borch, Martin Kornberger, 2015-04-10 This book rethinks the city by examining its various forms of collectivity their atmospheres modes of exclusion and self organization as well as how they are governed on the basis of a critical discussion of the notion of urban commons The idea of the commons has received surprisingly little attention in urban theory although the city may well be conceived as a shared resource *Urban Commons Rethinking the City* offers an attempt to reconsider what a city might be by studying how the notion of the commons opens up new understandings of urban collectivities addressing a range of questions about urban diversity urban governance urban belonging urban sexuality urban subcultures and urban poverty but also by discussing in more methodological terms how one might study the urban commons In these respects the rethinking of the city undertaken in this book has a critical dimension as the notion of the commons delivers new insights about how collective urban life is formed and governed

Urban Commons Handbook Urban Commons Research Collective, 2022-05-16 Urban Commons Research Collective Emre Akbil Alex Axinte Esra Can Beatrice De Carli Melissa Harrison Ana M ndez de And s Katharina Moebus Thomas Moore Doina Petrescu Cities have been a critical space of experimentation The urban commons transform cities around the globe through projects and practices that challenge capitalist accumulation extraction and enclosure Together they give shape to a political proposal that requires the invention of new kinds of institutions new kinds of spaces and new kinds of actors in charge of their production and reproduction Understanding the urban commons as open organisational systems for collective management fostered by radical democratic governance models allows us to tackle urgent issues such as climate change and social inequality from a point of view that is both constructive and relational The *Urban Commons Handbook* presents a compilation of definitions experiences and references around some of the questions that arise when thinking about commoning the city

Law, Art and the Commons Merima Bruncevic, 2017-10-12 The concept of the cultural commons has become increasingly important for legal studies Within this field however it is a contested concept at once presented as a sphere for creativity democratic access and freedom of speech but one that denies property rights and misappropriates the public domain In this book Merima Bruncevic takes up the cultural commons not merely as an abstract notion but in its connection to physical spaces such as museums and libraries A legal cultural commons can she argues be envisioned as a lawscape that can quite literally be entered and engaged with Focusing largely on art in the context of the

copyright regime but also addressing a number of cultural heritage issues the book draws on the work of Deleuze and Guattari in order to examine the realm of the commons as a potential space for overcoming the dichotomy between the owner and the consumer of culture Challenging this dichotomy it is the productive and creative potential of law itself that is elicited through the book s approach to the commons as the empirical basis for a new legal framework which is able to accommodate a multitude of interests and values

The Dusk of Design Jose Antonio Lara-Hernandez,Alessandro Melis,Paola Boarin,Priscila Besen,2025-01-13 The Dusk of Design explores the intersection of evolutionary theories and architectural design Drawing inspiration from the concept of exaptation in biology the book argues that natural selection as the most successful designer on our planet thrives on the diversity variability and redundancy of creative structures By transferring these mechanisms to architectural design the book contends that we can cultivate more resilient and sustainable architecture and cities in the face of environmental crises This book seeks to illuminate the profound potential of multidisciplinary by examining case studies from architecture worldwide By exploring how evolutionary theories can explain various architectural phenomena it aims to inspire architects designers researchers and students to adopt a holistic and transdisciplinary approach to their work The book provides a clear and concise overview of evolutionary principles demonstrating their relevance to architecture It will showcase a range of case studies that highlight the application of evolutionary theories in solving architectural challenges such as adaptive reuse sustainable urban planning and resilient design in the face of climate change Ultimately The Dusk of Design aims to bridge the gap between biology and architecture presenting a fresh perspective on how we can create more innovative sustainable and resilient built environments

Governing Markets as Knowledge Commons Erwin Dekker,Pavel Kuchař,2021-12-16 Volume compiles studies of the production and reproduction of market supporting social infrastructures through the prism of knowledge commons

Spatial Justice in the City Sophie Watson,2019-11-04 In the context of increasing division and segregation in cities across the world along with pressing concerns around austerity environmental degradation homelessness violence and refugees this book pursues a multidisciplinary approach to spatial justice in the city Spatial justice has been central to urban theorists in various ways Intimately connected to social justice it is a term implicated in relations of power which concern the spatial distribution of resources rights and materials Arguably there can be no notion of social justice that is not spatial Philippopoulos Mihalopoulos has argued that spatial justice is the struggle of various bodies human natural non organic technological to occupy a certain space at a certain time As such urban planning and policy interventions are always to some extent at least about spatial justice And as cities become ever more unequal it is crucial that urbanists address questions of spatial justice in the city To this end this book considers these questions from a range of disciplinary perspectives Crossing law sociology history cultural studies and geography the book s overarching concern with how to think spatial justice in the city brings a fresh perspective to issues that have concerned urbanists for several decades The inclusion of empirical work in

London brings the political social and cultural aspects of spatial justice to life The book will be of interest to academics and students in the field of urban studies sociology geography planning space law and cultural studies

Controlling Urban Events Andrea Pavoni, 2017-12-06 How does order emerge out of the multiplicity of bodies objects ideas and practices that constitute the urban This book explores the relation between space law and control in the contemporary city and particularly in the context of urban mega events through a combined geographical and normative analysis Informed by the recent spatial affective and material turns in the humanities and social sciences Andrea Pavoni addresses this question by pursuing an innovative and trans disciplinary approach capable of accounting for the emergence of order in urban space both at the conceptual and empirical levels Two overarching objectives are pursued First to account for the increasing convergence of logics techniques and technologies of law security and marketing into novel potentially oppressive spatial configurations Second to envisage a consistent ethico political strategy to counter this evolution by rethinking originally and in radically spatial terms the notion of justice Forging a sophisticated and original analysis this book offers an analysis that will be of considerable interest to those working in critical urban geography critical legal studies critical event studies surveillance and control studies

Crime, Bodies and Space Miriam Tedeschi, 2019-12-12 With cities increasingly following rigid rules for designing out crime and producing spaces under surveillance this book asks how information shapes bodies space and ultimately policymaking In recent years public spaces have changed in Western countries with the urban realm becoming an ever more monitored privatised homogeneous and aseptic space that has lost its character uniqueness and diversity in the name of security This underpins precise moral and political choices in terms of what a space should be how it can be used and by whom These choices generate material consequences concerning urban inequality and freedom or otherwise of movement Based on ethnographic and autoethnographic explorations in London s criminal spaces this book illustrates how rules policies and moral values far from being abstract concepts are in fact material Outlining the basis of a new urban information ethics the book both exposes and challenges how moral values and predefined categories are applied to and materially shape the movement of bodies in urban space with regard to crime and security policies Drawing on Gilbert Simondon s information theory and a wide range of work in urban studies geography and planning as well as in surveillance studies object oriented ontology and contemporary theoretical work on both materiality and affect the book provides a radically new perspective on urban space in general and crime and security in particular This book uses a balanced mix of theoretical concepts and empirical study to bring theory and practice together in an intertwining of ethnography and autoethnography This book will be of interest to students and scholars in the fields of urban studies urban geography sociology surveillance studies legal theory socio legal studies planning law environmental law and land law

A Jurisprudence of Movement Olivia Barr, 2016-02-22 Law moves whether we notice or not Set amongst a spatial turn in the humanities and jurisprudence more specifically this book calls for a greater attention to legal movement in both its technical

and material forms Despite various ways the spatial turn has been taken up in legal thought questions of law movement and its materialities are too often overlooked This book addresses this oversight and it does so through an attention to the materialities of legal movement Paying attention to how law moves across different colonial and contemporary spaces this book reveals there is a problem with common law s place Primarily set in the postcolonial context of Australia although ranging beyond this nationalised topography both spatially and temporally this book argues movement is fundamental to the very terms of common law s existence How then might we move well Explored through examples of walking and burial this book responds to the challenge of how to live with a contemporary form of colonial legal inheritance by arguing we must take seriously the challenge of living with law and think more carefully about its spatial productions and place making activities Unsettling place this book returns the question of movement to jurisprudence **Animals, Biopolitics, Law** Irus

Braverman,2015-12-22 Typically the legal investigation of nonhuman life and of animal life in particular is conducted through the discourse of animal rights Within this discourse legal rights are extended to certain nonhuman animals through the same liberal framework that has afforded human rights before it Animals Biopolitics Law envisions the possibility of lively legalities that move beyond the humanist perspective Drawing on an array of expertise from law geography and anthropology through animal studies and posthumanism to science and technology studies this interdisciplinary collection asks what in legal terms it means to be human and nonhuman what it means to govern and to be governed and what are the ethical and political concerns that emerge in the project of governing not only human but also more than human life **Spatial Justice** Andreas Philippopoulos-Mihalopoulos,2014-10-30 There can be no justice that is not spatial Against a recent tendency to despatialise law matter bodies and even space itself this book insists on spatialising them arguing that there can be neither law nor justice that are not articulated through and in space Spatial Justice presents a new theory and a radical application of the material connection between space in the geographical as well as sociological and philosophical sense and the law in the broadest sense that includes written and oral law but also embodied social and political norms More specifically it argues that spatial justice is the struggle of various bodies human natural non organic technological to occupy a certain space at a certain time Seen in this way spatial justice is the most radical offspring of the spatial turn since as this book demonstrates spatial justice can be found in the core of most contemporary legal and political issues issues such as geopolitical conflicts environmental issues animality colonisation droning the cyberspace and so on In order to argue this the book employs the lawscape as the tautology between law and space and the concept of atmosphere in its geological political aesthetic legal and biological dimension Written by a leading theorist in the area Spatial Justice Body Lawscape Atmosphere forges a new interdisciplinary understanding of space and law while offering a fresh approach to current geopolitical spatiolegal and ecological issues Spacing Law and Politics Leif Dahlberg,2016-04-20 Examining the inherent spatiality of law both theoretically and as social practice this book presents a genealogical account of the emergence and the development of the

juridical In an analysis that stretches from ancient Greece through late antiquity and early modern and modern Europe and on to the contemporary courtroom it considers legal and philosophical texts artistic and literary works as well as judicial practices in order to elicit and document a series of critical moments in the history of juridical space Offering a more nuanced understanding of law than that found in traditional philosophical political or social accounts of legal history Dahlberg forges a critical account of the intimate relations between law and politics that shows how juridical space is determined and conditioned in ways that are integral to the very functioning and malfunctioning of law Spaces of Justice Chris Butler,Edward Mussawir,2017-02-10 This collection is inspired by the transdisciplinary possibilities posed by the connections between space and justice Drawing on a variety of theoretical influences that include Henri Lefebvre Gilles Deleuze and Felix Guattari Doreen Massey Gillian Rose Walter Benjamin Elias Canetti Antonio Negri and Yan Thomas the contributors to this book conduct a series of jurisprudential aesthetic and political inquiries into just modes of occupying space and the ways in which space comes under the signs of law and justice Bringing together leading critical legal scholars with theorists and practitioners from other disciplines within the humanities Spaces of Justice investigates unexplored associations between law and architectural theory the visual arts geography and cultural studies The book contributes to the ongoing destabilisation of the boundaries between law and the broader humanities and will be of considerable interest to scholars and students with an interest in the normative dimensions of law s spatial turn **Border Security** Peter Chambers,2017-09-27 What kind of a world is one in which border security is understood as necessary How is this transforming the shores of politics And why does this seem to preclude a horizon of political justice for those affected Border Security responds to these questions through an interdisciplinary exploration of border security politics and justice Drawing empirically on the now notorious case of Australia the book pursues a range of theoretical perspectives including Foucault s work on power the systems theory of Niklas Luhmann and the cybernetic ethics of Heinz Von Foerster in order to formulate an account of the thoroughly constructed and political nature of border security Through this detailed and critical engagement the book s analysis elicits a political alternative to border security from within its own logic thus signaling at least the beginnings of a way out of the cost cruelty and devaluation of life that characterises the enforced reality of the world of border security Urban Surfaces, Graffiti, and the Right to the City Sabina Andron,2023-11-22 This landmark book focuses on urban surfaces on exploring their authorship and management and on their role in struggles for the right to the city Graffiti pristine walls advertising posters and municipal signage all compete on city surfaces to establish and imprint their values on our environments It is the first time that the surfacescapes of our cities are granted the entire attention of a book as material visual and legal territories The book includes a critical history of graffiti and street art as contested surface discourses and argues for surfaces as sites of resistance against private property neoliberal creativity and the imposition of urban order It also proposes a seven point manual for a semiotics of urban surfaces laying the ground for a new discipline

surface studies Page after page and layer after layer surfaces become porous and political and emerge as key spatial conditions for rethinking and re practicing urban dwelling and spatial justice They become what the author terms the surface commons The book will appeal to a wide readership across the disciplines of urban studies architectural theory and design graffiti street art and public art criminology semiotics visual culture and urban and legal geography It will also serve as a tool for city scholars policy makers artists and vandals to disrupt existing imaginaries of order justice and visibility in cities

Commoning the City Derya Özkan,Güldem Baykal Büyüksaraç,2020-03-10 This collection seeks to expand the limits of current debates about urban commoning practices that imply a radical will to establish collaborative and solidarity networks based on anti capitalist principles of economics ecology and ethics The chapters in this volume draw on case studies in a diversity of urban contexts ranging from Detroit USA to Kyrenia Cyprus on urban gardening and land stewardship collaborative housing experiments alternative food networks claims to urban leisure space migrants appropriation of urban space and workers cooperatives collectives The analysis pursued by the eleven chapters opens new fields of research in front of us the entanglements of racial capitalism with enclosures and of black geographies with the commons the critical history of settler colonialism and indigenous commons law as a force of enclosure and as a strategy of commoning housing commons from the urban scale perspective solidarity economies as labour commons territoriality in the urban commons the non territoriality of mobile commons the new materialist and post humanist critique of the commons debate and feminist ethics of care

Make_shift city F. Ferguson,2014 *Urban Commons* Mary Dellenbaugh,Markus Kip,Majken Bieniok,Agnes Müller,Martin Schwegmann,2015-06-16 Urban space is a commons simultaneously a sphere of human cooperation and negotiation and its product Understanding urban space as a commons means that the much sought after productivity of the city precedes rather than results from strategies of the state and capital This approach challenges assumptions of urbanization as capital driven an idea which resonates with a range of recent urban social movements from the Arab Spring and the Occupy movement to the Right to the City alliance However commons exist in a tense relationship with state and market both of which continually seek to exploit and control them Initiatives to create commons are welcomed and even facilitated by governments in order to re valorize urban space and lessen the impacts of economic restructuring while at the same time the creative and reproductive potential of the urban commons is undermined by continuing attempts to commodify them This volume examines these topics theoretically and empirically through a wide spectrum of international case studies providing perspectives from a variety of cities as diverse as Berlin Hyderabad and Seoul A wider discussion of commons in current scientific and activist literature from housing public space to urban

infrastructure is explored through the lens of the urban condition
