NASA 50th Anniversary Proceedings: NASA's First 50 Years: Historical Perspectives

Steven J. Dick, National Aeronautics and Space Administration, 2010-07-07 On 29 July 1958 President Dwight D Eisenhower signed the National Aeronautics and Space Act creating the National Aeronautics and Space Administration NASA which became operational on 1 October of that year Over the next 50 years NASA achieved a set of spectacular feats ranging from advancing the well established field of aeronautics to pioneering the new fields of Earth and space science and human spaceflight In the midst of the geopolitical context of the Cold War 12 Americans walked on the Moon arriving in peace for all mankind Humans saw their home planet from a new perspective with unforgettable Apollo images of Earthrise and the Blue Marble as well as the pale blue dot from the edge of the solar system A flotilla of spacecraft has studied Earth while other spacecraft have probed the depths of the solar system and the universe beyond In the 1980s the evolution of aeronautics gave us the first winged human spacecraft the Space Shuttle and the International Space Station stands as a symbol of human cooperation in space as well as a possible way station to the stars With the Apollo fire and two Space Shuttle accidents NASA has also seen the depths of tragedy In this volume a wide array of scholars turn a critical eye toward NASA s first 50 years probing an institution widely seen as the premier agency for exploration in the world carrying on a long tradition of exploration by the United States and the human species in general Fifty years after its founding NASA

finds itself at a crossroads that historical perspectives can only help to illuminate

The Rise of the Commercial Space Industry Brian C. Odom, 2024-09-13 This collection explores the evolution of the commercial space industry from the beginning of the space age through the early twenty first century Today the space industry is taking on an increased leadership and innovation role in both space access and exploration The growth of commercial space over the past decades offers a potential new paradigm for space exploration one in which industry transitions from supplier to partner However many questions remain This book seeks to bring to light these questions which span from the most seemingly consequential how will humanity explore the Moon and Mars to the most basic what is commercial space To further develop the historical context of commercial space and thereby better inform decision making at NASA in the future this volume examines a broad range of questions related to the history of commercial space operations including but not limited to how has the concept of commercial space evolved in different fields and disciplines What have been the major events and milestones in the emergence and evolution of commercial space activities in the USA and internationally How has the US Government assisted or impeded the emergence and evolution of commercial space activities Providing contributions from a range of different disciplines and backgrounds the authors of this volume offer valuable insights for scholars researching the history of space and space policy as well as decision makers working at NASA or within the wider space industry

Spacecraft Michael H. Gorn, 2018-09-04 Spacecraft takes a long look at humankind's attempts and advances in leaving Earth through incredible illustrations and authoritatively written profiles on Sputnik the International Space Station and beyond In 1957 the world looked on with both uncertainty and amazement as the Soviet Union launched Sputnik 1 the first man made orbiter Sputnik 1 would spend three months circling Earth every 98 minutes and covering 71 million miles in the process The world's space programs have traveled far literally and figuratively since then and the spacecraft they have developed and deployed represent almost unthinkable advances for such a relatively short period This ambitiously illustrated aerospace history profiles and depicts spacecraft from Sputnik 1 through the International Space Station and everything in between including concepts that have yet to actually venture outside the Earth's atmosphere Illustrator and aerospace professional Giuseppe De Chiara teams up with aerospace historian Michael Gorn to present a huge profusely illustrated and authoritatively written collection of profiles depicting and describing the design development and deployment of these manned and unmanned spacecraft Satellites capsules spaceplanes rockets and space stations are illustrated in multiple view sometimes cross section and in many cases shown in archival period photography to provide further historical context Dividing the book by era De Chiara and Gorn feature spacecraft not only from the United States and Soviet Union Russia but also from the European Space Agency and China The marvels examined in this volume include the rockets Energia Falcon 9 and VEGA the Hubble Space Telescope the Cassini space probe and the Mars rovers Opportunity and Curiosity Authoritatively written and profusely illustrated with more than 200 stunning artworks Spacecraft 100 Iconic Rockets Shuttles and Satellites That Put Us
