Biotraffic Christopher Morris, 2024-10-15 Biotraffic explores the complex world of biological resource trade It takes readers inside the contemporary Ciskei region of South Africa a once notorious apartheid homeland turned extractive hub for wild medicinal plants Drawing from in depth ethnographic and archival research Christopher Morris examines the region s trade in *Pelargonium sidoides* a plant once contested as a tuberculosis treatment in early twentieth century Europe and now an internationally marketed remedy for the common cold The story of this trade links past and present encapsulating a larger tale about colonial legacies and their intersection with global environmental governance ambitions It also teems with a diverse cast of actors from plant harvesters and pharmaceutical companies to activist NGOs and the chiefs who have become business partners with multinational drug firms The book s analysis extends beyond considering merely the extraction and commercialization of plant resources and offers a critical examination of how demand for therapeutics intertwines with broader struggles over land and political power in South Africa Biotraffic illuminates how a distance defying trade is reshaping the sociopolitical landscape of a region a region grappling with apartheid s afterlives and the challenges of environmental and economic justice
