Advances in Production Management Systems. Artificial Intelligence for Sustainable and Resilient Production

Systems Alexandre Dolgui, Alain Bernard, David Lemoine, Gregor von Cieminski, David Romero, 2021-09-01 The five volume set IFIP AICT 630 631 632 633 and 634 constitutes the refereed proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems APMS 2021 held in Nantes France in September 2021. The 378 papers presented were carefully reviewed and selected from 529 submissions. They discuss artificial intelligence techniques, decision aid, and new and renewed paradigms for sustainable and resilient production systems at four wall factory and value chain levels. The papers are organized in the following topical sections: Part I artificial intelligence based optimization techniques for demand driven manufacturing, hybrid approaches for production planning and scheduling, intelligent systems for manufacturing planning and control in the industry 4.0, learning and robust decision support systems for agile manufacturing environments, low code and model driven engineering for production system, meta heuristics and optimization techniques for energy oriented manufacturing systems, metaheuristics for production systems, modern analytics and new AI based smart techniques for replenishment and production planning under uncertainty, system identification for manufacturing control applications and the future of lean thinking and practice. Part II digital transformation of SME manufacturers, the crucial role of standard digital transformations towards supply chain resiliency, engineering of smart product service systems of the future, lean and Six Sigma in services, healthcare, new trends and challenges in reconfigurable flexible or agile production system, production management in food supply chains and sustainability in production planning and lot sizing. Part III autonomous robots in delivery logistics, digital transformation approaches in production management, finance driven supply chain, gastronomic service system design, modern scheduling and applications in industry 4.0, recent advances in sustainable manufacturing, regular session green production and circularity concepts, regular session improvement models and methods for green and innovative systems, regular session supply chain and routing management, regular session robotics and human aspects, regular session classification and data management methods, smart supply chain and production in society 5.0 era and supply chain risk management under coronavirus. Part IV AI for resilience in global supply chain networks in the context of pandemic disruptions, blockchain in the operations and supply chain management, data based services as key enablers for smart products manufacturing and assembly, data driven methods for supply chain optimization, digital twins based on systems engineering and semantic modeling, digital twins in companies, first developments and future challenges, human centered artificial intelligence in smart manufacturing for the operator, 4.0 operations management in engineer to order manufacturing, product and asset life cycle management for smart and sustainable manufacturing systems, robotics technologies for control smart manufacturing and logistics, serious games, analytics improving games and learning support, smart and sustainable production and supply chains, smart methods and techniques for sustainable supply chain management, the new digital lean manufacturing paradigm and the role of emerging technologies in disaster relief operations, lessons from COVID 19. Part V data driven platforms and applications in production and logistics, digital twins and AI for sustainability.

Prototype Jason Dean,2023-02-16 A single breakthrough could change the world forever Having just completed a complex recovery assignment covert salvage specialist Korso is in no mood to take on another job so soon but he has little choice when he s contacted by Cole Ashcroft an ex colleague who s calling in a debt An official at the US Embassy in Bulgaria has approached Cole with a well paying salvage job but only if he can persuade Korso to plan the whole operation A chemist for a pharmaceutical company has secretly developed a revolutionary glaucoma pill one with an unexpected side effect that could make it the discovery of the century But the chemist has since been found dead and the prototypes are missing Aware that ownership of these pills could shift the balance of military power overnight the embassy man offers to pay Korso handsomely to locate and recover them using any means necessary But with a job this big Korso also knows he ll have to assemble a team to help him and that brings its own set of problems Because with potential profits in the billions can he really trust anyone A full throttle thriller that will keep you guessing to the very end perfect for fans of Mark Greaney Ben Coes and Adam Hamdy

The Evolution of European Manufacturing Industries Bolesław Domański,Grzegorz Micek,Robert Guzik,Krzysztof Gwosdz,Arkadiusz Kocaj,2024-08-29 The book provides a picture of the increasing significance of Central Europe and especially Poland in global production networks discussing the underlying economic social and political factors The key question it answers is to what extent the growth of production and exports results in industrial upgrading towards the manufacturing of more sophisticated high value added products new technologies and the development of non production functions especially design and advanced service capabilities The book shows that Central European manufacturing no longer exhibits the typical features of production activities in the periphery in particular low density and diversity low productivity narrow specialisation in low value added activities and poor local linkages hence limited local value creation and value capture There is still dependence on foreign controlled enterprises in several sectors and limited product innovation which remains a major weakness Further the book assesses the social consequences of the ongoing development of manufacturing capabilities in Poland and its impact on employment conditions

including the quality of jobs and level of wages The authors provide insight into relationships between globalisation processes place specific attributes and current economic policies and as such the book will be of interest to academics policy makers and other stakeholders interested in both peripheral economies and core countries and representing various international organisations dealing with economic transition and development
