World Bank Financing Of Education Lending Learning And Development:

World Bank Financing of Education Phillip W. Jones, 2007-02-12 Based on detailed analysis of thousands of confidential World Bank documents this book demonstrates that the World Bank lies at the centre of the major changes in global education of our time It outlines the evolution of World Bank lending policies in education and assesses the policy impact of the Bank's educational projects looking at how it has shaped the economic and social policies of many governments including policies that affect education been an influential proponent of the rapid expansion of formal education systems around the world financing much of that expansion been instrumental in forging those policies that see education as a precursor to modernisation served as a major purveyor of Western ideas about how education and the economy are or should be related Following on from the success of the first edition this revised edition covers topical issues of globalisation and looks into the political debate concerning aid to developing countries It will be of enormous value to those studying or working in educational policy in developing countries international organisations and financial institutions and aid agencies

Handbook of Global Education Policy Karen Mundy, Andy Green, Bob Lingard, Antoni Verger, 2016-02-29 This innovative new handbook offers a comprehensive overview of the ways in which domestic education policy is framed and influenced by global institutions and actors Surveys current debates about the role of education in a global polity highlights key transnational policy actors accessibly introduces research methodologies and outlines global agendas for education reform Includes contributions from an international cast of established and emerging scholars at the forefront of the field thoughtfully edited and organized by a team of world renowned global education policy experts Each section features a thorough introduction designed to facilitate readers understanding of the subsequent material and highlight links to interdisciplinary global policy scholarship Written in an accessible and engaging style that will appeal to domestic and international policy practitioners social scientists and education scholars alike

The World Bank's Role in Human Resource Development in Sub-Saharan Africa Ronald Gene Ridker, 1994 World Bank Discussion Paper 244 Although many studies have analyzed the gender gap in primary and secondary education in developing countries this study is one of the few that analyzes the gap at the tertiary or university level The authors track the patterns in women's access to and achievement in higher education including student enrollment and access to faculty and administrative positions The study also identifies successful strategies and measures for reducing the gender gap Two issues are examined in this paper Part I reviews how women have fared in the wake of expanded tertiary enrollments over the past three decades Despite evidence proving the importance of women's access to higher education for economic growth a pervasive gap remains especially in Sub-Saharan Africa the Middle East and South Asia The second part examines the World Bank's experience in projects designed to improve women's experience in higher education The extent and severity of constraints varied across regions Results are limited and many projects are still in progress The findings suggest that countries with low per capita income

levels and difficult social settings for women may have the greatest barriers to female participation Even where social constraints are less severe the programs for improving female education must respond to the demands of the labor market

Education and Development James Lynch,1997-01-01 This text approaches the subject of education and development on the basis that free universal primary education is a human right which should be accorded to all children forthwith This must be provided as a package of benefits encompassing universal primary education basic health care and adequate nutrition The analysis allows for the fact that policies for education are also subject to the influence of broader social philosophies and epistemologies than those solely of the educational system

Development Policy in the Twenty-First Century Ben Fine,Costas Lapavistas,Jonathan Pincus,2003-09-02 The Post Washington Consensus has succeeded in becoming the new theoretical underpinning for the World Bank s Structural Adjustment policies in developing countries This broad ranging critique explains that without a much broader political economy the Post Washington Consensus is unlikely to provide a coherent framework for successful development policies Development Policy in the 21st Century is unique in its depth and assesses the postures of the new consensus topic by topic whilst posing strong alternatives It will improve and stimulate the reader s understanding of this important area and is highly recommended to advanced students and professionals

World Bank Anne C. M. Salda,1995 *The Dividends of Learning* World Bank. Population and Human Resources Department,1990 Education gives people the opportunity to become more productive escape poverty and improve the quality of their lives For more than two decades the World Bank has supported the efforts of developing countries to expand and improve education at all levels This document discusses World Bank efforts in support of education in developing countries as the 1990s begin Figures on lending for education as well as Bank support for educational policy and analysis and research are included Strategies for educational development are presented for several different education levels and representative efforts at each level in individual countries are discussed A number of figures appear in the booklet and an appendix detailing World Bank education projects being implemented is included

World Yearbook of Education 2014 Tara Fenwick,Eric Mangez,Jenny Ozga,2014-01-10 This latest volume in the World Yearbook of Education Series focuses on a major and highly significant development in the governing of education across the globe the use of knowledge based technologies as key policy sources A combination of factors has produced this shift first the massive expansion of technological capacity signalled by the arrival of big data that allows for the collection circulation and processing of extensive system knowledge The rise of data has been observed and discussed extensively but its role in governing and the rise of comparison as a basis for action is now a determining practice in the field of education Comparison provides the justification for modernising policy in education both in the developed and developing world as national policy makers selectively seek templates of success from the high performers and demand solutions to apparent underperformance through the adoption of the policies favoured by the likes of Singapore Finland and Korea In parallel the growth of particular forms of expertise the rise and rise of educational

consultancy the growth of private for profit involvement in provision of educational goods and services and the increasing consolidation of networks of influence in the promotion of best practice are affecting policy decisions Through these developments the nature of knowledge is altered along with the relationship between knowledge and politics Knowledge in this context is co constructed it is not disciplinary knowledge but knowledge that emerges in the sharing of experience This book provides a global snapshot of a changing educational world by giving detailed examples of a fundamental shift in the governing and practice of education learning by Assessing approaches to the changing nature of comparative knowledge and information Tracking the translation and mobilisation of these knowledges in the governing of education learning Identification of the key experts and knowledge producers circulators translators and analysis of how best to understand their influence Mapping of the global production of these knowledges in terms of their range and reach the interrelationships of actors and their effects in different national settings Drawing on material from around the world the book brings together scholars from different backgrounds who provide a tapestry of examples of the global production and national reception and mediation of these knowledges and who show how change enters different national spaces and consider their effects in different national settings

Higher Education in Ethiopia Tebeje Molla, 2018-01-18 This book focuses on higher education in Ethiopia analysing persisting inequalities and policy responses against the backdrop of the extensive expansion and reform that the system has experienced in recent years Drawing on empirical data generated through interviews policy reviews and focus group discussions it explicates factors of structural inequality ranging from neoliberal policy orientations to repressive gender culture and geo political peripherality In a departure from conventional studies that consider policy a response to social problems the book takes a critical perspective to show the constitutive role of policy and explains how the representation of the problem of social inequality undermines equity policy outcomes in Ethiopian higher education Not only does the book problematise the framing of the problem of inequality in the system it also outlines strategies for designing transformative equity instruments In explaining structural factors of inequality and equity provisions the book productively combines sociological concepts with historical accounts and political economy insights Given the increased economic optimism associated with higher education in sub Saharan Africa and the neoliberal ideals underpinning much of the restructuring of the system in the region this is a timely and important contribution that sheds light on the social justice implications and consequences of such changes It offers fresh accounts of largely neglected qualitative cases of inequality making it a valuable read for students and researchers in the areas of Ethiopian education policy studies international and comparative education and international development

Education, Poverty and the World Bank Phillip W. Jones, 2006 This book explains why the World Bank s commitment to education is important It considers how the nature of the Bank as a financial institution has shaped its view of economic growth development and poverty reduction In shaping its education policies and programs from a banking point of view a particular World Bank approach to educational development has

emerged with major implications for the future of education worldwide The book examines the reasons why the Bank is involved in education the evolution of its education policy stances and how the Bank uses education as part of its program of economic globalisation The author provides a framework for assessing the Bank s impact and effectiveness in its education lending especially in terms of poverty reduction Bank work in education is hugely controversial All around the world in industrial countries in transition economies and in the poorest countries the Bank continues to be under fire for its policy prescriptions and its modes of operation From both left and right the Bank is a major target of discontent At the same time the Bank is frequently misunderstood and misrepresented The book is based on thousands of classified Bank documents examined over the past twenty years and on wide ranging interviews with past and present Bank officials Although critical of many aspects of Bank work in education the book will be recognised as a uniquely authoritative guide to Bank policy formation in education Back cover **From Manpower Planning to the Knowledge Era** Joel Samoff,2003
